

## November 2012 Paper 43

The Principles & Processes of Interactive Design is aimed at new designers from across the design and media disciplines who want to learn the fundamentals of designing for interactive media. This book is intended both as a primer and companion guide on how to research, plan and design for increasingly prevalent interactive projects. With clear and practical guidance on how to successfully present your ideas and concepts, Jamie Steane introduces you to user-based design, research and development, digital image and typography, interactive formats, and screen-based grids and layout. Using a raft of inspirational examples from a diverse range of leading international creatives and award-winning agencies, this is required reading for budding digital designers. In addition, industry perspectives from key design professionals provide fascinating insights into this exciting creative field, and each chapter concludes with workshop tutorials to help you put what you've learnt into practice in your own interactive designs. Featured contributors include: AKQA, BBC, Dare, Edenspiekermann, Electronic Arts, e-Types, Komodo Digital, Moving Brands, Nordkapp, Onedotzero, Onformative, Preloaded and Razorfish.

Within international law there is no unified concept of peace. This book addresses this gap by considering the liberal conception of peace within Western philosophy alongside the principle of 'peaceful coexistence' supported in the East. By tracing the evolution of the international law of peace through its historical and philosophical origins, this book investigates whether there is a 'right to peace'. The book explores how existing international law and institutions contribute to the establishment of peace, or how they fail to do so. It sets out how international law promotes the negative dimension of peace-the absence of violence-as well as its positive dimension: the presence of underlying conditions for peace. It also investigates whether international actors and institutions have particular obligations in relation to the establishment and maintenance of peace. Discussions include: the relationships between the different regimes of human rights, trade, development, the environment, and regulation of arms trade with peace; the role of women, refugees, and other groups seeking equal treatment; the role of peacekeepers, transitional justice mechanisms, international courts fact-finding missions, and national constitutional frameworks in upholding peace in practice; and how civil society participates in the promotion and safeguarding of peace. The book's comprehensive treatment of the concept of peace in international law makes it an ideal reference work for those working in the field, as well as for students.

Billions of minutes a month are spent globally on social media. This raises not only serious legal issues, but also has a clear impact on everyday commercial activity. This book considers the significant legal developments that have arisen due to social media. It provides an expert explanation of the issues that practitioners and businesses need to consider, as well as the special measures that are required in order to minimise their exposure to risk. The content is highly practical, and not only explores the law related to social media, but also includes useful aids for the reader, such as flow charts, checklists and case studies. Various categories and channels of social media are covered in this book, alongside the legal classification of different social networks. Social media is also considered in the context of human rights law by evaluating the implications this has had upon the development of civil and criminal law when pursuing a civil remedy or criminal prosecution in relation to online speech. As part of these discussions the book deals specifically with the Defamation Act 2013, the Communications Act 2003, the Computer Misuse Act 1990 and the Contempt of Court Act 1988 among other key issues such as seeking Injunctions and the resulting privacy implications. Finally, the author also pays careful consideration to the commercial aspects raised by social media. The reader will find reference to key cases and regulatory guidance notes and statutes including, the Data Protection Act 1998 (including the draft Data Protection Regulation), user privacy, human rights, trading and advertising standards, special rules for FCA regulated bodies and social media insurance. This book is an invaluable guide for private practice and in-house practitioners, business professionals, academics and post-graduate students involved in the law surrounding social media.

This is the first annual report on armed conflicts around the world, providing detailed study of each conflict which occurred in 2012, describing its classification, the applicable norms, key actors, methods of warfare, and the number of casualties. It also analyses the key legal issues that arose in the context of these armed conflicts.

Resolving Mass Disputes

This book analyses the Habitats Directive; one of the most prominent piece of EU environmental legislation of the past decades. Seen by some as the cornerstone of Europe's nature conservation policy, among other measures the Directive established the so-called "Natura 2000" ecological network, which covers more than 18% of the surface of the EU. However, despite the fact the Directive was adopted over twenty years ago only 17% of the protected habitats and species in Europe are being adequately protected while 10-60 % of animal species remain under threat. In light of the limited success and the contested nature of the Habitats Directive so far this book examines the successes and failures of the Habitats Directive from a legal and political angle. The book brings together international experts to consider the application, implementation and future of the Habitats Directive in order to assess whether the Habitats Directive is resilient enough to tackle biodiversity loss in the twenty- first century. Particular emphasis is put on the legal regime attached to the Natura 2000 network and its possible impact on land development and the relationship between the Habitats Directive and other topics including liability for ecological damage and transboundary nature conservation.

