Americans agree that our students urgently need better science education. But what should they be expected to know and be able to do? Can the same expectations be applied across our diverse society? These and other fundamental issues are addressed in National Science Education Standards--a landmark development effort that reflects the contributions of thousands of teachers, scientists, science educators, and other experts across the country. The National Science Education Standards offer a coherent vision of what it means to be scientifically literate, describing what all students regardless of background or circumstance should understand and be able to do at different grade levels in various science categories. The standards address: The exemplary practice of science teaching that provides students with experiences that enable them to achieve scientific literacy. Criteria for assessing and analyzing students' attainments in science and the learning opportunities that school science programs afford. The nature and design of the school and district science program. The support and resources needed for students to learn science. These standards reflect the principles that learning science is an inquiry-based process, that science in schools should reflect the intellectual

traditions of contemporary science, and that all Americans have a role in improving science education. This document will be invaluable to education policymakers, school system administrators, teacher educators, individual teachers, and concerned parents.

Resistance to malaria. Blue eyes. Lactose tolerance. What do all of these traits have in common? Every one of them has emerged in the last 10,000 years. Scientists have long believed that the “great leap forward” that occurred some 40,000 to 50,000 years ago in Europe marked end of significant biological evolution in humans. In this stunningly original account of our evolutionary history, top scholars Gregory Cochran and Henry Harpending reject this conventional wisdom and reveal that the human species has undergone a storm of genetic change much more recently. Human evolution in fact accelerated after civilization arose, they contend, and these ongoing changes have played a pivotal role in human history. They argue that biology explains the expansion of the Indo-Europeans, the European conquest of the Americas, and European Jews' rise to intellectual prominence. In

each of these cases, the key was recent genetic change: adult milk tolerance in the early Indo-Europeans that allowed for a new way of life, increased disease resistance among the Europeans settling America, and new versions of neurological genes among European Jews. Ranging across subjects as diverse as human domestication, Neanderthal hybridization, and IQ tests, Cochran and Harpending's analysis demonstrates convincingly that human genetics have changed and can continue to change much more rapidly than scientists have previously believed. A provocative and fascinating new look at human evolution that turns conventional wisdom on its head, The 10,000 Year Explosion reveals the ongoing interplay between culture and biology in the making of the human race.

Alive After the Fall - How to Survive an EMP/HEMP Attack on the Power Grid This guide is a complete program that gives you not only great strategies to survive catastrophes, nuclear and chemical attacks. But also, to help you be a step ahead of the global enemy, understand political and social signs, and never be caught off-guard.

A World Wide Rave! What the heck is that? A World Wide Rave is when people around the world are talking about you, your company, and your products. It's when communities eagerly link to your stuff on the Web. It's when online buzz drives buyers to your virtual

doorstep. It's when tons of fans visit your Web site and your blog because they genuinely want to be there. Rules of the Rave: Nobody cares about your products (except you). No coercion required. Lose control. Put down roots. Point the world to your (virtual) doorstep. You can trigger a World Wide Rave: Just create something valuable that people want to share and make it easy for them to do so. What happens when people can't stop talking online about you, your company, and your products? A World Wide Rave is born that can propel a brand or company to seemingly instant fame and fortune. How do you create one? By learning the secret to getting links, YouTube, Facebook, and blog buzz to drive eager buyers to your virtual doorstep. For free. In World Wide Rave, David Meerman Scott, author of the award-winning hit book The New Rules of Marketing and PR, reveals the most exciting and powerful ways to build a giant audience from scratch.

Poetry. Women's Studies. LGBTQIA Studies. "Julie Marie Wade's SAME-SEXY MARRIAGE does not succumb to the gravitational forces of the quotidian--the 'respectable' marriage or the 'dignified' jet-setting life. Instead, this remarkable novella in verse speaks about the unspoken and dives headlong into the familial territory of taboo. Speculation turns to circumstance and back again as Wade's speakers cavort over games of pool with Anne Heche, contemplate Jeopardy!, unspoken truths, and final understandings with estranged exes. For Wade's characters, finality is in flux but through her verse filled with unabashed honesty and joy, SAME-SEXY MARRIAGE revels in matters of love."--Oliver de la Paz "Julie Marie Wade's heart-tearing, heart-baring SAME-SEXY MARRIAGE left me stunned with open-mouth gratitude. In this moving book a mother invents a heterosexual daughter to tell the neighbors about, so she can pretend to have a life she loves. But the wise speaker in this

