This book provides a detailed and updated analysis of S-REITs with latest developments in other REIT jurisdictions and looks into protecting and growing one's investments in REITs after the COVID-19 pandemic. It focuses on how a REIT investor can make millions in REITs in a systematic way. The key lies in not only having Good Performing REITs in your investment portfolio and letting them run, but also in avoiding the Bad Performing REITs or Value Traps that will drain investors' wealth, time and emotions. Gabriel Yap does a deep dive into how certain valuation benchmarks used by the market have proven to be faulty and gives clear guidance on how investors can grow with REITs. As inorganic growth has been an important factor in driving up REIT prices, this book also delves into REITs acquisitions with detailed case studies

Welcome to OOIS'01 and Calgary! This is the 7th International Conference on Object-Oriented Information Systems (OOIS) that focus on Object-Oriented and Web-Based Frameworks for Information Systems. In the last few years we've seen significant new development in this field, from one-off design technologies to reusable frameworks, and from web applications to bioinformatic systems. We perceive that information processing is one of the most important activities of human beings. Object-orientation and frameworks have been the main-stream technologies for design and implementation of large-scale and complex information systems. Recent research advances and industrial innovations in information systems modeling and Internet applications have explored the new trends in shifting information system vendors from component and system developers to services providers. Users of information systems are increasingly demanding higher performance, mobility, and personalization in order to realize the dream to access and obtain necessary information anywhere and anytime. The new development requires the investigation of new architectures, frameworks, processes, and inter-connectivity of information systems at society, organization, team, and personal levels. The OOIS'01 Proceedings has put together a program of 53 papers from leading researchers and practitioners in the field of object technology and information systems.

The Google-designed and LG-manufactured Nexus 5 is the first smartphone to run the Android 4.4 "KitKat" operating system. If you've just bought a Nexus 5 smartphone, or you're thinking about buying one, you should read this book. The ethos of the book is very much "What the Nexus 5 can do for you!", and it's an unofficial book because we have not colluded with the manufacturers (Google or LG) during the writing of the book...so we can say pretty much whatever we want. And if we say we like it, it's because we really do. But we're no "fan-boys", so we don't mind giving a warts 'n' all coverage where it's warranted. So whether you're so-far undecided, or have already purchased your Nexus 5...buy this book! And look out for similar books at unofficialbooks.info.

Why are so many people attracted to narrative fiction? How do authors in this genre reframe experiences, people, and environments anchored to the real world without duplicating "real life"? In which ways does fiction differ from reality? What might fictional narrative and reality have in common--if anything? By analyzing novels such as Arundhati Roy's *The God of Small Things*, Amitav Ghosh's *The Glass Palace*, Zadie Smith's *White Teeth*, and Hari Kunzru's *The Impressionist*, along with selected Latino comic books and short fiction, this book explores the peculiarities of the production and reception of postcolonial and Latino borderland fiction. Frederick Luis Aldama uses tools from disciplines such as film studies and cognitive science that allow the reader to establish how a fictional narrative is built, how it functions, and how it defines the boundaries of concepts that appear susceptible to limitless interpretations. Aldama emphasizes how postcolonial and Latino borderland narrative fiction authors and artists use narrative devices to create their aesthetic blueprints in ways that loosely guide their readers' imagination and emotion. In *A User's Guide to Postcolonial and Latino Borderland Fiction*, he argues that the study of ethnic-identified narrative fiction must acknowledge its active engagement with world narrative fictional genres, storytelling modes, and techniques, as well as the way such fictions work to move their audiences.
