Before New York Times bestselling author Bill Bryson wrote *The Road to Little Dribbling*, he took this delightfully irreverent jaunt around the unparalleled floating nation of Great Britain, which has produced zebra crossings, Shakespeare, Twiggie Winkie's Farm, and places with names like Farleigh Wallop and Titsey.

Winner of the Overseas Press Club of America's Cornelius Ryan Award • Finalist for the Pulitzer Prize in Nonfiction A New York Times Book Review Notable Book • Named a Best Book of the Year by New York Magazine and *The Progressive* "A deeply honest and brave portrait of of an individual sensibility reckoning with her country's violent role in the world." —Hisham Matar, *The New York Times Book Review* In the wake of the September 11 attacks and the U.S.-led invasion of Iraq, Suzy Hansen, who grew up in an insular conservative town in New Jersey, was enjoying early success as a journalist for a high-profile New York newspaper. Increasingly, though, the disconnect between the chaos of world events and the response at home took on pressing urgency for her. Seeking to understand the Muslim world that had been reduced to scaremongering headlines, she moved to Istanbul. Hansen arrived in Istanbul with romantic ideas about a mythical city perched between East and West, and with a naïve sense of the Islamic world beyond. Over the course of her many years of living in Turkey and traveling in Greece, Egypt, Afghanistan, and Iran, she learned a great deal about these countries and their cultures and histories and politics. But the greatest, most unsettling surprise would be what she learned about her own country—and herself, an American abroad in the era of American decline. It would take leaving her home to discover what she came to think of as the two Americas: the country and its people, and the experience of American power around the world. She came to understand that anti-Americanism is not a violent pathology. It is, Hansen writes, "a broken heart . . . A one-hundred-year-old relationship." Blending memoir, journalism, and history, and deeply attuned to the voices of those she met on her travels, *Notes on a Foreign Country* is a moving reflection on America's place in the world. It is a powerful journey of self-discovery and revelation—a profound reckoning with what it means to be American in a moment of grave national and global turmoil.

From the New York Times–bestselling author Stephen M. Walt, *The Hell of Good Intentions* dissects the faults and foibles of recent American foreign policy—explaining why it has been plagued by disasters like the "forever wars" in Iraq and Afghanistan and outlining what can be done to fix it. In 1992, the United States stood at the pinnacle of world power and Americans were confident that a new era of peace and prosperity was at hand. Twenty-five years later, those hopes have been dashed. Relations with Russia and China have soured, the European Union is wobbling, nationalism and populism are on the rise, and the United States is stuck in costly and pointless wars that have squandered trillions of dollars and undermined its influence around the world. The root of this dismal record, Walt argues, is the American foreign policy establishment's stubborn commitment to a strategy of "liberal hegemony." Since the end of the Cold War, Republicans and Democrats alike have tried to use U.S. power to spread democracy, open markets, and other liberal values into every nook and cranny of the planet. This strategy was doomed to fail, but its proponents in the foreign policy elite were never held accountable and kept repeating the same mistakes. Donald Trump won the presidency promising to end the misguided policies of the foreign policy "Blob" and to pursue a wiser approach. But his erratic and impulsive style of governing, combined with a deeply flawed understanding of world politics, are making a bad situation worse. The best alternative, Walt argues, is a return to the realist strategy of "offshore balancing," which eschews regime change, nation-building, and other forms of global social engineering. The American people would surely welcome a more restrained foreign policy, one that allowed greater attention to problems here at home. This long-overdue shift will require abandoning the futile quest for liberal hegemony and building a foreign policy establishment with a more realistic view of American power. Clear-eyed, candid, and elegantly written, Stephen M. Walt's *The Hell of Good Intentions* offers both a compelling diagnosis of America's recent foreign policy follies and a proven formula for renewed success.

*Notes on a Foreign Country* An American Abroad in a Post-American World Farrar, Straus and Giroux This is a memoir presented in an anthological - like format; in other words, a collection of short stories, on the life of the author. It starts when he was growing up in the Philippine countryside of Ilocos Sur province. Just like a normal kid, he played with his friends, did crazy things, went to school and moved to Manila, for his college education. He got married while in fifth year college, but still graduated on time. This book relates his struggles, failures, as well as successes, including his coming to America. Searching for the American Dream was no picnic either, but with perseverance, he achieved some of them in modest ways. Foreigners planning to immigrate to the great ol' USA could get glimpses, on what it takes, to come and live in America.

