I am Lakshmi Prasad, native of Bithar. I am doing PhD on a very important subject " Mating habits of gay chimpanzees in West Africa " at PANU University, the best University in India and possibly the best University in the world. My idols are " Faizal Guru " , " Janab Kasab Sahib " , " Focus Carat " , " Baba Badkar " , " Zakir Nalayak " , " Gharkha Dutt " , " Dr. Kana Ayyub " and all PhD students who had committed suicide since they failed to solve their PhD problems. I personally feel that, all deprived Indians should automatically be awarded a PhD degree coupled with a fee pension of 1 lakh rupees/month to be delivered in cash via post at door step. Till then we are going to fight for azadi from India. Imagine a day, when no PhD student would have to commit suicide, imagine a day, when no lower caste will be humiliated by upper caste, s/he can use his/her doctorate degree and force others to call him/her Dr. X. Dr. Y. etc.

* Tiger populations the world over are endangered" A unique look at individual tigers and family groups"
Written and photographed by a former government official, actress and photographer well-versed in Ranthambhore's more remote locationsRanthambhore National Park is a vast wildlife reserve in Rajasthan, northern India. It is a former royal hunting ground and home to tigers, leopards and marsh crocodiles. Its landmarks - both natural and manmade - include the imposing 10th-century Ranthambhore Fort, the Ganesh Mandir temple, and Padam Talao Lake, known for its abundance of water lilies. It is one of the world's finest places to view wildlife. The Park is also a crucial tiger habitat. As Rajasthan's former Minister for Tourism, as well as for Forests and the Environment, Bina Kak had unprecedented access to the Park. There she focused on individual tigers, tigresses, and tiger families. Unlike other photography books on the Park, this book focusses on the unique traits - or personalities - of single animals or groups, for example how a male tiger mothered his cubs when they were separated from the tigress. Her stunning photographs include views not easily accessible or are completely unavailable to other photographers, and will certainly appeal to conservationists, environmentalists, travelers, those interested in nature photography, or anyone engaged with the future of these magnificent animals.

'You are from India—the land of three hundred and thirty million Gods, and you say you don't believe in even one of them? I think it's time to go home, Sid.' Andrea's words have been echoing in my head since last night when she poured another round of scotch. I entered God in the Google search bar and of all the places, it directed me to India—a place where I had buried my childhood dream eleven years ago, and moved to New York. I waived God away when I got to New York, and, to be honest, I didn't need Him either. Until now... Life's always been a bitch but this time it's gone too far. I want my money and my company back, and I will find God one way or the other to get my answers. I've boarded the flight. Hop on!...and yes...carry some scotch along. See you on the other side. Cheers, Sid—Siddharth Khanna

A concise and accessible guide to techniques for detecting doctored and fake images in photographs and digital media. Stalin, Mao, Hitler, Mussolini, and other dictators routinely doctored photographs so that the images aligned with their messages. They erased people who were there, added people who were not, and manipulated backgrounds. They knew if they changed the visual record, they could change history. Once, altering images required hours in the darkroom; today, it can be done with a keyboard and mouse. Because photographs are so easily faked, fake photos are everywhere—supermarket tabloids, fashion magazines, political ads, and social media. How can we tell if an image is real or false? In this volume in the MIT Press Essential Knowledge series, Hany Farid offers a concise and accessible guide to techniques for detecting doctored and fake images in photographs and digital media. Farid, an expert in photo forensics, has spent two decades developing techniques for authenticating digital images. These techniques model the entire image-creation process in order to find the digital disruption introduced by manipulation of the image. Each section of the book describes a different technique for analyzing an image, beginning with those requiring minimal technical expertise and advancing to those at intermediate and higher levels. There are techniques for, among other things, reverse image searches, metadata analysis, finding image imperfections introduced by JPEG compression, image cloning, tracing pixel patterns, and detecting images that are computer generated. In each section, Farid describes the techniques, explains when they should be applied, and offers examples of image analysis.

I don't write about my experiences with depression to defend the legitimacy of my pain. My pain is real; it does not come to me because of my lifestyle, and it is not taken away by my lifestyle. Unwittingly known as Alia Bhatt's older sister, screenwriter and fame-child Shaheen Bhatt has been a powerhouse of quiet restraint-until recently. In a sweeping act of courage, she now invites you into her head. Shaheen was diagnosed with depression at eighteen, after five years of already living with it. In this emotionally arresting memoir, she reveals both the daily experiences and big picture of one of the most debilitating and critically misinterpreted mental illnesses in the twenty-first century. Equal parts conundrum and enlightenment, Shaheen takes us through the personal pendulum of understanding and living with depression in her life to gently provide solace and solidarity.

