European comic authors produced a steady stream of comic material throughout the twentieth century, but gained the world's notice in 1975 when the French magazine Metal Hurlant was founded. A new generation of artists and writers had begun. Soon publishers were producing translations of the new comics into other languages, including English, and comics creators everywhere were inspired to innovation. This is a reference work, arranged by artist or writer, to European comics from the last quarter of the twentieth century that have been translated from any European language into English. It contains a variety of material, from the innocent imperialism of Herge's Tintin to the sadistic murder for hire in Bernet's Torpedo. Albums by a single creator or artist-and-writer team of European origin are the focus; comics in periodicals and anthologies with multiple contributors are excluded. Each entry provides a plot abstract and various notes about the original comic. An author index provides brief biographical information. There is a comprehensive general index.

When his ship, Antler, becomes stranded off the coast of Morocco, Lord George Herbert is taken in for the night by the concubines of a local harem whose master is away. Herbert seizes the opportunity offered to him and spends the night taking pleasure in the eager women and convincing the nine ladies, each of a different nationality, to tell the story of her sexual history and how she came to be in the harem. In return, he tells stories of his own exploits. A Night in a Moorish Harem was banned for many years as a result of its erotic content, and throughout the early twentieth century numerous booksellers were arrested for selling it. It is now considered to be one of the classics of Victorian erotica. HarperPerennial Classics brings great works of literature to life in digital format, upholding the highest standards in ebook production and celebrating reading in all its forms. Admiral Nelson's most frequent cry was for more frigates. Though not ships of the line these fast and powerful warships were the 'eyes of the fleet'. They enabled admirals to find where the enemy lay and his likely intentions, as well as patrolling vital trade routes and providing information from far-flung colonies. Together with their smaller cousins, the sloops and brigs of the Royal Navy, they performed a vital function. Generally commanded by ambitious young men, these were the ships that could capture enemy prizes.

Horatio Hornblower and Jack Aubrey hardly surpassed some of the extraordinary deeds of derring-do and tragedy described in these pages. Originally published in two volumes, this book is a bargain for all who want the factual low-down on the Brytcreem Boys of Nelson's navy.
