Previously available only in an out-of-print Swedish edition published in 1955, Henry Bengston's firsthand account deals with what historian Dag Blanck calls the "other Swedish America." Swedish immigrants in general were conservative, but Bengston and others—most notably Joe Hill—joined the working-class labor movement on the left, primarily as Debsian socialists, although their ranks included other socialists, communists, and anarchists. Involved in the radical labor movement on many fronts, Bengston was the editor of Svenska Socialisten from 1912 until he dropped out of the Scandinavian Socialist Federation in 1920. Even after 1920, however, his sympathies remained with the movement he had once strongly espoused.

Willis' almost total textbook analysis of today's newspaper makes *Surviving in the Newspaper Business* precisely what it claims to be: A how-to guide to newspaper management in the 1980s and beyond . . . a set of unified principles for successful management.' It explains the supervision and organization of each department and stresses the importance of keeping the paper responsive to the needs of its readers, advertisers and, somewhat surprisingly, even its employees. Willis talks about advertising, circulation and marketing strategies and how to deal with competition from TV, the suburban weeklies and labor unions. He looks at the editor as a people manager, ' something that more than one tradition-bound editor has been unable to do for himself. The book has sample budgets and organizational charts and even a discussion of the relative merits of adult vs. youth carriers. Newspaper Research Journal Professor Jim Willis' book is a nicely condensed overview of the newspaper as a business. Though it is aimed at journalism students enrolled in newspaper management classes, it is also worthwhile reading for the curious reporter or copy editor who knows little about how newspapers make and spend money. . . . The book is sprinkled with good, common sense about balancing newspapers as a business against newspapering as good journalism. Professor Willis makes a gallant attempt to make sure students understand that though the newspaper must make a profit to survive, it will never truly excel unless it produces a good news-editorial product. ASNE Bulletin *Surviving in the Newspaper Business* is a how-to-do-it guide to newspaper management for the 1980s and beyond. It presents a set of unified principles for successful management and exposes the student to the primary mission of the newspaper: to deliver a quality product to the depth and breadth of the marketplace. Stressing the importance of the total newspaper concept, Willis portrays the successful newspaper as integrated internally among departments and externally with its readership and advertisers. In addition, he analyzes the newspaper's industrial environment, discusses management survival strategies, considers business and finance plans, and assesses organizational behavior in the newsroom. Included are a series of hands-on case studies offering further insights into topics discussed.

Xiaoqun Xu makes a compelling and original contribution to the study of China's modernization with this book on the rise of professional associations in Republican China in their

birthplace of Shanghai, and of their political and socio-cultural milieu. This 2001 book is rich in detail about the key professional and political figures and organizations in Shanghai, filling an important gap in its social history. The professional associations were, as the author writes, 'unambiguously urban and modern in their origins and functions ... representing a new breed of educated Chinese' and they pioneered a new type of relationship with the state. Xu addresses a central issue in China studies, the relationship between state and society, and proposes an alternative to the Western-derived concept of civil society. This book illuminates the complexity of modernization and nationalism in twentieth-century China, and provides a concrete case for comparative studies of professionalization and class formation across cultures.
