

## Namibia Job Vacancies

***Diamond Warriors in Colonial Namibia enters into unchartered scholarly territory of illegal diamond smuggling at the largest diamond mining company in colonial Namibia—De Beers’ Consolidated Diamond Mines of South West Africa (CDM). It details the underground activities of the natives (migrant workers) employed by the CDM and how these illicit activities accounted for rapid development in Owamboland. Beyond this account, the book takes on the deterministic “natural resource curse” theory that equates natural resource endowments to a curse resulting in underdevelopment and sometimes conflict. It is argued and proven herein, from a decolonial standpoint, that such an approach is an oversimplification of the political economy of natural resources in Africa in general and Namibia in particular. The text also provides a contextual account of the contract labour system and details the symbiotic relationship between CDM and the colonial state before highlighting the remaining unanswered questions and areas of further research***

***This comprehensive eBook will help you land your dream job in the international development sector. It will introduce you to the complex world of international organizations and it will guide you through all the stages of their selection processes. If you are looking for information on how to kick-start your career with an international organization, you have come to the right place! Working for an organization in the field of international development is a dream for many professionals across the globe, since the opportunities offered often combine good remuneration and a wide range of benefits with meaningful work. As you go through the chapters of this eBook, you will be able to tell that the field of international development has work opportunities for professionals coming from very diverse academic backgrounds, therefore, the chances of you finding a vacancy that suits your profile are very high! Nonetheless, it is important that you know that selection processes to integrate the team of international organizations tend to be quite competitive and, for this reason, a strong preparation is key for those who want to succeed. Our team is certain that you want to be amongst the successful candidates and this is exactly why OpenIGO Network has put this eBook together: to help you land the job of your dreams. As we move on through the different stages of the application process, this manual will offer you preparation tips as well as detailed explanations and guidance for each stage – it will introduce you to International Development; it will show you the different opportunities with different types of organizations, give you insight on where to look for vacancies and will also get you ready for competency-based interviews. This manual was written and revised by a team of Ph.D. professors, human resources specialists and intergovernmental organization staff with a great deal of diligence.***

***The book focuses on the history and identity of Namibian Czechs, originally a group of prominent child war refugees admitted by the Czechoslovak government in 1985 for education as an expression of international solidarity assistance to SWAPO liberation movement. The educational project with elements of social engineering was interrupted in 1991 due to political changes in both countries. The relocation of the children to Namibia had a dramatic impact on their future lives. Namibian Czechs never fully integrated into Namibian society, moreover they proudly proclaim their belonging to Czechness.***

A series of reviews of mental health and work policies in selected OECD countries revealed the challenge of mental health for social and labour market outcomes and policies and the high costs of the continued stigmatisation of mental health for individuals, employers and societies. To better respond to this challenge, in early 2016 health and employment ministers from the 38 OECD countries endorsed a Recommendation of the Council on Integrated Mental Health, Skills, and Work Policy.

This book assesses the influence of the international organization UNESCO on the development of national Technical and Vocational Education and Training (TVET) systems in the Southern African Community Region (SADC), focusing particularly on Botswana and Namibia. Designed around UNESCO’s Better Education for Africa’s Rise (BEAR) project, the study is an excellent example of applied policy research. Analysis is from the perspective of key stakeholders including UNESCO headquarters and field offices, Ministries of Education and of Labor, employers and employees, education and training institutions, international partners and more. Both qualitative and quantitative evidence are used to provide a comparative overview, and the author also reveals the current state of data on skills. Readers will discover common goals and challenges across the nations but also a common lack of action to measure the impact and influence that UNESCO’s programs have had at a national level, prior to this study. Were the newly implemented educational policies successful or not? If the public policies failed, why was that? These chapters shed light on such questions and how UNESCO’s contribution influenced the national development processes, in the context of globalization processes and trends of global mass education. The book has much to offer for both scholars and those working in UN agencies or national governments who seek to develop education systems and better link them to the world of work.

This paper reports economic developments in Namibia during the 1990s. Since the early 1990s, average GDP growth has been higher than in the previous decade, owing to the opening of two new diamond mines, the extension of the limits of Namibia’s coastal waters, and the rapid growth in government services. Real GDP grew by more than 5 percent in 1991/92, contracted by 2 percent in 1993, and expanded by 7 percent in 1994 and 5 percent in 1995. The allocation of domestic expenditure fluctuated during 1990/95.

Readings on Namibia’s History and Society : Selected Papers and Proceedings of the International Conference on ‘Namibia 1884-1984: 100 Years of Foreign Occupation ; 100 Years of Struggle’, London 10-13 September, 1984. Organised by the Namibia Support Committee in Co-operation with the SWAPO Department of Information and Publicity

*1 Aim of the conference*

*This first edition explores the dynamics of growth, jobs, and inequalities. It proposes ten decisive actions to promote sustainable economic and social development and to strengthen institutions in Africa.*

*This report reviews economic development of Namibia in the recent years after the global crisis. The country bounced back very well after the crisis. Namibia exhibited strong performance in the primary sectors, which has led to remarkable growth in the second half of 2012. The government has launched a three-year fiscal initiative to enhance job opportunities and preserve fiscal and external sustainability. Plans have been identified to strengthen banks, control mortgages, and improve the education system. The Executive Board has appreciated Namibia’s strong macroeconomic performance.*

