This new, thoroughly recast Second Edition has been acclaimed as "the most important book written since the beginning of that strange project called bioethics" (Stanley Hauerwas, Duke University). Its philosophical

exploration of the foundations of secular bioethics has been substantially expanded. The book challenges the values of much of contemporary bioethics and health care policy by confronting their failure to secure the moral norms they seek to apply. The nature of health and

disease, the definition of death, the morality of abortion, infanticide, euthanasia, physician-assisted suicide, germline genetic engineering, triage decisions and distributive justice in health care are all addressed within an integrated reconsideration of bioethics as a whole. New material

has been added regarding social justice, health care reform and environmental ethics. The very possibility and meaning of a secular bioethics are re-explored.

In this captivating yet troubling book, Ian Shapiro offers a searing indictment of many influential practices in the

social sciences and humanities today. Perhaps best known for his critique of rational choice theory, Shapiro expands his purview here. In discipline after discipline, he argues, scholars have fallen prey to inward-looking myopia that results from--and perpetuates--a flight from reality. In the

method-driven academic culture we inhabit, argues Shapiro, researchers too often make display and refinement of their techniques the principal scholarly activity. The result is that they lose sight of the objects of their study. Pet theories and methodological blinders lead unwelcome facts to be

ignored, sometimes not even perceived. The targets of Shapiro's critique include the law and economics movement, overzealous formal and statistical modeling, various reductive theories of human behavior, misguided conceptual analysis in political theory, and the Cambridge school of

intellectual history. As an alternative to all of these, Shapiro makes a compelling case for problem-driven social research, rooted in a realist philosophy of science and an antireductionist view of social explanation. In the lucid--if biting--prose for which Shapiro is
