

## **My Pals Are Here English**

Some days, all you need is a message from a stranger. Ruby Santos knew exactly what she was getting herself into when she signed up to write a soldier overseas. The guideline was simple: one letter or email a week for the length of his or her deployment. Care packages optional. Been there, done that. She thought she knew what to expect. What she didn't expect was falling in love with the guy.

The renowned crime journalist and author of *The Misbegotten Son* turns his attention to serial killer Keith Hunter Jespersen, the "Happy Face Killer" from Oregon who strangled eight women in the 1990s, detailing his evolution from angry child to psychotic murderer. Reprint.

Singapore has few natural resources but, in a relatively short history, its economic and social development and transformation are nothing short of

remarkable. Today Singapore is by far the most successful exemplar of material development in Southeast Asia and it often finds itself the envy of development in Southeast Asia and it often finds itself the envy of developed countries. Furthermore over the last three and a half decades the ruling party has presided over the formation of a thriving community of Singaporeans who love and are proud of their country.

The new emphasis in the Singapore mathematics education is on Big Ideas (Charles, 2000). This book contains more than 15 chapters from various experts on mathematics education that describe various aspects of Big Ideas from theory to practice. It contains chapters that discuss the historical development of mathematical concepts, specific mathematical concepts in relation to Big Ideas in mathematics, the spirit of Big Ideas in mathematics education, and its enactment in the mathematics classroom. This book presents a wide spectrum of ideas related to Big Ideas in mathematics education. On the one end, we have topics that are mathematics content related, those that discuss the underlying principles of Big Ideas in mathematics, others that deepen the readers' knowledge in this area, and on the other hand there are practice oriented papers in preparing practitioners to have a clearer picture of classroom enactment related to an emphasis on Big Ideas.

"In Asia, English is no longer a foreign language but a key resource for education, government, business and the general public. Whereas thirty years ago, British and American experts believed that the best way to improve the quality of English teaching was to cancel any programs below the secondary level, Asian nations as well as European are now introducing English in primary school. But there are major obstacles to overcome: the training of enough local teachers or the hiring of English speakers, the preparation of suitable teaching materials, the development of useful tests, and the design of workable curriculums. The chapters in this book, written by leading English-teaching professionals in seven Asian countries and originally delivered at the 2010 annual conference of Asia TEFL which took place in Hanoi, Vietnam, describe and analyze national policies and how they are implemented. The coverage is wide: China with its huge number of students learning English,

Japan working to make the transition from elementary to secondary school seamless, Singapore continuing to use English as medium of instruction for its multilingual population, Korea developing English education policies to recognize the increased role of English alongside the national language, India building on its colonial past to make English an economic resource, Vietnam fitting English into a program of national rebuilding, and Taiwan spreading its English teaching outside the national capital. This is not a report of the views of outside experts, but of local experiences understood by local scholars of international standing. Policy makers, educators, researchers and scholars will be able to gain valuable insights from Asian experts"--

Cambridge Primary English is a flexible, endorsed course written specifically to support Cambridge International Examinations' curriculum framework (Stages 1-6). The resources are aimed at first language English learners, encouraging them to actively explore, use and apply their core listening, speaking, reading and writing skills through

individual, pair and group work. Engaging activities provide opportunities for differentiated learning and promote creativity and critical thinking. Lively international fiction, non-fiction and poetry texts are the basis for teaching reading and writing skills, including comprehension, grammar, punctuation, phonics, spelling and handwriting. Learners also practise their spoken English to build vocabulary and confidence through class and group discussion. Each stage contains three core components (Learner's Book, Activity Book, and Teacher's Resource Book with accompanying CD-ROM) which are fully integrated and offer a complete solution to teaching Cambridge Primary English. Also available are Phonics Workbooks A and B, providing an essential foundation in phonics skills.

English the Basics--

**Based on a thematic and communicative approach, this title makes the learning of English a fun experience. It features a systematic phonics programme that helps pupils learn to read and spell fast and accurately. It presents audio CDs that provide recordings of all reading, listening and phonics texts and word lists.**

**This book is the first dictionary of Hong Kong English. It includes only**

**words and word senses that are particular to Hong Kong English, legitimizing it as a variety in its own right. While the main focus is on contemporary language use from all domains of Hong Kong life, historical terms and references are covered as well. Entries are designed according to state of the art lexicography and show pronunciation, source language, frequency, authentic usage, and cultural conceptualizations. The dictionary also provides a brief history of Hong Kong English, a list of acronyms and abbreviations, historical place names and their current equivalents, words of Hong Kong origin now in international use, as well as further reference material. Patrick J. Cummings has taught English and science in Hong Kong for more than a decade. Hans-Georg Wolf is chair professor for development and variation of the English language at Potsdam University, Germany.**

*Collins New Primary Maths Activity Book 2A is packed with exciting activities to help build and develop the skills needed to be successful in Maths. Each page features one maths concept and introduces independent skills practise to give pupils confidence in working on their own.*

*Do you want more optimism, confidence, resilience and motivation? Then this book is for you! We currently live in a time of unprecedented challenges, uncertainty, overwhelming stress, loss of hope at times and a need for mental strength and adaptability to a new way of life. Traditional 'positive thinking', trying to constantly tell yourself that everything is OK, no matter the circumstances, just isn't enough to make any lasting difference. After 30 years working as a therapist, Paul McKenna has developed a unique approach - one that can guide you towards an all-round feeling of positivity - putting you into optimal states of mind, building up your resilience and enabling good decisions and actions that lead to successful results in life. There is now irrefutable scientific evidence that shows that particular ways of thinking and acting produce tangible positive results in people's ability to deal with challenges and their overall quality of life. The research also shows that this mindset can be learned quickly just like any habit. And that is why this book is*

*a practical psychological system in how to survive and thrive - how to discover your own natural most powerful resources for self-care, self-belief and for taking control of your life.*