*The Kenya Gazette is an official publication of the government of the Republic of Kenya. It contains notices of new legislation, notices required to be published by law or policy as well as other announcements that are published for general public information. It is published every week, usually on Friday, with occasional releases of special or supplementary editions within the week.*

*A one-volume library of essential and comprehensive data on all the countries of sub-Saharan Africa, including essays on regional issues, statistical surveys and directories of invaluable contact names and addresses*

*Affirmative Action is one of the most controversial issues of our times. Proponents on both sides of the issue claim clear-cut evidence for the rightness of their arguments, yet evidence is hazy at best. This new guide to the literature presents hundreds descriptions of books, reports and articles dealing with all aspects of affirmative action including: race relations; economic aspects, reverse discrimination; preferences; affirmative action programs; public opinion; court decisions; education, and many more. Complete title, author and subject indexes are provided.*

**Book provides guidelines for young job seekers on how to approach a career, and on opportunities available to them.**

**This volume comprises papers presented at the 8th international conference “The Economies of the Balkan and Eastern European Countries in the Changing World” (EBEEC) held in Split, Croatia in 2016. The papers cover a wide range of current issues relevant for the whole of Eastern Europe, such as European integration, economic growth, labour markets, education and tourism. Written by experienced researchers in the field of economic challenges for Eastern Europe, the papers not only analyse recent problems, but also offer policies to resolve them. Furthermore, they offer insights into the theoretical and empirical foundations of the economic processes described. The proceedings of the conference appeals to all those interested in the further economic development of the Balkan and Eastern European countries.**

**This analysis identifies tasks that a qualified heavy duty equipment mechanic is called upon to perform in Canada. The equipment is typically found in the fields of construction, transportation, natural resources, and materials handling. The analysis identifies tasks and sub-tasks performed by such a mechanic, arranged in blocks of distinct operations relevant to that occupation. These blocks include workplace safety, work practices and procedures, and tasks related to internal combustion engines, power trains, electrical and electronic systems, hydraulic and hydrostatic drive systems, pneumatics, steering systems, suspension and braking systems, frames, chassis, wheels and tracks, attachments, and ground-engaging and working tools. For each task, the document outlines the element of skill and knowledge needed to perform the task adequately, identifies any shifts or changes in technology that affect the task, lists tools and equipment required for the task, and provides an indication of whether the task has been validated by each province and territory. The appendix includes a list of tools and equipment used in the occupation, and a tabulation of the percentage of time a worker spends performing each block and task in a given year (by province/territory and for Canada as a whole).**

**Support to Independent Namibia**

**General Labour History of Africa**

**Namibia**

**AF Press Clips**

**Southern Africa Report**

**Final Report of Analysis**

The first comprehensive and authoritative history of work and labour in Africa; a key text for all working on African Studies and Labour History worldwide.

Since Gemmology was first published, thousands of readers have used it to gain an in-depth appreciation of the science of gemmology, its history and practice. This third edition has been completely revised to cover the latest methods of gem enhancement and identification, as well as the most up to date test instruments and laboratory techniques. It includes details of the Gemmological Associations recently introduced Foundation course, and even provides sample examination questions. \* Contains essential information for the Gem-A exams \* Fully updated to cover recent advances and instruments \* An invaluable resource for gemmologists worldwide

An Annotated Bibliography

Conference Report, Harare, Zimbabwe, April 1-5, 1989

*This guide is written to inspire and motivate those settled into a job or career into taking an extended break to achieve some goal or ambition.*

*The Southern African Customs Union (SACU) is the oldest customs union in the world, with significant opportunities ahead for creating higher economic growth and increased welfare benefits to the people of the region, by fulfilling its vision to become an economic community with a common market and monetary union. This volume describes policy options to address the barriers to equitable and sustainable development in the region and outlines a plan for deeper regional integration.*

*Why the future of work requires the deconstruction of jobs and the reconstruction of work. Work is traditionally understood as a “job,” and workers as “jobholders.” Jobs are structured by titles, hierarchies, and qualifications. In Work without Jobs, Ravin Jesuthasan and John Boudreau propose a radically new way of looking at work. They describe a new “work operating system” that deconstructs jobs into their component parts and reconstructs these components into more optimal combinations that reflect the skills and abilities of individual workers. In a new normal of rapidly accelerating automation, demands for organizational agility, efforts to increase diversity, and the emergence of alternative work arrangements, the old system based on jobs and jobholders is cumbersome and ungainly. Jesuthasan and Boudreau’s new system lays out a roadmap for the future of work. Work without Jobs presents real-world cases that show how leading organizations are embracing work deconstruction and reinvention. For example, when a robot, chatbot, or artificial intelligence takes over parts of a job while a human worker continues to do other parts, what is the “job?” DHL found some answers when it deployed social robotics at its distribution centers. Meanwhile, the biotechnology company Genentech deconstructed jobs to increase flexibility, worker engagement, and retention. Other organizations achieved agility with internal talent marketplaces, worker exchanges, freelancers, crowdsourcing, and partnerships. It’s time for organizations to reboot their work operating system, and Work without Jobs offers an essential guide for doing so.*
