

*Local Theories of Argument*

*Principles of Semantic Networks*

*Argument as Dialogic Across Difference*

*Complex-Valued Neural Networks with Multi-Valued Neurons*

Elements of Argument combines a thorough argument text on critical thinking, reading, writing, and research with an extensive reader on both current and timeless controversial issues. It presents everything students need to analyze, research, and write arguments. Elements of Argument covers Toulmin, Aristotelian, and Rogerian models of argument and has been thoroughly updated with current selections students will want to read. It now includes additional support for academic writing, making it a truly flexible classroom resource. An electronic edition is available at half the price of the print book. Read the preface.
