Wise and illuminating, Rouse Up O Young Men of the New Age! is a masterpiece from one of the world’s finest writers, Kenzaburo Oe -- winner of the Nobel Prize for Literature. K is a famous writer living in Tokyo with his wife and three children, one of whom is mentally disabled. K’s wife confronts him with the information that this child, Eeyore, has been doing disturbing things -- behaving aggressively, asserting that he’s dead, even brandishing a knife at his mother -- and K, given to retreating from reality into abstraction, looks for answers in his lifelong love of William Blake’s poetry. As K struggles to understand his family and assess his responsibilities within it, he must also reevaluate himself -- his relationship with his own father, the political stances he has taken, the duty of artists and writers in society. A remarkable portrait of the inexpressible bond between this father and his damaged son, Rouse Up O Young Men of the New Age! is the work of an unparalleled writer at his sparkling best.

Here, Drunvalo Melchizedek presents in text and graphics the first half of the Flower of Life workshop, illuminating the mysteries of how we came to be, why the world is the way it is and the subtle energies that allow our awareness to blossom into its true beauty. Sacred Geometry is the form beneath our being and points to a divine order in our reality.We can follow that order from the invisible atom to the infinite stars, finding ourselves at each step. The information here is one path, but between the lines and drawings lie the feminine gems of intuitive understanding. You may see them sparkle around some of these provocative ideas: Explore the miracle of our existence by meandering through the wonderland of geometry, science, ancient history and new discovery, seen through the widened vision of Drunvalo and the Flower of Life.

She also considers the differences and similarities between the New Age and Neopagan movements, the relationship between these two practices and other religions in America, particularly Christianity. Covering such topics as healing, gender and sexuality, millennialism, and ritual experience, she offers a sympathetic yet critical treatment of religious practices often marginalized yet book is a rich analysis of these spiritual worlds and social networks and questions why these faiths are flourishing at this point in American history.

Mathewson, one of the towering figures in baseball history, won 373 games in 17 seasons, all but one of those victories for the New York Giants. After his playing career, he was a manager, army officer and baseball executive, played a role in the unraveling of the Black Sox, and against tuberculosis. A man with a keen sense of honor and responsibility for both private and public obligations, he was adored by the public as a real-life Frank Merriwell. In the decades since his death, the perception of Mathewson has changed remarkably little. This biography life on and off the baseball field, and draws from sources, old and new, to let Mathewson’s life speak for itself. Not many sports figures can withstand such scrutiny.

Claiming Sacred Ground Pilgrims and Politics at Glastonbury and Sedona Adrian J. Ivakhiv A study of people and politics at two New Age spiritual sites. In this richly textured account, Adrian Ivakhiv focuses on the activities of pilgrim-migrants to Glastonbury, England and Sedona, Arizona. He discusses their efforts to encounter and experience the spirit or energy of the land and to mark out its significance by investing it with sacred meanings. Their endeavors are presented against a broad canvas of cultural and environmental struggles associated with the incorporation of such geographically marginal places into an expanding global cultural economy. Ivakhiv sees these contested and "heterotopic" landscapes as the nexus of a complex web of interests and longings: from millennial anxieties and nostalgic re-imaginings of history and prehistory; to real-estate power grabs; contending religious visions; and the free play of ideas from science, pseudo-science, and popular culture.

Looming over all this is the nonhuman life of these landscapes, an"otherness" that alternately reveals and conceals itself behind a pagenant of beliefs, images, and place-myths. A significant contribution to scholarship on alternative spirituality, sacred space, and the politics of natural landscapes, Claiming Sacred Ground will interest scholars and students of environmental and cultural studies, and the sociology of religious movements and pilgrimage. Non-specialist readers will be stimulated by the cultural, ecological, and spiritual dimensions of extraordinary natural landscapes. Adrian Ivakhiv teaches in the Faculty of Environmental Studies at York University in Toronto, and is President of the Environmental Studies Association of Canada. How will the world end? Doomsday ideas in Western history have been both persistent and adaptable, peaking at various times, including in modern America. Public opinion polls indicate that a substantial number of Americans look for the return of Christ or some catastrophic event. The views expressed in these polls have been reinforced by the market process. Whether through purchasing paperbacks or watching television programs, millions of Americans have expressed an interest in end-time events. Americans have a tremendous appetite for prophecy, more than nearly any other people in the modern world. Why do Americans love doomsday?In

Apocalyptic Fever, Richard Kyle attempts to answer this question, showing how dispensational premillennialism has been the driving force behind doomsday ideas. Yet while several chapters are devoted to this topic, this book covers much more. It surveys end-time views in modern America from a wide range of perspectives--dispensationalism, Catholicism, science, fringe religions, the occult, fiction, the year 2000, Islam, politics, the Mayan calendar, and more.

