sense of self – the student's nascent professional identity – needs to take a particular form if the students are to fulfil the public purposes of lawyers and find deep meaning and satisfaction in their work. In this book, Professors Patrick Longan, Daisy Floyd, and Timothy Floyd combine what they have learned in many years of teaching and research concerning the lawyer's professional identity with lessons derived from legal ethics, moral psychology, and moral philosophy. They describe in depth the six virtues that every lawyer needs as part of his or her professional identity, and they explore both the obstacles to acquiring and deploying those virtues and strategies for overcoming those impediments. The result is a straightforward guide for law students on how to cultivate a professional identity that will

Domestic Service and Mastery in Metropole and Colony
Communism and Nationalism, 1917-1923, First Edition
Electrical Review

1975: January-June

Despite recent research, the 19th-century history of domestic service in empire and its wider implications is underexplored. This book sheds new light on servants and their masters in the British Empire, and in doing so offers new discourses on the colonial home, imperial society identities and colonial culture. Using a wide range of source

material, from private papers to newspaper articles, official papers and court records, Dussart explores the strategic nature of the relationship, the connection between imperialism, domesticity and a master/servant paradigm that was deployed in different ways by varied actors often neglected in the historical record. Positioned outside the family but inside the private place of the home, 'the domestic servant' was often the foil against which 19th-century contemporaries worked out class, race and gender identities across metropole and colony, creating those places in the process. The role of domestic servants in empire thus lay not only in the

labour they undertook, but also in the way the servant-master relationship constituted ground that helped other power relations to be imagined and contested. Dussart explores the domestic service relationship in 19th-century Britain and India, considering how ideas about servants and their masters and/or mistresses spanned imperial space, and shaped peoples and places within it.

Here is the history of the disintegration of the Russian Empire, and the emergence, on its ruins, of a multinational Communist state. In this revealing account, Richard Pipes tells how the Communists exploited the new nationalism of the peoples of the Ukraine, Belorussia, the Caucasus, Central Asia, and the Volga-Ural area--first to seize power and then to expand into the borderlands. The Formation of the Soviet Union acquires special relevance in the post-Soviet era, when the ethnic groups described in the book once again reclaimed their
