

Fundamentals of Environmental Studies is taught as a compulsory paper to first-year undergraduate students across major technical universities in India. This book introduces the fundamental principles and concepts of environmental science, ecology and related interdisciplinary subjects, such as policy, law, pollution control, economics and natural resource management. It covers a wide range of topics and issues including biodiversity, global warming, acid rain, ozone layer depletion, nuclear accidents, nuclear holocaust, disaster management, manipulation of various natural resources including water, land, forests, food and mineral resources, and the problems associated with natural resource management. It also analyzes different types of ecosystems, biochemical cycles and laws of thermodynamics and provides easy-to-understand examples. In addition, the book offers separate chapters on various types of environmental pollution and waste management, including waste water treatment, solid waste management and green management.

Due to the rapid increase in the production and consumption processes, societies generate as well as reject solid materials regularly from various sectors. The primary goals of this book are to encourage reduction of waste at the source and to foster implementation of cost-effective integrated solid waste management systems.

"Environmental Chemistry Quiz Questions and Answers" book is a part of the series "What is High School Chemistry & Problems Book" and this series includes a complete book 1 with all chapters, and with each main chapter from grade 10 high school chemistry course. "Environmental Chemistry Quiz Questions and Answers" pdf includes multiple choice questions and answers (MCQs) for 10th-grade competitive exams. It helps students for a quick study review with quizzes for conceptual based exams. "Environmental Chemistry Questions and Answers" pdf provides problems and solutions for class 10 competitive exams. It helps students to attempt objective type questions and compare answers with the answer key for assessment. This helps students with e-learning for online degree courses and certification exam preparation. The chapter "Environmental Chemistry Quiz" provides quiz

questions on topics: What is environmental chemistry, composition of atmosphere, layers of atmosphere, stratosphere, troposphere, ionosphere, air pollution, environmental issues, environmental pollution, global warming, meteorology, and ozone depletion. The list of books in High School Chemistry Series for 10th-grade students is as: - Grade 10 Chemistry Multiple Choice Questions and Answers (MCQs) (Book 1) - Organic Chemistry Quiz Questions and Answers (Book 2) - Biochemistry Quiz Questions and Answers (Book 3) - Environmental Chemistry Quiz Questions and Answers (Book 4) - Acids, Bases and Salts Quiz Questions and Answers (Book 5) - Hydrocarbons Quiz Questions and Answers (Book 6) "Environmental Chemistry Quiz Questions and Answers" provides students a complete resource to learn environmental chemistry definition, environmental chemistry course terms, theoretical and conceptual problems with the answer key at end of book.

Elements of Solid & Hazardous Waste Management

Introduces the field of hydrogen technology and explains the basic chemistry underlying promising and innovative new technologies This new and completely updated edition of Introduction to Hydrogen Technology explains, at an introductory level, the scientific and technical aspects of hydrogen technology. It incorporates information on the current research in the field, including: new techniques for isolating and storing hydrogen, usage as a fuel for automobiles, residential power systems, mobile power systems, and space applications. Introduction to Hydrogen Technology, Second Edition features classroom-tested exercises and sample problems. It details new economical methods for producing hydrogen molecule. These less expensive methods help make hydrogen fuel a very viable alternative to petroleum-based energy. The book also adds a new chapter on hydrogen production and batteries. It also provides in-depth coverage of the many technical hurdles in hydrogen storage. The developments in fuel cells since the last edition of the book are covered in new chapters on hydrogen production, storage, and batteries Features new sections on advanced hydrogen systems, new membranes, greenhouse gas sensors and updated technologies Involves solar and wind energies Includes problems at the end of the Chapters, as well as solutions for adopters This book is an introduction to hydrogen technology for scientists and researchers working in hydrogen-based technologies, as well as anyone interested in sustainable energy.

The Friedland and Relyea advantage. Built from the ground up specifically for the AP Environmental Science course, Friedland and Relyea Environmental Science for AP offers complete coverage of the AP course using the same terminology that students will see on the AP Environmental Science exam. This text provides teachers with the scientific background and a balanced approach to the material, and an organization that mirrors the AP topic outline, as shown on the correlation grid in the front of this text. Students benefit from real-world examples, engaging case studies, and numerous pedagogical features helping to prepare them for the exam. - Back cover.