The political era one is living through always feels messy and fragmented from the inside. But looking back from the future, the first two decades of the 21st century will come to be seen as the moment when the politics of culture and identity rose to challenge the previous politics of left and right. David Goodhart's searing analysis considers this shift through his novel paradigm of the "nowhere" class and the "somewhere" class. Members of the "Nowhere" class dominate our culture and society. They tend to do well at school, then usually move from home to a boarding university in their late teens and on to a career in the professions that might take them to a capital city or even abroad for a year or two. Such people have portable "achieved" identities, based on educational and career success, which makes them generally comfortable with new places and people. The "Somewhere" people are by definition more rooted and have ascribed identities based on group belonging and particular places, which is why they often find rapid change disturbing. One core group of Somewheres are often "left behind" - mainly older white working class men with little education. They have lost economically with the decline of well paid jobs for people with little education and culturally, too, with the disappearance of a distinctive working-class culture and the marginalization of their social conservatism in the public conversation. However Somewhere ambivalence about recent social trends spreads far beyond this core group and is shared by many

in all social classes. The broad ideology of Nowhere people can be characterized as "progressive individualism." By contrast, the Somewheres are more socially conservative by instinct. This book will contend that the Nowhere people have counted for too much in the past generation and populist parties, such as the Tea Party, have emerged in part as a democratic counter-balance to that dominance. In a democracy the Somewheres cannot, however, be ignored.

***"An interactive and empowering book" to help African American men and women create a new vision of better health and navigate the health care system (BET.com). According to the federal Office of Minority Health, African Americans "are affected by serious diseases and health conditions at far greater rates than other Americans." In fact, African Americans suffer an estimated 85,000 excess deaths every year from diseases we know how to prevent: heart disease, stroke, cancer, high blood pressure, and diabetes. In this important and accessible book, Dr. Michelle Gourdine provides African Americans with the knowledge and guidance they need to take charge of their wellbeing. Reclaiming Our Health begins with an overview of the primary health concerns facing African Americans and explains who is at greatest risk of illness. Expanding on her career and life experiences as an African American physician, Dr. Gourdine presents key insights into the ways African American culture shapes health choices—how beliefs, traditions, and values can influence eating choices, exercise habits, and even the decision to seek medical attention. She translates extensive research into practical information and presents readers with concrete steps for achieving a healthier lifestyle, as well as strategies for navigating the health-care system. This interactive guide with illustrations is a vital resource for every African American on how to live a healthier and more empowered life, and an indispensable handbook for health-care providers, policy makers, and others working to close the health gap among people of color. Says Gourdine, "I wrote this book to empower our community to solve our own health problems and save our own lives."***

If history matters for understanding key development outcomes then surely historians should be active contributors to the debates informing these understandings. This volume integrates, for the first time, contributions from ten leading historians and seven policy advisors around the central development issues of social protection, public health, public education and natural resource management. How did certain ideas, and not others, gain traction in shaping particular policy responses? How did the content and effectiveness of these responses vary across different countries, and indeed within them? Achieving this is not merely a matter of seeking to 'know more' about specific times, places and issues, but recognising the distinctive ways in which historians rigorously assemble, analyse and interpret diverse forms of evidence. This book will appeal to students and scholars in development studies, history, international relations, politics and geography as well as policy makers and those working for or studying NGOs.***

When a newly appointed first female Chief of MI6 disappears weeks after two possibly related cases, disgraced former MI6 officer Thomas Kell is offered a chance to redeem his career by conducting a discreet operation that uncovers a shocking conspiracy. By the best-selling author of *The Trinity Six*. 100,000 first printing.

Alex Doukas had big dreams, but at 45 his life is in ruins. Now he's trying to make sense of his failure. His quest takes him past Mile End in the fifties, when young Greeks like his parents flocked to Montreal, back to war-torn Athens and a girl hiding under a bed. Then forward again, through the torments of youth, to flight from his immigrant ghetto - and the turbulent romance that leads to a violent unravelling, even as his parents spiral to their dooms. But if life is anguish, nobody else got the memo: not the old Greek men in their windbreakers trumpeting for Achilles, not the unstoppable force that is a Greek mother offering drinks to an unthirsty boy, not the supremely wise 10 year old with brothers as he lectures on female anatomy. Because Mile End doesn't slow down for something as familiar as tragedy. *A Foreign Country* explores the burdens of history, the bonds of tribe and family, and the ferocious pull of love. And from one man's tale of failure, something wondrous unfolds: a profound, moving, sometimes tragic, often hilarious, portrait of a family and panorama of an age.