This title includes a number of Open Access chapters. Hydraulic fracturing, or "fracking" as it is commonly known, refers to

the practice of using liquids at very high pressures to fragment rock, thereby allowing natural gas to be harvested. This process increases energy resources but also has some negative environmental impacts as well. This book looks at the environmental impact. The first section looks at fracturing and the water supply, the second section looks at ecosystems and wildlife, while the final section examines the possible effects on human ecosystems and human health.

Eric Hobsbawm's works have had a nearly incalculable effect across generations of readers and students, influencing more than the practice of history but also the perception of it. Born in Alexandria, Egypt, of second-generation British parents, Hobsbawm was orphaned at age fourteen in 1931. Living with an uncle in Berlin, he experienced the full force of world economic depression, and in the charged reaction to it in Germany was forced to choose between Nazism and Communism, which was no choice at all. Hobsbawm's lifelong allegiance to Communism inspired his pioneering work in social history, particularly the trilogy for which he is most famous--The Age of Revolution, The Age of Capital, and The Age of Empire--covering what he termed "the long nineteenth century" in Europe. Selling in the millions of copies, these held sway among generations of readers, some of whom went on to have prominent careers in politics and business. In this comprehensive biography of Hobsbawm, acclaimed historian Richard Evans (author of The Third Reich Trilogy, among other works) offers both a living portrait and vital insight into one of the most influential intellectual figures of the twentieth century. Using exclusive and unrestricted access to the unpublished material, Evans places Hobsbawm's writings within their historical and political context. Hobsbawm's Marxism made him a controversial figure but also, uniquely and universally, someone who commanded respect even among those who did not share-or who even outright rejected-his political beliefs. Eric Hobsbawm: A Life in History gives us one of the 20th century's most colorful and intellectually compelling figures. It is an intellectual life of the century itself.

This book offers a critical assessment of the history of the euro, its crisis, and the rescue measures taken by the European Central Bank and the community of states. The euro induced huge capital flows from the northern to the southern countries of the Eurozone that triggered an inflationary credit bubble in the latter, deprived them of their competitiveness, and made them vulnerable to the financial crisis that spilled over from the US in 2007 and 2008. As private capital shied away from the southern countries, the ECB helped out by providing credit from the local money-printing presses. The ECB became heavily exposed to investment risks in the process, and subsequently had to be bailed out by intergovernmental rescue operations that provided replacement credit for the ECB credit, which itself had replaced the dwindling private credit. The interventions stretched the legal structures stipulated by the Maastricht Treaty which, in the absence of a European federal state, had granted the ECB a very limited mandate. These interventions created a path dependency that effectively made parliaments vicarious agents of the ECB's Governing Council. This book describes what the author considers to be a dangerous political process that undermines both the market economy and democracy, without solving southern Europe's competitiveness problem. It argues that the Eurozone has to rethink its rules of conduct by limiting the role of the ECB, exiting the regime of soft budget constraints and writing off public and bank debt to help the crisis countries breathe again. At the same time, the Eurosystem should become more flexible by offering its members the option of exiting and re-entering the euro - something between the dollar and the Bretton Woods system - until it eventually turns into a federation with a strong political power centre and a uniform currency like the dollar.

A Legal Analysis of the Trans-Pacific Partnership Agreement

Study Guide for CTET Paper 2 (Class 6 - 8 Teachers) Social Studies/ Social Science with Past Questions 4th Edition

The United Nations Arms Trade Treaty became binding international law in late 2014, and although the text of the treaty is a relatively concise framework for assessing whether to authorize or deny proposed conventional weapons transfers by States Parties, there exists controversy as to the meaning of certain key provisions. Furthermore, the treaty requires a national regulatory body to authorize proposed transfers of conventional weapons covered by the treaty, but does not detail how such a body should be established and how it should effectively function. The Arms Trade Treaty: A Commentary explains in detail each of the treaty provisions, the parameters for prohibitions or the denial of transfers, international cooperation and assistance, and implementation obligations and mechanisms. As states ratify and implement the Treaty over the next few years, the commentary provides invaluable guidance to government officials, commentators, and scholars on the meaning of its contentious provisions. This volume describes in detail which weapons are covered by the treaty and explains the different forms of transfer that the Arms Trade Treaty regulates. It covers international human rights, trade, disarmament, humanitarian law, criminal law, and state-to-state use of force, as well as the application of the treaty to non-state actors.

In this volume, eight scholars of Indonesian Islam examine women's access to property in law courts and in village settings. The chapters go beyond the world of legal and scriptural texts to ask how women in fact fare at critical moments of marriage, divorce, and death.