book gives her heart to a woman, so she can invent a real life full of love. ('Anything less would be a waste of time.') Wade knows that the truth is the only story worth telling, and--thankfully for all of us--she tells it."--Aaron Smith "In this delightfully suspenseful sequence of poems, we relish in a poet doing what poets are called to do--to see most clearly in a world imagined, to cultivate compassion where there is none, to pull back the curtain of dangerous assumptions that make homes in our minds and in our language. 'This is how it feels to be living in a typo,' writes Wade, as she teases, mourns, and makes vulnerable the fragile straightness of 'Main Street and mainstream American values.' The poems in this collection, one rolling inevitably into the next, are a queer journey--irresistible, quirky, and same-sex, indeed."--Stacey Waite

How Civilization Accelerated Human Evolution

Creating Triggers that Get Millions of People to Spread Your Ideas and Share Your Stories

The first full-length collection of new poems in decades from San Francisco's groundbreaking feminist Beat poet.

Autistic people and musical individuals often have perfect pitch, a gift they were born with. The musical gift may be accompanied with learning differences such as reading comprehension problems, trouble with mathematics, and significant difficulties in learning how to read music. This book was written by a music therapist and an autistic researcher, and is endorsed by leading experts in the field of

autism and special-needs education. The Rancer Method is presented as page-by-page instructions to be implemented with readily-available method books so that every piano teacher can follow it and do well by their students. "By focusing on the abilities rather than the deficits of people with learning, perceptual, motor, and other differences, Kupferstein and Rancer have developed a revolutionary piano pedagogy that will empower individuals with autism and other differences by unleashing the power of what can be done." Stephen M. Shore, Ed.D.

Internationally known professor, consultant, speaker, and author on issues related to the autism spectrum and special education. Person on the autism spectrum p>"This book will help the quirky kid who is different to be successful in music. This method may help open musical doors for many individuals on the autism spectrum." Temple Grandin, author Thinking in Pictures and The Autistic Brain.

Perfect Pitch in the Key of Autism

Keynes and the Market

Keynes and the Market is an entertaining guide to John Maynard Keynes- amazing stock market success. It weaves the economist's value investing tenets around key

events in his richly lived life. This timely book identifies what modern masters of the market have taken from Keynes and used in their own investing styles—and what you too can learn from one of the greatest economic thinkers of the twentieth century. If you want to profit in today's turbulent stock market the techniques outlined here will put you in a better position to succeed.

Written by a Web marketing expert, "Cashing In with Content" interviews 20 of today's most innovative Web marketers and shares their secrets for using content to turn browsers into buyers. It also shows how to encourage repeat business and reveals how to unleash the amazing power of viral marketing.

The 10,000 Year Explosion

Good for the Jews is a smart, funny, sexy novel set in Madison, Wisconsin, during the Bush administration. Part mystery and part stranger-comes-to town story, Good for the Jews is loosely based on the biblical book of Esther. Like Esther, Debra Spark's characters deal with anti-Semitism and the way that powerful men---and the women who love them---negotiate bureaucracies. At the core of the story of right and wrong are young, attractive Ellen Hirschorn and her older cousin Mose, a high school teacher who thinks he knows, in fact, what is "good for the Jews"---and

for Ellen, too. Their stories intertwine with those of the school superintendent, his ex-wife and son, and a new principal. Workplace treachery, the bonds of family, coming of age, and romantic relationships all take center stage as the characters negotiate the fallout from a puzzling fire. Spark's evocative writing style and sharp, understanding treatment of her diverse characters draw the reader into this surprising page-turner. Debra Spark is the author of two previous novels, *The Ghost of Bridgetown* and *Coconuts for the Saint*, as well as *Curious Attractions: Essays on Fiction Writing*. She's been a fellow at Radcliffe College's Bunting Institute and a recipient of a National Endowment for the Arts award. Her short stories, essays, and reviews have appeared in publications including *Food and Wine*, *Esquire*, the *New York Times*, the *Washington Post*, and *Yankee*. She is a professor at Colby College and teaches in the MFA Program for Writers at Warren Wilson College.
