This book is intended for junior and senior undergraduate students, and master level students in human resources, risk management and insurance, industrial relations or public policy. The subject of the book is non-wage benefits paid to workers. Hence, it excludes discussion of needs-based programs such as welfare, food stamps, Supplementary Security Income, and Medicaid. It includes benefits mandated by the government including the major social insurance programs: workers' compensation, unemployment insurance and Social Security benefits. It also includes those benefits voluntarily provided by firms including: group medical care, disability benefits, paid sick time, pension benefits, life insurance, and assorted other fringe benefits. The book is divided into three parts. Part I (chapters 1 through 6) briefly introduces these programs and discusses some of the insurance and economic concepts that are useful in both evaluating the current programs, and in understanding what changes might mean for future costs and benefits. The next two parts of the book deal respectively with social insurance programs (Part II, chapters 7-10), and other employer provided benefits (Part III, chapters 11-16). Throughout, private sector human resource practice and public sector human resource policy is linked to various "ben-fit" models: the human capital model, the passive participant model, the insurance' model, the managed care model, and the integrated health benefits model.

"Whether left, right, liberal, conservative or independent what actually rules the United States of America? If impaired find the four letter word in the dictionary that controls everything." Imagine that you are employed by your insurer. Imagine that your employer is the biggest insurance provider in the country. Now imagine what might happen if you were seriously injured, even disabled, during your time of employment, and your dual employer/insurer wanted to get rid of you as a "liability." Welcome to the world of Jeffery Alan Williamson, who dealt with an intracranial hemorrhage, ongoing seizures, a stroke, a craniotomy, comas, rehabilitation, and reoccurring seizures and impairments over a ten-year period of time. Throughout that time, his employer/insurer, the American National Insurance Company, behaved in ways so unethically that Williamson was compelled to represent himself pro se in a disability discrimination lawsuit against them for their illegal and unjust actions against him during and after his time as an employee with the company. Representing himself in civil and federal court despite what he suffered is Williamson's motivation for writing this book. He hopes to motivate society and to help readers realize just how capable they are.

Many Americans believe that people who lack health insurance somehow get the care they really need. Care Without Coverage examines the real consequences for adults who lack health insurance. The study presents findings in the areas of prevention and screening, cancer, chronic illness, hospital--based care, and general health status. The committee looked at the consequences of being uninsured for people suffering from cancer, diabetes, HIV infection and AIDS, heart and kidney disease, mental illness, traumatic injuries, and heart attacks. It focused on the roughly 30 million -- one in seven--working--age Americans without health insurance. This group does not include the population over 65 that is covered by Medicare or the nearly 10 million children who are uninsured in this country. The main findings of the report are that working-age Americans without health insurance are more likely to receive too little medical care and receive it too late; be sicker and die sooner; and receive poorer care when they are in the hospital, even for acute situations like a motor vehicle crash.