Starting with an examination of how historians work, this "Very Short Introduction" aims to explore history in a general, pithy, and accessible manner, rather than to delve into specific periods.

The story of West Indian immigrants to the United States is generally considered to be a great success. Mary Waters, however, tells a very different story. She finds that the values that gain first-generation immigrants initial success--a willingness to work hard, a lack of attention to racism, a desire for education, an incentive to save--are undermined by the realities of life and race relations in the United States. Contrary to long-held beliefs, Waters finds, those who resist Americanization are most likely to succeed economically, especially in the second generation.

*A New York Times Bestseller A Wall Street Journal Bestseller A New York Times Notable Book of 2020 A New York Times Book Review Editors' Choice Shortlisted for the Financial Times and McKinsey Business Book of the Year A New Statesman Book to Read From economist Anne Case and Nobel Prize winner Angus Deaton, a groundbreaking account of how the flaws in capitalism are fatal for America's working class Deaths of despair from suicide, drug overdose, and alcoholism are rising dramatically in the United States, claiming hundreds of thousands of American lives. Anne Case and Angus Deaton explain the overwhelming surge in these deaths and shed light on the social and economic forces that are making life harder for the working class. As the college educated become healthier and wealthier, adults without a degree are literally dying from pain and despair. Case and Deaton tie the crisis to the weakening position of labor, the growing power of corporations, and a rapacious health-care sector that redistributes working-class wages into the pockets of the wealthy. This critically important book paints a troubling portrait of the American dream in decline, and provides solutions that can rein in capitalism's excesses and make it work for everyone.*

*'A brave new voice that reaches out to us all' Miranda Doyle, author of A Book of Untruths 28-year-old Zeba Talkhani charts her experiences growing up in Saudi Arabia amid patriarchal customs reminiscent of The Handmaid's Tale, and her journey to find freedom in India, Germany and the UK. Talkhani offers a fresh perspective on living as an outsider and examines her relationship with her mother and the challenges she faced when she experienced hair loss at a young age. Rejecting the traditional path her culture had chosen for her, Talkhani became financially independent and married on her own terms in the UK. Drawing on her personal experiences Talkhani shows how she fought for the right to her individuality as a Muslim feminist and refused to let negative experiences define her.*

up in Washington, D.C. and Texas, and then attending Columbia University in New York, Belén Fernández ended up in a state of self-imposed exile from the United States. From trekking-through Europe, the Middle East, Morocco, and Latin America—to packing avocados in southern Spain, to close encounters with a variety of unpredictable men, to witnessing the violent aftermath of the 2009 coup in Honduras, the international travel allowed her by an American passport has, ironically, given her a direct view of the devastating consequences of U.S. machinations worldwide. For some years Fernández survived thanks to the generosity of strangers who picked her up hitchhiking, fed her, and offered accommodations; then she discovered people would pay her for her powerful, unfiltered journalism, enabling—as of the present moment—continued survival. In just a few short years of publishing her observations on world politics and writing from places as varied as Lebanon, Italy, Uzbekistan, Syria, Mexico, Turkey, Honduras, and Iran, Belén Fernández has established herself as a one of the most trenchant observers of America's interventions around the world, following in the footsteps of great foreign correspondents such as Martha Gellhorn and Susan Sontag.

In recent years, America's criminal justice system has become the subject of an increasingly urgent debate. Critics have assailed the rise of mass incarceration, emphasizing its disproportionate impact on people of color. As James Forman, Jr., points out, however, the war on crime that began in the 1970s was supported by many African American leaders in the nation's urban centers. In *Locking Up Our Own*, he seeks to understand why. Forman shows us that the first substantial cohort of black mayors, judges, and police chiefs took office amid a surge in crime and drug addiction. Many prominent black officials, including Washington, D.C. mayor Marion Barry and federal prosecutor Eric Holder, feared that the gains of the civil rights movement were being undermined by lawlessness—and thus embraced tough-on-crime measures, including longer sentences and aggressive police tactics. In the face of skyrocketing murder rates and the proliferation of open-air drug markets, they believed they had no choice. But the policies they adopted would have devastating consequences for residents of poor black neighborhoods. A former D.C. public defender, Forman tells riveting stories of politicians, community activists, police officers, defendants, and crime victims. He writes with compassion about individuals trapped in terrible dilemmas—from the men and women he represented in court to officials struggling to respond to a public safety emergency. *Locking Up Our Own* enriches our understanding of why our society became so punitive and offers important lessons to anyone concerned about the future of race and the criminal justice system in this country.