Compliance is a fundamental control function within regulated industries globally. This book provides an expert introduction to corporate compliance using cases, examples and insights from the financial services sector and beyond. The author, an experienced compliance practitioner and academic, highlights compliance challenges, using examples such as Wells Fargo, whistleblowing in the financial services and the mis-selling of payment protection insurance in the UK banking sector. The book explores strategies for creating compliant cultures and fostering regulatory trust, whilst practical guidance is provided on anticipating regulatory changes. Addressing organisational obstruction and delay, the author presents a series of valuable tools and techniques for real-world practice. An essential professional development

resource for board directors, compliance officers and other senior managers, the book also provides a unique learning and development resource for students of corporate compliance globally.

The book reveals the interconnection between social, cultural and political protest movements and social and economic changes in a post-communist country like Russia still dominated by bureaucratic rulers and "oligarchs" controlling all basic industries and mining activities. Those interests are also dominating Russia's foreign policy and explain why Russia did not succeed in becoming an integral part of Europe. The latter is, at least, wished by many Russian citizens.

We are working with Cambridge Assessment International Education to gain endorsement for this forthcoming title. Build strong subject knowledge and skills with the only published course to offer full and comprehensive coverage of the syllabus for examination from 2023. -Engage with relevant and up-to-date case examples to illustrate key topics. - Build knowledge with key elements covered and skills-targeted activities throughout. - Test understanding with a range of activities and exam-style questions. - Extend learning with Internet research boxes providing opportunities to delve further into topics.

Raising a series of questions on resolving mass disputes, and fuelling future debate, this book will provide a challenging and thought-provoking read for law academics, practitioners and policy-makers.

What does it mean to be an academic today? What kinds of experiences do students have, and how are they affected by what they learn? Why do so many students and their teachers feel like frauds? Can we learn to teach and research in ways that foster hope and deflate pretension? *Academic Life and Labour in the New University: Hope and Other Choices* addresses these big questions, discussing the challenges of teaching and researching in the contemporary university, the purpose of research and its fundamental value, and the role of the academy against the background of major changes to nature of the university itself. Drawing on a range of international media sources, political discourse and many years' professional experience, this volume explores approaches to teaching and research, with special emphasis on the importance of collegiality, intellectual honesty and courage. With attention to the intersection of large-scale institutional changes and intellectual shifts such as the rise of transdisciplinarity and the development of a pluralist curriculum, this book proposes the pursuit of more ethical, compassionate and critical forms of teaching and research. As such, it will be of interest not only to scholars of cultural studies and education, but to all those who care about the fate of the university as an institution, including young scholars seeking to join the academy.

Manufactured Milk Products Journal

Understanding the Social Economy and the Third Sector

Re-Imagining Sustainable Urban Transitions

North African Politics

How to Be an Impeccable and Profitable Corporate Citizen

The Idea of a Human Rights Museum

**The African continent is currently in the midst of simultaneously unfolding and highly significant demographic, economic, technological, environmental, urban and socio-political transitions. Africa's economic performance is promising, with booming cities supporting growing middle classes and creating sizable consumer markets. Despite significant overall growth, the continent continues to suffer under very rapid urban growth accompanied by massive urban poverty and many other social problems. These seem to indicate that the development trajectories followed by African nations since post-independence may not be able to deliver on the aspirations of broad based human development and prosperity for all. This report, therefore, argues for a bold re-imagining of prevailing models in order to steer the ongoing transitions towards greater sustainability based on a thorough review of all available options. That is especially the case since the already daunting urban challenges in Africa are now being exacerbated by the new vulnerabilities and threats associated with climate and environmental change. This series has been developed specifically for the Cambridge International AS & A Level Mathematics (9709) syllabus to be examined from 2020. Cambridge International AS & A Level Mathematics: Mechanics matches the corresponding unit of the syllabus, with clear and logical progression through. It contains materials on topics such as velocity and acceleration, force and motion, friction, connected particles, motion in a straight line, momentum, and work and energy. This coursebook contains a variety of features including recap sections for students to check their prior knowledge, detailed explanations and worked examples, end-of-chapter and cross-topic review exercises and 'Explore' tasks to**

encourage deeper thinking around mathematical concepts. Answers to coursebook questions are at the back of the book.

This report provides an overview of the work of the European Union Committee in session 2012–13. It highlights some of the key policies examined through scrutiny work and inquiries, reflects on the Committee's work with the EU institutions and other national parliaments, and gives a forward look at the work being undertaken in session 2013–14. *Understanding the Social Economy and the Third Sector* fills a significant gap by bringing together a comprehensive range of topics in one resource. Students will gain a working knowledge of the social economy and social capital, illustrated by comparison with the private and public sectors and real-world examples.