In his career as a civil servant, N.K. Singh held several key positions in the ministry of commerce and industry of his home cadre and the finance ministry at the centre. As additional secretary (economic affairs), expenditure secretary, revenue secretary, secretary to the prime minister and later as member, Planning Commission, N.K. Singh navigated the system to help steer India's economic liberalization from 1991 to 2004. In his weekly column 'From the Ringside' written for the Indian Express, Singh dissects, explicates and critiques the infrastructure, centre-state relations, the opening up of the insurance sector, petroleum prices and their regulation and changing global perspectives on India, among other topics. The Politics of Change draws on N.K. Singh's experience to give the reader a window into India's politics and economy, providing incisive insights into the realities of coalition politics and international fault lines. The analyses help understand why some initiatives have succeeded in transforming the economic landscape while other bills, schemes and initiatives which were launched with good intentions have either foundered because of the party in opposition or eventually emerged with scars after years of tussle. The book also highlights the challenges that India must face as its institutions evolve to keep pace with the task of governing and supporting the rapidly changing economic and social landscape. In many ways, The Politics of Change demystifies the riddles of India's economic development prospects and highlights the elephant's efforts to alter its gait.

Wybe Kullert has written an account of Japanese cherries that spans disciplines as far ranging as history, geography, botany, and, of course, horticulture. Confusion and misunderstandings, particularly regarding the names of the plants, have hampered their appreciation in the West. Fluent in Japanese and a professor of landscape architecture at the Kyoto University of Art and Design, Wybe Kullert consulted many sources, both ancient and modern, to recall what he saw when he was in Japan. This book will become an indispensable resource for sorting out incorrect and improper plant names that have stymied nurseries, collectors, and amateur gardeners. Full and complete information is also provided for the cultivation and propagation of cherries. A complete botanical key to the classification of Japanese cherries has been contributed by Dutch plant breeder Aric Peterse.

A MEMOIR BY THE YOUNGEST RECIPIENT OF THE NOBEL PEACE PRIZE As seen on Netflix with David Letterman "I come from a country that was created at midnight. When I almost died it was just after midday." When the Taliban took control of the Swat Valley in Pakistan, one girl spoke out. Malala Yousafzai refused to be silenced and fought for her right to an education. On Tuesday, October 9, 2012, when she was fifteen, she almost paid the ultimate price. She was shot in the head at point-blank range while riding the bus home from school, and few expected her to survive. Instead, Malala's miraculous recovery has taken her on an extraordinary journey from a remote valley in northern Pakistan to the halls of the United Nations in New York. At sixteen, she became a global symbol of peaceful protest and the youngest nominee ever for the Nobel Peace Prize. I AM MALALA is the remarkable tale of a family uprooted by global terrorism, of the fight for girls' education, of a father who, himself a school owner, championed and encouraged his daughter to write and attend school, and of brave parents who have a fierce love for their daughter in a society that prizes sons. I AM MALALA will make you believe in the power of one person's voice to inspire change in the world.

The greatest run-scorer in the history of cricket, Sachin Tendulkar retired in 2013 after an astonishing 24 years at the top. The most celebrated Indian cricketer of all time, he received the Bharat Ratna Award - India's highest civilian honour - on the day of his retirement. Now Sachin Tendulkar tells his own remarkable story - from his first Test cap at the age of 16 to his 100th international century - and the emotional final farewell that brought his country to a standstill. When a boisterous Mumbai youngster's excess energies were channelled into cricket, the result was record-breaking schoolboy batting exploits that launched the career of a cricketing phenomenon. Before long Sachin Tendulkar was the cornerstone of India's batting line-up, his every move watched by a cricket-mad nation's devoted followers. Never has a cricketer been burdened with so many expectations; never has a cricketer performed at such a high level for so long and with such style - scoring more runs and making more centuries than any other player, in both Tests and one-day games. And perhaps only one cricketer could have brought together a shocked nation by defiantly scoring a Test century shortly after terrorist attacks rocked Mumbai. His many achievements with India include winning the World Cup and topping the world Test rankings. Yet he has also known his fair share of frustration and failure - from injuries and early World Cup exits to stinging criticism from the press, especially during his unhappy tenure as captain. Despite his celebrity status, Sachin Tendulkar has always remained a very private man, devoted to his family and his country. Now, for the first time, he provides a fascinating insight into his personal life and gives a frank and revealing account of a sporting life like no other.

The brine shrimp Artemia has become an important experimental system for studies of the developmental process. In recent years the shrimp has yielded considerable information on the pattern of development, bio chemistry, and gene structure and expression of crustaceans.

This book is a compilation of research activity from twenty five of the most active re search laboratories working with brine shrimp in the above areas. It also represents the proceedings of a NATO Advanced Research Workshop held in Montreal, Canada, August 11-13, 1988. The book contains twenty nine full papers covering the major areas discussed at the workshop. In addition, one page abstracts representing seventeen poster presentations which were given at the workshop, and which were deemed to be most relevant to the theme of the book, are included. These are designated with an [a] in the Table of Contents following the title of each paper. A considerable amount of discussion which took place during the workshop has not been included in the book because of space limitations. However, the editors will endeavour to make some of this in formation available at a later date through the Artemia Newsletter. In addition to the high percentage of invited speakers who attended and contributed to the workshop, the organizers would like to thank a number of participants who made valuable contributions to the major dis cussion sessions. These include: John Freeman, Michael Horst, Herman Siegers, Jack Vaughn, Frank Conte, Sandy McLennan, Clive Trotman and Patrick Sorgeloos.