Old Age in the New Age

E. H. Gombrich’s Little History of the World, though written in 1935, has become one of the treasures of historical writing since its first publication in English in 2005. The Yale edition alone has now sold over half a million copies, and the book is available worldwide in almost thirty languages. Gombrich was of course the best-known art historian of his time, and his text suggests illustrations on every page. This illustrated edition of the Little History brings together the pellucid humanity of his narrative with the images that may well have been in his mind’s eye as he wrote the book. The two hundred illustrations—most of them in full color—are not simple embellishments, though they are beautiful. They emerge from the text, enrich the author’s intention, and deepen the pleasure of reading this remarkable work. For this edition the text is reset in a spacious format, flowing around illustrations that range from paintings to line drawings, emblems, motifs, and symbols. The book incorporates freshly drawn maps, a revised preface, and a new index. Blending high-grade design, fine paper, and classic binding, this is both a sumptuous gift book and an enhanced edition of a timeless account of human history.

An all-encompassing guide to skeptical thinking from podcast host and academic neurologist at Yale University School of Medicine Steven Novella and his SGU co-hosts, which Richard Wiseman calls “the perfect primer for anyone who wants to separate fact from fiction." It is intimidating to realize that we live in a world overflowing with misinformation, bias, myths, deception, and flawed knowledge. There really are no ultimate authority figures-no one has the secret, and there is no place to look up the definitive answers to our questions (not even Google). Luckily, The Skeptic’s Guide to the Universe is your map through this maze of modern life. Here Dr. Steven Novella-along with Bob Novella, Cara Santa Maria, Jay Novella, and Evan Bernstein-will explain the tenets of skeptical thinking and debunk some of the biggest scientific myths, fallacies, and conspiracy theories-from anti-vaccines to homeopathy, UFO sightings to N- rays. You’ll learn the difference between science and pseudoscience, essential critical thinking skills, ways to discuss conspiracy theories with that crazy co-worker of yours, and how to combat sloppy reasoning, bad arguments, and superstitious thinking. So are you ready to join them on an epic scientific quest, one that has taken us from huddling in dark caves to setting foot on the moon? (Yes, we really did that.) DON’T PANIC! With The Skeptic’s Guide to the Universe, we can do this together. "Thorough, informative, and enlightening, The Skeptic’s Guide to the Universe inoculates you against the frailties and shortcomings of human cognition. If this book does not become required reading for us all, we may well see modern civilization unravel before our eyes." -- Neil deGrasse Tyson "In this age of real and fake information, your ability to reason, to think in scientifically skeptical fashion, is the most important skill you can have. Read The Skeptics’ Guide Universe; get better at reasoning. And if this claim about the importance of reason is wrong, The Skeptics’ Guide will help you figure that out, too." -- Bill Nye

The Aeneid

Aeneas appears in The Illiad in vague snatches and starts as a traveling warrior of great piety who was loosely connected to the foundation of Rome. Virgil weaves these fragments into a powerful myth about the founding of Rome in The Aeneid. Aeneas travels from his native Troy to Italy then wages victorious war upon the Latins.

Three Men in a Boat (To Say Nothing of the Dog), published in 1889, is a humorous account by Jerome K. Jerome of a boating holiday on the Thames between Kingston and Oxford.The book was initially intended to be a serious travel guide, with accounts of local history along the route, but the humorous elements took over to the point where the serious and somewhat sentimental passages seem a distraction to the comic novel. One of the most praised things about Three Men in a Boat is how undated it appears to modern readers, the jokes seem fresh and witty even today.The three men are based on Jerome himself (the narrator J.) and two real-life friends, George Wingrave (who went on to become a senior manager in Barclays Bank) and Carl Hentschel (the founder of a London printing business, called Harris in the book), with whom he often took boating trips. The dog, Montmorency, is entirely fictional, but "as Jerome admits, developed out of that area of inner consciousness which, in all Englishmen, contains an element of the dog." The trip is a typical boating holiday of the time in a Thames camping skiff. This is just after commercial boat traffic on the Upper Thames had died out, replaced by the 1880s craze for boating as a leisure activity.

This fast-paced and delightfully witty book takes on every sacred cow that ever titillated New Age fancy. Early-20th-century seer Edgar Cayce is scrutinized, along with such present-day prophets as Marianne Williamson and Dr. Deepak Chopra. Old Age, Stone writes, might be catalyzed by the biological terrorists known as hormones -- but even those can be brought to their knees by diligent New Age practices and strong doses of chutzpa.
