A landmark book by marine biologist Wallace J. Nichols on the remarkable effects of water on our health and well-being. Why are we drawn to the ocean each summer? Why does being near water set our minds and bodies at ease? In BLUE MIND, Wallace J. Nichols revolutionizes how we think about these questions, revealing the remarkable truth about the benefits of being in, on, under, or simply near water. Combining cutting-edge neuroscience with compelling personal stories from top athletes, leading scientists, military veterans, and gifted artists, he shows how proximity to water can improve performance, increase calm, diminish anxiety, and increase professional success. BLUE MIND not only illustrates the crucial importance of our connection to water-it provides a paradigm shifting "blueprint" for a better life on this Blue Marble we call home.

In its first 40 years, from conception to maturity, through stages of growth both painful and pleasurable, Downstage - New Zealand's first and longest running regional professional theatre company - has lived an extraordinary life. This large and lavishly illustrated 'biography' is published to celebrate Downstage's birthday. It covers all the drama and larger-than-life personalities that have characterised Downstage's life, and the many great productions such as Colin McColl's internationally acclaimed relocation of Ibsen's Hedda Gabler to Karori. A major contribution to New Zealand's cultural history.

At the beginning of the twenty-first century, key public health issues and challenges have taken

centre stage. They range from arsenic in drinking water to asthma among children and adults; from the re-emergence of cholera, to increasing cancer rates and other chronic diseases; from AIDS to malaria and hepatitis; from the crises faced by displaced or refugee populations to the new challenges that have emerged for reproductive health and rights. Like most aspects of contemporary life, these problems have been impacted by globalization. The issues that confront us are being shaped by evolving processes such as the growth of inequalities between the rich and the poor in countries around the world, the globalization of trade and commerce, new patterns of travel and migration, as well as a reduction in resources for the development and sustainability of public health infrastructures. The Routledge Handbook of Global Public Health explores this context and addresses both the emerging issues and conceptualizations of the notion of global health, along with expanding upon and highlighting the critical priorities in this rapidly evolving field. It is organized in ten main sections. The topics covered include: The transition from international to global health Structural inequalities and global public health Ecological transformation and environmental health in the global system Population and reproductive health Conflict, violence and emergencies in global public health Global public health policy and practice Global public health and development Global mental health Global access to essential medicines Health systems, health capacity, and the politics of global public health This comprehensive handbook will provide an authoritative overview for students, practitioners, researchers, and policy makers working in or concerned with public health around the globe.

While many nations are still struggling from the global financial crisis and regaining their financial security, investors are considering alternative options for investing their money; and the secure financial sector is China appears as a viable option. International Cross-Listing of Chinese Firms examines the successful techniques and strategies that Chinese companies are using within their financial practices. It highlights the foreign-based multinational enterprise theories related to the major international stock markets. By providing the latest theories and research, this book will be beneficial for business practitioners, researchers, and managers interested in the relationship between cross-listing and firm valuation

of Chinese firms.

In this monograph, Anatoliy V. Kharkhurin presents the results of his empirical investigation into the impact of multilingual practice on an individual's creative potential. Until now, the relationship between these two activities has received little attention in the academic community. The book makes an attempt to resuscitate this theme and provides a solid theoretical framework supported by contemporary empirical research conducted in a variety of geographic, linguistic, and sociocultural locations. This study demonstrates that several factors - such as the multilinguals' age of language acquisition, proficiency in these languages and experience with cultural settings in which these languages were acquired - have a positive impact on selective attention and language mediated concept activation mechanisms. Together, these facilitate generative and innovative capacities of creative thinking. This book will be of great interest not only to scholars in the fields of multilingualism and creativity, but also to educators and

all those interested in enhancing foreign language learning and fostering creativity.

There are currently more than 3600 IB World Schools and this number is growing annually. The IB World Schools Yearbook is the official guide to schools authorised to offer the International Baccalaureate Primary Years, Middle Years Diploma and Programmes. It tells you where the schools are and what they offer, and provides up-to-date information about the IB programmes and the International Baccalaureate. This is an ideal reference for schools administration, parents and education ministries worldwide as it: provides a comprehensive reference of IB World Schools for quick and easy access raises the profile of schools within the IB World School community, and beyond reinforces a sense of belonging to the IB World School community

This book addresses three important facets of China's modern development. First is the ongoing modernization of the People's Liberation Army Navy (PLAN). The Chinese navy has grown from a relatively small, backward force in the 1980s into a capable twenty-first century maritime power. The PLAN now deploys around the world and includes nuclear-powered submarines, the first of several aircraft carriers, modern guided missile destroyers and frigates, and the world's most formidable force of seagoing cruise and ballistic missiles. This modern, growing navy is intended in significant part to undergird China's global search for energy sources and security. Beijing's determination to maintain its historic economic growth depends on energy security. These two national priorities—a navy capable of defending China's national security and economic interests

and security energy resources—come together to define and support Chinese foreign policy. This book addresses these three in both global and Asian contextual terms, with special emphasis on relations between China and the United States.