**A NEW YORK TIMES, WALL STREET JOURNAL, AND USA TODAY BESTSELLER** An intimate, powerful, and galvanizing memoir by Pulitzer Prize winner, human rights advocate, and former US Ambassador to the UN Samantha Power. Named one of the best books of the year: *The New York Times* • National Public Radio • Time • The Economist • The Washington Post • Vanity Fair • Christian Science Monitor • Publishers Weekly • Audible “Her highly personal and reflective memoir . . . is a must-read for anyone who cares about our role in a changing world.”—President Barack Obama Includes an updated afterword Tracing her distinctly American journey from immigrant to war correspondent to presidential Cabinet official, Samantha Power's acclaimed memoir is a unique blend of suspenseful storytelling, vivid character portraits, and shrewd political insight. After her critiques of US foreign policy caught the eye of Senator Barack Obama, he invited her to work with him on Capitol Hill and then on his presidential campaign. When Obama won the presidency, Power went from being an activist outsider to serving as his human rights adviser and, in 2013, becoming the youngest-ever US Ambassador to the United Nations. Power transports us from her childhood in Dublin to the streets of war-torn Bosnia to the White House Situation Room and the world of high-stakes diplomacy, offering a compelling and deeply honest look at navigating the halls of power while trying to put one's ideals into practice. Along the way, she lays bare the searing battles and defining moments of her life, shows how she juggled the demands of a 24/7 national security job with raising two young children, and makes the case for how we each can advance the cause of human dignity. This is an unforgettable account of the power of idealism—and of one person's fierce determination to make a difference. “This is a wonderful book. "Only a Russian could do that," says Aleksandr Ivanovich. "Only a Russian could make the whole world go mad." A century later, in November 2013, thousands of Ukrainian citizens gathered at Independence Square in Kyiv to protest then-President Yanukovich's failure to sign a referendum with the European Union, opting instead to forge a closer alliance with President Vladimir Putin and Russia. The peaceful protests turned violent when military police shot live ammunition into the crowd, killing over a hundred civilians. *I Will Die in a Foreign Land* follows four individuals over the course of a volatile Ukrainian winter, as their lives are forever changed by the Euromaidan protests. Katya is an Ukrainian-American doctor stationed at a makeshift medical clinic in St. Michael's Monastery; Misha is an engineer originally from Pripjat, who has lived in Kyiv since his wife's death; Slava is a fiery young activist whose past hardships steel her determination in the face of persecution; and Aleksandr Ivanovich, a former KGB agent, who climbs atop a burned-out police bus at Independence Square and plays the piano. As Katya, Misha, Slava, and Aleksandr's lives become intertwined, they each seek their own solace during an especially tumultuous and violent period. The story is also told by a chorus of voices that incorporates folklore and narrates a turbulent Slavic history. While unfolding an especially moving story of quiet beauty and love in a time of terror, *I Will Die in a Foreign Land* is an ambitious, intimate, and haunting portrait of human perseverance and empathy.**

**In the beginning, North America was Indian country. But only in the beginning. After the opening act of the great national drama, Native Americans yielded to the westward rush of European settlers. Or so the story usually goes. Yet, for three centuries after Columbus, Native people controlled most of eastern North America and profoundly shaped its destiny. In *Facing East from Indian Country*, Daniel K. Richter keeps Native people center-stage throughout the story of the origins of the United States. Viewed from Indian country, the sixteenth century was an era in which Native people discovered Europeans and struggled to make sense of a new world. Well into the seventeenth century, the most profound challenges to Indian life came less from the arrival of a relative handful of European colonists than from the biological, economic, and environmental forces the newcomers unleashed. Drawing upon their own traditions, Indian communities reinvented themselves and carved out a place in a world dominated by transatlantic European empires. In 1776, however, when some of Britain's colonists rebelled against that imperial world, they overturned the system that had made Euro-American and Native coexistence possible. Eastern North America only ceased to be an Indian country because the revolutionaries denied the continent's first peoples a place in the nation they were creating. In rediscovering early America as Indian country, Richter employs the historian's craft to challenge cherished assumptions about times and places we thought we knew well, revealing Native American experiences at the core of the nation's birth and identity.**