All In One Biology ICSE Class 9 2021-22

Learning Elementary Science for Class 6

1. All in One ICSE self-study guide deals with Class 9 Biology 2. It Covers Complete Theory, Practice & Assessment 3. The Guide has been divided in 18 Chapters 4. Complete Study: Focused Theories, Solved Examples, Notes, Tables, Figures 5. Complete Practice: Chapter Exercises, Topical Exercises and Challenger are given for practice 6. Complete Assessment: Practical Work, ICSE Latest Specimen Papers & Solved practice Arihant’s ‘All in One’ is one of the best-selling series in the academic genre that is skillfully designed to provide Complete Study, Practice and Assessment. With 2021-22 revised edition of “All in One ICSE Biology” for class 9, which is designed as per the recently prescribed syllabus. The entire book is categorized under 18 chapters giving complete coverage to the syllabus. Each chapter is well supported with Focused Theories, Solved Examples, Check points & Summaries comprising Complete Study Guidance. While Exam Practice, Chapter Exercise and Challengers are given for the Complete Practice. Lastly, Practical Work, Sample and Specimen Papers loaded in the book give a Complete Assessment. Serving as the Self – Study Guide it provides all the explanations and guidance that are needed to study efficiently and succeed in the exam. TOC Cell: The Unit of Life, Tissues, The Flower, Pollination and Fertilisation, Structure and Germination of Seed, Respiration in Plants, Diversity in Living Organisms, Economics Importance of Bacteria and Fungi, Nutrition and Digestion in Humans, Movement and Locomotion, The Skin, Respiratory System, Health and Hygiene, Aids to Health: Active and Passive Immunity, Waste Generation and Management, Explanations to Challengers, Internal Assessment of Practical work, Sample Question Papers (1-5), Latest ICSE Specimen Paper.

The second edition of Multiple Choice Questions on Renewable Energy explores renewable energy sector in a multiple choice question format. It contains more than 1500 questions that focus on solar, wind, biomass, biogas, biofuels, hydro, energy from wastes, hydrogen, geothermal, ocean, tidal, and waves. Similar to the previous edition, this edition too has three levels of questions. The book provides a comprehensive overview of renewable energy development in India. This book is useful for academicians, students pursuing engineering or agriculture-related courses, aspirants of various competitive exams, professionals, and stakeholders in the renewable energy sector. It can also be used for quiz programmes organized in schools, universities, engineering institutions, and on television.

Since energy is an important aspect in all sectors, it needs to be given a due attention in education and awareness. Multiple Choice Questions on Energy y attempts to present the subject in a simple yet comprehensive manner for students and aspirants of various competitive exams. Keeping in view the present trend of various exams, the various types of energy have been presented in the form of multiple choice questions, which is the most common pattern of examination in every field of study in the science stream. Energy-related questions figure in various national-level competitive examinations, besides featuring in question papers for examinations in bachelor degree courses on engineering and technology.Multiple Choice Questions on Energy contains about 1300 multiple choice questions covering various sectors of energy, including mechanical energy, electrical energy, chemical energy, nuclear energy, thermal energy, magnetic energy, sound energy, energy from coal, petroleum oil and natural gas, renewable energy, and energy conservation. An introduction to energy has been presented in a comprehensive yet simplified form. This book is useful for academicians,students pursuing engineering or agriculture-related courses, aspirants of various competitive exams, professionals, and stakeholders in the energy sector. It can also be a tool for various quiz programmes organized in schools, universities, engineering institutions.

Me n Mine Pullout Worksheets Science is a complete practice material for students in the form of worksheets through which they can revise concepts and identify the areas of improvement. Assessment of all the topics can be comprehensively done through these sets. The series also comprises solved and unsolved practice papers as per latest CBSE syllabus and guidelines. Along with the basic exercises the series also comprises various elements of the formative assessment like puzzles, crosswords, projects, etc

This well-established book, now in its Fourth Edition, includes the positive feedback and constructive suggestions received from academics and students alike on the third edition. While retaining the major contents of the earlier editions, this edition incorporates a new chapter on the significance and impacts of Climate Change on the practice of Geotechnical Engineering. Some of these impacts are direct, e.g., desertification, flooding. Others are indirect, e.g., population migration, agriculture. Geotechnical engineers have to be prepared with plans to mitigate the impacts of these aspects. Case histories have been included to illustrate how advance preparedness may greatly help in providing relief and rehabilitation to the people in affected regions. The text skillfully integrates theory and practice and is suitable as a textbook for undergraduate students of civil engineering. Logical organization and presentation of topics make the book interesting and easily accessible. This textbook fully covers the requirements of geotechnical courses at undergraduate level prescribed in various universities. The book can also be used, by a judicious choice of topics, by the polytechnic students. KEY FEATURES • Contains plenty of worked-out numerical examples • Provides a large number of objective type questions and exercises • Analyzes field problems and case histories TARGET AUDIENCE • BE/B.Tech (Civil Engineering) • Diploma courses in Civil Engineering
