Public Crisis Management is an inter-organizational primer. In detail, it describes the strengths and limitations of organizations that work together to resolve some of mankind's worst shared dilemmas. Wildland firefighting, emergency and disaster management, and public safety networks are studied to uncover what each network form does

well and not so well. Those networks are also used to provide a general management framework that other crisis management networks will find useful. The book's five principles identify "ingredients" necessary to form and maintain relationships of multiple organizations in pursuit of public health, safety, and security. Public Crisis Management is useful for both the academic and practitioner communities as so many key business, government, and international decisions rest on the cooperation and coordination of more than one organization to resolve modern problems.

The National Wildfire Coordinating Group provides national

leadership to enable interoperable wildland fire operations among federal, state, local, tribal, and territorial partners. Primary objectives include: Establish national interagency wildland fire operations standards; Recognize that the decision to adopt standards is made independently by the NWCG members and communicated through their respective directives systems; Establish wildland fire position standards, qualifications requirements, and performance support capabilities (e.g. training courses, job aids) that enable implementation of NWCG standards; Support the National Cohesive Wildland Fire Management Strategy goals: to restore and maintain resilient landscapes; create fire adapted communities; and respond to wildfires safely and effectively; Establish information technology (IT) capability requirements for wildland fire; and Ensure that all NWCG activities contribute to safe, effective, and coordinated national interagency wildland fire operations. The "NWCG Standards for Interagency Incident Business Management" assists participating agencies of the NWCG to constructively work together to provide effective execution of each agency's incident business management program by establishing procedures for: - Uniform application of regulations on the use of human resources, including classification, payroll, commissary, injury compensation, and travel. - Acquisition of necessary equipment and supplies from appropriate sources in accordance with applicable procurement regulations. - Management and tracking of government property. - Financial coordination with the jurisdictional agency and maintenance of finance, property, procurement, and personnel records, and forms. - Use and coordination of incident business management functions as they relate to sharing of resources among federal, state, and local agencies, including the military. - Documentation and reporting of claims. - Documentation of costs and cost management practices. - Administrative processes for all-hazards incidents.

With this book you will gain insight into the crucial part of the exam- the interview. While it is important for a candidate to focus on the written and physical ability parts of the exam, the interview often accounts for up to 100% of a candidate's overall score. Lepore has proctored hundreds of entry-level and promotional interviews. He shares his unique ability to see the interview through the eyes of the rater. This book is presented in a question-answer format. It provides the candidate with a strong foundation on how to answer over 100 of the questions most commonly asked by fire departments across the country, and provides the rationale as to why the answer is correct. Answers to common situational questions deal with: moral issues, legal issues, violations of policies and procedures, ethical dilemmas, societal obligations, interpersonal conflicts. This updated book includes additional questions and answers.

Provides information on the salary and employment outlook for 135 careers which do not require a college degree.

Emergency Response Guidebook

In his first book, William Mora, a 30-year fire service veteran and firefighter safety advocate, discusses how to prevent traumatic structural firefighter fatalities. Firefighter disorientation can be defined as "the loss of direction due to the lack of vision in a structure fire." To combat this problem, Mora outlines a multipronged approach to effectively address the components that contribute to disorientation and structural firefighter fatalities. This text includes many case studies and guidelines for size-up factors and is an important resource for all firefighters.

A totalitarian regime has ordered all books to be destroyed, but one of the book burners suddenly realizes their merit.

The Wildland Fire Incident Management Field Guide is a revision of what used to be called the Fireline Handbook, PMS 410-1. This guide has been renamed because, over time, the original purpose of the Fireline Handbook had been replaced by the Incident Response Pocket Guide, PMS 461. As a result, this new guide is aimed at a different audience, and it was felt a new name was in order.
