Methods of IT Project Management (Third Edition) is built around the latest version of the Project Management Body of Knowledge (PMBOK) and covers best practices unique to the IT field. It is designed for use in graduate, advanced undergraduate, and professional IT project management courses to prepare students for success in the IT field, and to prepare them to pass the Project Management Professional (PMP) certification exam given by the Project Management Institute (PMI), the world's leading certification in the field of project management. Unlike other project management texts, Methods of IT Project Management follows the IT project life cycle, from overview and initiation to execution, control, and closing. An enterprise-scale IT project (macro-case study) runs through the entire text. Each section presents mini-cases based on the larger case and focuses on new concepts presented in each section. Readers gain practical knowledge of IT project management workflows, at scale, while building technical knowledge and skills required to pass the PMP. Mini-case studies encourage deep retention, prompt rich in-class discussion, and challenge more advanced students and professionals alike. Unique skills covered can be put directly into practice. An appendix presents practice study questions and advice on preparing for and passing the PMP exam. The revised third edition includes expanded coverage of agile system development methodologies, leadership and negotiation skills, and process maturity models.

These questions are similar to the ones asked in the actual Test. How should I know? I know, because although I have been working as an SAP Project Manager for many years, I have myself recently certified with the latest version of the Associate Certification test. Before you start here are some Key features of the Project Manager Associate Certification Exam. The "SAP Certified Associate Project Manager" certification exam verifies that the candidate has the knowledge required in the area of SAP project management. This certificate builds on basic consultant skills and experience that is then refined by practical experience during several projects. This exam validates whether SAP focused project managers have advanced business skills and the ability to apply methodologies and tools. This exam validates that project managers know how to manage the end-to-end transition of the project from Sales to Realization, can develop roadmaps for project execution, understands testing and quality management. In particular for SAP related projects, the exam verifies that the Project Manager can apply SAP-specific roadmaps and tools like ASAP and Solution Manager. The exam is Computer based and you have three Hours to answer 80 Questions. The Questions are (mostly) multiple choice type and there is NO penalty for an incorrect answer. Some of the Questions have more than one correct answer. You must get ALL the options correct for you to be awarded points. For questions with a single answer, the answers will have a button next to them. You will be able to select only one button. For questions with multiple answers, the answers will have a 'tick box' next to them. This allows you to select multiple answers. You are not allowed to use any reference materials during the certification test (no access to online documentation or to any SAP system). Clearing the Certification will not automatically lead you to a job. However a Certification with some project experience will certainly open a lot of doors for you. So if you have little or no experience, you should get yourself certified, get some project experience, and then the whole of the SAP World open for you to explore. Helping you with the first step on you ladder to success is this book! Some UNIQUE features of this Book: - There is NO Other material in the market for the SAP Project Manager Certification exam. - The author has herself cleared the exam. - All questions are multiple choice format, similar the questions you will get in the actual exam. - Over 200 authentic questions, testing the exact same concepts that will be tested in Your exam!
