This volume seeks to offer a new approach to the study of music through the lens of recent works in science and technology studies (STS), which propose that facts are neither absolute truths, nor completely relative, but emerge from an intensely collective process of construction. Applied to the study of music, this approach enables us to reconcile the human, social, factual, and technological aspects of the musical world, and opens the prospect of new areas of inquiry in musicology and sound studies. Rethinking Music through Science and Technology Studies draws together a wide range of both leading and emerging scholars to offer a critical survey of STS applications to music studies, considering topics ranging from classical music instrument-making to the ethos of DIY in punk music. The book's four sections focus on key areas of music study that are impacted by STS: organology, sound studies, music history, and epistemology. Raising crucial methodological and epistemological questions about the study of music, this book will be relevant to scholars studying the interactions between music, culture, and technology from many disciplinary perspectives.

Sound Heritage is the first study of music in the historic house museum, featuring contributions from both music and heritage scholars and professionals in a richly interdisciplinary approach to central issues. It examines how music materials can be used to create narratives about past inhabitants and their surroundings - including aspects of social and cultural life beyond the activity of music making itself - and explores how music as sound, material, and practice can be more consistently and engagingly integrated into the curation and interpretation of historic houses. The volume is structured around a selection of thematic chapters and a series of shorter case studies, each focusing on a specific house, object or project. Key themes include: Different types of historic house, including the case of the composer or musician house; what can be learned from museums and galleries about the use of sound and music and what may not transfer to the historic house setting Musical instruments as part of a wider collection; questions of restoration and public use; and the demands of particular collection types such as sheet music Musical objects and pieces of music as storytelling components, and the use of music to affectively colour narratives or experiences. This is a pioneering study that will appeal to all those interested in the intersection between Music and Museum and Heritage Studies. It will also be of interest to scholars and researchers of Music History, Popular Music, Performance Studies and Material Culture.

Unlike their colleagues in music theory and music education, teachers of music history have tended not to commit their pedagogical ideas to print. This collection of essays seeks to help redress the balance, providing advice and guidance to those who teach a college-level music history or music appreciation course, be they a graduate student setting out on their teaching career, or a seasoned professor having to teach outside his or her speciality. Divided into four sections, the book covers the basic music history survey usually taken by music majors; music appreciation and introductory courses aimed at non-majors; special topic courses such as women and music, music for film and American music; and more general issues such as writing, using anthologies, and approaches to teaching in various situations. In addition to these specific areas, broader themes emerge across the essays. These include how to integrate social history and cultural context into music history teaching; the shift away from the 'classical canon'; and how to organize a course taking into consideration time constraints and the need to appeal to students from a diverse range of backgrounds. With contributions from both teachers approaching retirement and those at the start of their careers, this volume provides a spectrum of experience which will prove valuable to all teachers of music history.

—THE NEW YORK TIMES BOOK REVIEW Opal is a fiercely independent young woman pushing against the grain in her style and attitude, Afro-punk before that term existed. Coming of age in Detroit, she can't imagine settling for a 9-to-5 job—despite her unusual looks, Opal believes she can be a star. So when the aspiring British singer/songwriter Neville Charles discovers her at a bar's amateur night, she takes him up on his offer to make rock music together for the fledgling Rivington Records. In early seventies New York City, just as she's finding her niche as part of a flamboyant and funky creative scene, a rival band signed to her label brandishes a Confederate flag at a promotional concert. Opal's bold protest and the violence that ensues set off a chain of events that will not only change the lives of those she loves, but also be a deadly reminder that repercussions are always harsher for women, especially black women, who dare to speak their truth. Decades later, as Opal considers a 2016 reunion with Nev, music journalist S. Sunny Shelton seizes the chance to curate an oral history about her idols. Sunny thought she knew most of the stories leading up to the cult duo's most politicized chapter. But as her interviews dig deeper, a nasty new allegation from an unexpected source threatens to blow up everything. Provocative and chilling, The Final Revival of Opal & Nev features a backup chorus of unforgettable voices, a heroine the likes of which we've not seen in storytelling, and a daring structure, and introduces a bold new voice in contemporary fiction.

Church History Study Guide, Pt. 1: 1805 to 1832. This volume is the first of three on Church History and the Doctrine and Covenants. It covers Church history and the revelations in the Doctrine and Covenants from the birth of Joseph Smith in 1805 through the beginnings of the Kirtland and Missouri periods. We learn concerning the First Vision, the coming forth of the Book of Mormon, the restoration of the priesthood, and many early revelations given to individual members of the Church. We study the organization of the Church in 1830 and the migration of the Saints to Kirtland, Ohio, where the law and order of the Church is given, the law of consecration begins, and spiritual gifts are manifested. We also read concerning the early events in Missouri, where the land of Zion is dedicated for the gathering of the Saints. In all, it covers 27 years of Church History, and covers sections 1-99 of the Doctrine and Covenants and the Joseph Smith History in the Pearl of Great Price. The cover features "Young Joseph," a painting of the Prophet Joseph Smith pondering in the Sacred Grove, by Walter Rane.

Latter-Day Prophets Since 1844. This volume is the third of three on Church History and the Doctrine and Covenants. It covers Church history during the administration of all of its Prophet-Prophets since Joseph Smith. It begins with the succession of the Apostles after Joseph Smith's martyrdom, the building of the Nauvoo Temple, and the trek to the west of the Latter-day Saint pioneers. We follow them through Iowa, Winter Quarters, and on to Utah. We witness the colonization of the state of Deseret, while the rest of the country suffered from Civil War. Then we follow events through the administrations of all of the 19th-Century, 20th-Century, and 21st-Century prophets from John Taylor to Thomas S. Monson. We become familiar with the early lives, missions, marriages, and callings of each of these prophets, seeing how the Lord prepared them for the particular time that they led the Church. We finish with a look toward the future as we await the Second Coming of our Lord. The cover features a beautiful photograph of the Salt Lake Temple, taken at dusk during the Christmas season from the roof of the Joseph Smith Memorial Building.