You will both realise I have borrowed little else, certainly not the characters of anyone in Viet Nam. Pyle, Granger, Fowler, Vigot, Joe— these have had no originals in the life of Saigon or Hanoi, and General The is dead : shot in the back, so they say. Even the historical events have been rearranged. For example, the big bomb near the Continental preceded and did not follow the bicycle bombs. I have no scruples about such small changes. This is a story and not a piece of history, and I hope that as a story about a few imaginary characters it will pass for both of you one hot Saigon evening.**

**Today, war is more complicated than it has ever been. When considering military strategy, a commander must be aware of several theaters of war. There's ground strength, air power, naval combat and even cyber warfare. In the late 19th century, however, the true military might of a nation rested primarily on the strength of its navy. In 1890, United States Navy Captain Alfred Thayer Mahan published a book titled "The Influence of Sea Power Upon History." The monumental text addressed the importance of both military and commercial fleets in the success of a nation in war and peacetime. Mahan begins with a discussion of the elements he considers to be the key to a nation's success on the seas. He theorizes that a ground force could not sustain the pressure of a naval blockade. Mahan then applies his principles to wars of the past. He analyzes the use of a navy in various engagements and considers the resulting influence on the outcome of the wars. The book was readily accepted by commanders and tacticians all over the world and his principles and theories were utilized throughout the 20th century. His arguments, along with technological advances, were influential in the strengthening of the United States Navy. Presently, Mahan's work is considered the most important work on naval strategy in history.**

In the book of Genesis, God bestows a new name upon Abram--Abraham, a father of many nations. With this name and his Covenant, Abraham would become the patriarch of three of the world's major religions: Judaism, Christianity, and Islam. Connected by their mutual--if differentiated--veneration of the One God proclaimed by Abraham, these traditions share much beyond their origins in the ancient Israel of the Old Testament. This Very Short Introduction explores the intertwined histories of these monotheistic religions, from the emergence of Christianity and Islam to the violence of the Crusades and the cultural exchanges of al-Andalus. Each religion continues to be shaped by this history but has also reacted to the forces of modernity and politics. Movements such as the Reformation and that led by seventh-century Kharijites have emerged, intentioned to reform or restore traditional religious practice but quite different in their goals and effects. Relationships with states, among them Israel and Saudi Arabia, have also figured importantly in their development. The *Abrahamic Religions: A Very Short Introduction* brings these traditions together into a common narrative, lending much needed context to the story of Abraham and his descendants. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

Nations carry out geopolitical combat through economic means. Yet America often reaches for the gun over the purse to advance its interests abroad. This volume presents over 200 selected original artworks from the collection of Betsy Beinecke Shirley, one of the great collectors of American children's literature. Shirley gathered an authoritative collection of books, original illustrations, manuscripts, as well as drawings and paintings from such children's classics as "Treasure Island" and "Eloise." The artwork in Shirley's collection guides the reader on a tour through the stages of childhood reading, this volume begins with ABC's and nursery books. It continues through adventure stories, magazines, and more, then concludes with a miscellany section of odds and ends. The images demonstrate how children's books evolved, from the nation's first days of independence to modern times. Artists whose works are represented include many of the favorites, among them Ludwig Bemelmans, Maurice Sendak, A.B. Frost, Wanda Gag, Peter Newell, N.C. Wyeth, Tony Sarg, Robert Lawson, and Johnny Gruelle.

For decades, political observers and pundits have characterized the Islamic Republic of Iran as an ideologically rigid state on the verge of collapse, exclusively connected to a narrow social base. In *A Social Revolution*, Kevan Harris convincingly demonstrates how they are wrong. Previous studies ignore the forceful consequences of three decades of social change following the 1979 revolution. Today, more people in the country are connected to welfare and social policy institutions than to any other form of state organization. In fact, much of Iran's current political turbulence is the result of the success of these social welfare programs, which have created newly educated and mobilized social classes advocating for change. Based on extensive fieldwork conducted in Iran between 2006 and 2011, Harris shows how the revolutionary regime endured though the expansion of health, education, and aid programs that have both embedded the state in everyday life and empowered its challengers. This first serious book on the social policies of the Islamic Republic of Iran opens a new line of inquiry into the study of welfare states in countries where they are often overlooked or ignored.
