This book "takes a close look at misused and misapplied basic analysis methods and shows how some of the most popular "risk management" methods are no better than astrology! Using examples from the 2008 credit crisis, natural disasters, outsourcing to China, engineering disasters, and more, Hubbard reveals critical flaws in risk management methods—and shows how all of these problems can be fixed. The solutions involve combinations of scientifically proven and frequently used methods from nuclear power, exploratory oil, and other areas of business and government. Finally,

NEBOSH. Ed Ferrett is former Vice Chairman of NEBOSH (1999-2008) and a lecturer on NEBOSH courses with both public and private course providers. He is a Chartered Engineer and Health and Safety Consultant. Highly illustrated and easy to read, this text covers the specific challenges faced by the construction industry as well as the basics of occupational safety and health in general. It includes checklists, report forms, and record sheets.