This volume examines theoretical and empirical issues relating to cyberconflict and its implications for global security and politics. Taking a multidimensional approach to current debates in internet politics, the book comprises essays by leading experts from across the world. The volume includes a comprehensive introduction to current debates in the field and their ramifications for global politics, and follows this with empirical case studies. These include cyberconflict, cyberwars, information warfare and hacktivism, in contexts such as Sri Lanka, Lebanon and Estonia, the European Social Forum, feminist cybercrusades and the use of the internet as a weapon by ethnoreligious and socio-political movements. The volume presents the theoretical debates and case studies of cyberconflict in a

coherent, progressive and truly multidisciplinary way. The book will be of interest to students of cyberconflict, internet politics, security studies and IR in general.

This book constitutes the thoroughly refereed conference proceedings of the 5th International Conference on Computational Collective Intelligence, ICCCI 2013, held in Craiova, Romania, in September 2013. The 72 revised full papers presented were carefully selected from numerous submissions. Conference papers are organized in 16 technical sessions, covering the following topics: intelligent e-learning, classification and clustering methods, web intelligence and interaction, agents and multi-agent systems, social networks, intelligent knowledge management, language processing systems, modeling and optimization techniques, evolutionary computation, intelligent and group decision making, swarm intelligence, data mining techniques and applications, cooperative problem solving, collective intelligence for text mining and innovation, collective intelligence for social understanding and mining, and soft methods in collective intelligence.

Do Less, Live More, Get Accepted What if getting into your reach schools didn't require four years of

*excessive A.P. classes, overwhelming activity schedules, and constant stress? In **How to Be a High School Superstar**, Cal Newport explores the world of relaxed superstars—students who scored spots at the nation’s top colleges by leading uncluttered, low stress, and authentic lives. Drawing from extensive interviews and cutting-edge science, Newport explains the surprising truths behind these superstars’ mixture of happiness and admissions success, including:*

- Why doing less is the foundation for becoming more impressive.*
- Why demonstrating passion is meaningless, but being interesting is crucial.*
- Why accomplishments that are hard to explain are better than accomplishments that are hard to do.*

These insights are accompanied by step-by-step instructions to help any student adopt the relaxed superstar lifestyle—proving that getting into college doesn’t have to be a chore to survive, but instead can be the reward for living a genuinely interesting life.

*Through analyses, experimental results, and worked-out numerical examples, **Microscale and Nanoscale Heat Transfer: Fundamentals and Engineering Applications** explores the methods and observations of thermophysical phenomena in size-affected domains. Compiling the most relevant findings from the literature, along with results from their own re*

This yearbook is the official guide to schools offering the International Baccalaureate Diploma, Middle Years and Primary Years programmes. It tells you where the schools are and what they offer, and provides up-to-date information about the IB programmes and the International Baccalaureate Organization.

"This friendly, affordable guide to some 1,700 museums with art collections is a perfect resource to hand the art lover who wants to know what museums and other public exhibition spaces to visit in an area. Entries are arranged by state and city, and include basic information about fees, hours, activities, Web sites, and a description of the collections, facilities, a bit of history, and any special points of interest. Handy maps showing museum locations introduce each state section, and inviting photographs accompany most entries."--"Outstanding Reference Sources," American Libraries, May 2002.

This book provides readers and researchers with a critical examination of mass shootings as told by the media, offering research-based, factual answers to oft-asked questions and investigating common myths about these tragic events. • Tackles common misconceptions about mass shootings perpetrated by and through the media and provides information that grounds the realities of such events in empirical evidence • Explores the history of mass shootings, both before and after the infamous 1999 Columbine High School event and shootings that occurred in and out of schools • Addresses common myths associated with mass shooting events by the media, such as how often and where they occur and the absence of any warning signs • Helps readers understand the realities of these events, including their international reach, the potential warning signs, and how evidence associated with the events can provide clues into why they occurred

E-Books in Academic Libraries: Stepping Up to the Challenge provides readers with a view of the changing and emerging roles of electronic books in higher education. The three main sections contain contributions by experts in the publisher/vendor arena, as well as by librarians who report on both the challenges of offering and managing e-books and on the issues surrounding patron use of e-books. The case study section offers perspectives from seven different sizes and types of libraries whose librarians describe innovative and thought-provoking projects involving e-books. Read about perspectives on e-books from organizations as diverse as a commercial publisher and an association press. Learn about the viewpoint of a jobber. Find out about the e-book challenges facing librarians, such as the quest to control costs in the patron-driven acquisitions (PDA) model, how to solve the

dilemma of resource sharing with e-books, and how to manage PDA in the consortial environment. See what patron use of e-books reveals about reading habits and disciplinary differences. Finally, in the case study section, discover how to promote scholarly e-books, how to manage an e-reader checkout program, and how one library replaced most of its print collection with e-books. These and other examples illustrate how innovative librarians use e-books to enhance users' experiences with scholarly works.

is an eBook to give higher education to people by giving them excellent schools' URLs around the world. The parents and students deserve to know, before they enroll, that the schools they've chosen will deliver the value by helping students compare the value offered by colleges and on holding institutions accountable for preparing their students to be successful. 10000 International & American Colleges and Universities will help you anywhere you go; it is a quick and easy reference tool that has just the Colleges and Universities with URL you want to check out! Just remember one thing that learning never stops! Read, Read, Read! And Write, Write, Write!
