Now 60 years old, your Slant Six could probably use some freshening up. Slant Six engine expert Doug Dutra has produced this volume to walk you through every aspect of disassembly, evaluation, rebuild, and reassembly in an easy-to-read, step-by-step format. The book also covers modifications, showing how to squeeze the most out of your engine. The year 1960 was an important one in auto manufacturing; it was the year all of the Big Three unveiled entrants in a new class of car called the compact. Chrysler's offering, the Plymouth Valiant, was paired with its redesigned 6-cylinder engine entrant, the Slant Six, known by its nickname the "leaning tower of power." This engine powered the Valiants when they swept the top seven positions in the newly christened compact race that precluded the Daytona 500. With its legacy intact, Chrysler's Slant Six powered Mopar automobiles for decades to come in three displacement offerings (170, 198, 225). With millions of Slant Six engines built over the 30-plus years that the engine was produced, it's always a good idea to have this book handy, as you never know when the next "leaning tower of power" will find its way into your garage! p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 12.0px Arial}

Adult Faith Connections Leader provides the teacher with easy-to-use methodology, discussion questions written to motivate group participation, and video/media supplements. It features the complete Bible study exposition plus teaching methodology and optional activities to help leaders adapt the session to their specific group. This resource will help teachers connect people to God's Word, enabling them to live out their faith in the world. During this study, we will explore the ways in which the early church encountered the transforming power of God and discover the way we can experience this same power in our lives today.

Auto Repair For Dummies, 2nd Edition (9781119543619) was previously published as Auto Repair For Dummies, 2nd Edition (9780764599026). While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide—400,000 copies sold—now extensively reorganized and updated Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.

Beauty Meets Beast in San Francisco Accepting employment as a governess after hard times hit her family, medieval scholar Rosalind Hawkins is surprised when she learns that her mysterious employer has no children, no wife, and she is not to meet with him face to face. Instead, her duties are to read to him, through a speaking tube, from ancient manuscripts in obscure, nearly-forgotten dialects. A requirement for the job was skill in translating medieval French, and she now understands the reason for that requirement, and assumes her unseen employer's interest in the descriptions of medieval spells and sorcery is that of an eccentric antiquary. What she does not realize is that his interest is anything but academic. He has a terrible secret and is desperately searching for something that can reverse the effects of the misfired spell which created his predicament. At the publisher's request, this title is sold without DRM (Digital Rights Management).

This book presents select proceedings of the International Conference on Advances in Sustainable Technologies (ICAST 2020), organized by Lovely Professional University, Punjab, India. It is morning in America, many years in the future. As the 22nd century approaches, the United States and Canada have been shattered by war and upheaval and have broken up into separate ethnic, racial, and political enclaves. On the east coast a crumbling, bankrupt and tottering United States government still holds a weak and impotent sway over a ragged collection of tattered states and cities, but life is chaotic and plagued with poverty, violence, and desperation. The entire Southwest, beginning with Texas and extending westward to southern California and north as far as Utah, has become the Spanish-speaking Mexican state of Aztlan. And in the Pacific Northwest, from northern California on up to Alaska, a brutal fascist and white supremacist dictatorship rules the Northwest American Republic. Colonel Donald Redmond of the Bureau of State Security (BOSS) is one of the Northwest Republic's most ruthless and skillful political policemen. Then on a bright October morning he is called into the office of the State President, where he is given a top-secret assignment. A skeleton from the bloody and treacherous days of the revolution against America is about to emerge from the closet, and one of the most carefully guarded and suppressed mysteries of that revolution may become public knowledge. That long hidden truth may undermine the very moral and political foundations of the white supremacist state. A woman's life hangs in the balance, but possibly even the fate a of a continent as well, as Donald Redmond and his partner Sergeant Nel plunge into the past and seek for the answer: who betrayed the Olympic Flying Column, and why? In The Hill of the Ravens, underground cult novelist H. A. Covington offers us a grim and chilling view of a future that may yet come to be.

The Death of Her is a haunting psychological thriller from Debbie Howells, author of the bestselling Richard and Judy Book Club success The Bones of You. A woman's body is discovered on a Cornish farm, battered and left for dead in a maize field. Airlifted to hospital, her life hanging in the balance, no one's sure who she is. Three days later she comes round, but her memory is damaged. She knows her name – Evie – but no more, until she remembers another name. Angel – her three-year-old daughter. As the police circulate Evie's photo, someone recognizes her. Charlotte knew her years ago, at school, when another child went missing. Leah Danning, who vanished whilst in Evie's care. When the police search Evie's home, there's no sign of Angel. More disturbingly, there's no evidence that she ever lived there, forcing the police to question whether Evie's having some kind of breakdown. But even from the darkest place she's ever known, Evie believes her daughter is alive. The police remain unconvinced – unaware that on the fringes of Evie's life, there's someone else. Someone hidden, watching her every move, with their own agenda and their own twisted version of reality. PRAISE FOR THE BONES OF YOU 'A dazzling debut . . . Haunting, compelling' Daily Mail
