**The Third Conference on Applied Mathematics and Scientific Computing took place June 23-27, 2003 on island of Brijuni, Croatia. The main goal of the conference was to interchange ideas among applied mathematicians in the broadest sense both from and outside academia, as well as experts from other areas who apply different mathematical techniques. During the meeting there were invited and contributed talks and software presentations. Invited presentations were given by active researchers from the fields of approximation theory, numerical methods for differential equations and numerical linear algebra. These proceedings contain research and review papers by invited speakers and selected contributed papers from the fields of applied and numerical mathematics. A particular aim of the conference was to encourage young scientists to present results of their research. Traditionally, the best presentation given by PhD**

student was rewarded. This year awardee was Luka Grubisić (University of Hagen, Hagen, Germany) and we congratulate him for this achievement. It would be hard to organize the conference without generous support of the Croatian Ministry of Science and Technology and we acknowledge it. We are also indebted to the main organizer, Department of Mathematics, University of Zagreb. Motivating beautiful nature should be also mentioned. And, at the end, we are thankful to Drs. Josip Tambaca and Ivica Nakic for giving this book its final shape.
