**A book concerning Russian Limousines, and the Chinese models that were initially derived from them, has never been attempted before. This book investigates the whole story of why the Soviet Communist Party required such a bourgeois product, and how production was subsequently achieved. Following the orders of Stalin, work on the Limousines commenced during the first Five Year Plan (1927-1933) at the Putilov Works, late the Kirov Zavod, where the Leningrad L-1 was made in a limited number. From these beginnings, the Moscow and Gorky models emerged, and later the Chinese-derived types made with Russian aid during the late 1950s. Covering all of these models, up to the last one produced in 2003, and featuring full specifications translated from the relevant primary sources in Russian and Chinese literature, this is a meticulous and unique account of a previously neglected subject.**

**Hatchback, including special/limited editions. Does NOT cover features specific to Dune models, or facelifted Polo range introduced June 2005. *The bestselling author of No Logo shows how the global "free market" has exploited crises and shock for three decades, from Chile to Iraq In her groundbreaking reporting, Naomi Klein introduced the term "disaster capitalism." Whether covering Baghdad after the U.S. occupation, Sri Lanka in the wake of the tsunami, or New Orleans post-Katrina, she witnessed something remarkably similar. People still reeling from catastrophe were being hit again, this time with economic "shock treatment," losing their land and homes to rapid-fire corporate makeovers. The Shock Doctrine retells the story of the most dominant ideology of our time, Milton Friedman's free market economic revolution. In contrast to the popular myth of this movement's peaceful global victory, Klein shows how it has exploited moments of shock and extreme violence in order to implement its economic policies in so many parts of the world from Latin America and Eastern Europe to South Africa, Russia, and Iraq. At the core of disaster capitalism is the use of cataclysmic events to advance radical privatization combined with the privatization of the disaster response itself. Klein argues that by capitalizing on crises, created by nature or war, the disaster capitalism complex now exists as a booming new economy, and is the violent culmination of a radical economic project that has been incubating for fifty years.*