The organization of human smuggling from the Middle East and Africa through Turkey and the Eastern Mediterranean has become a contemporary political concern throughout Europe, receiving intense and polarised media attention. This timely book reformulates how we conceive of human smuggling, challenging popular and political conceptions of the practice in Europe. This book proposes a new framework for examining the causes and effects of human smuggling in the Mediterranean, analysing the contingent patterns of human smuggling in the countries of the Eastern Mediterranean with a geographic focus on Turkey. Building on unique empirical material from fieldwork in Turkey and Greece, this book describes the rise of human smuggling as a practice, viewed through a framework of multiple 'contingencies'. Uniquely, this book includes in-depth testimonies of migrants who have survived crossing the Aegean Sea and details the strategies and tactics of the facilitators who help them. In *Human Smuggling in the Eastern Mediterranean*, Theodore Baird puts a human face to the tragedies occurring in the Mediterranean while maintaining that contingent historical, political, economic, and geographic forces have aligned to propel the practice of human smuggling forward. The book will be of interest to scholars working in migration studies, as well as scholars in the fields of sociology, criminology, law, political science, anthropology, and geography.

*Japanese Patent Law Cases and Comments* Edited by Christopher Heath & Atsuhiko Furuta About the Editors:

Christopher Heath is a judge at the European Patent Office and former head of the Max Planck Institute's Asian Department. Atsuhiko Furuta is an administrative judge at the Japanese Patent Office. He graduated with a Master's in Physics from the University of Tokyo and for two years was a guest researcher at the Max Planck Institute for Patent, Copyright and Competition Law in Munich. About this book: *Japanese Patent Law* is the first comprehensive work in English on all aspects of Japanese patent law presenting 66 cases with expert explanatory comments from academics, attorneys, judges and Japanese Patent Office officials. While not a common law jurisdiction, Japanese patent law in the past 20 years has been shaped by landmark decisions of the Supreme Court and, since 2005, the IP High Court.

Approaching Japanese patent law via landmark decisions is arguably the most comprehensive manner of understanding the subject matter. Many of the cases appear in English for the first time. What's in this book: Following an informative introduction explaining the economic importance of the patent system for Japan, the cases cover such specific issues as the following: definition of an invention; assessment of prior art, novelty and inventive step; rights of co-inventors; disclaimers, corrections and amendments; scope and limits of patent protection; distinction between repair and reconstruction; doctrine of equivalents; domestic and international jurisdiction in patent matters; interim proceedings and measures; defence of invalidity; damage calculation; patent term extension system; and utility models. Each case commentary follows a uniform structure, including background, summary of the facts, analysis and comparative remarks. The latter allows the reader to put developments in Japan in an international context. How this will help you: With the wealth of knowledge it makes available – leading Japanese patent cases in English translation, comparative case commentaries by leading experts on Japanese patent law, comprehensive analytical coverage of all aspects of Japanese patent law and coverage of related fields such as licensing, antitrust and civil procedure – this easy-to-use book will be warmly welcomed by patent attorneys and other practitioners (including Japanese patent practitioners advising foreign clients), patent academics and patent offices worldwide.

This book examines India's naval strategy within the context of Asian regional security. Amidst the intensifying geopolitical contestation in the waters of Asia, this book investigates the growing strategic salience of the Indian Navy. Delhi's expanding economic and military strength has generated a widespread debate on India's prospects for shaping the balance of power in Asia. This volume provides much needed texture to the abstract debate on India's rise by focusing on the changing nature of India's maritime orientation, the recent evolution of its naval strategy, and its emerging defence diplomacy. In tracing the drift of the Navy from the margins of Delhi's national security consciousness to a central position, analysing the tension between its maritime possibilities and the continentalist mind set, and in examining the gap between the growing external demands for its security contributions and internal ambivalence, this volume offers rare insights into India's strategic direction at a critical moment in the nation's evolution. By examining the internal and external dimensions of the Indian naval future, both of which are in dynamic flux, the essays here help a deeper understanding of India's changing international possibilities and its impact on Asian and global security. This book will be of much interest to students of naval strategy, Asian politics, security studies and IR, in general.

Politicians and regulators do not run businesses. Bribery and Corruption is for managers who do. It will help you transform uncertainties and problems created via legislation and regulations (such as The UK Bribery Act, The Proceeds of Crime Act, The Foreign Corrupt Practices Act, Sarbanes-Oxley) into opportunities to: ☐ Maintain entrepreneurial, profitable, and enjoyable working environments while easily surpassing compliance standards ☐ Control incoming, internal, outgoing, competitive corruption and fraud ☐ Take decisions in grey areas, confidently Bribery and Corruption frames control and compliance in an entirely different way: not as a brake on your company's forward motion but as essential protective equipment enabling you to go faster and further in safety. Written by the world's leading practitioners in the fields of fraud prevention, detection and investigation with massive practical experience in both commercial and governmental sectors, Bribery and Corruption exposes the misconceptions, myths and corruption of the word bribery and suggests effective solutions that go well beyond simple compliance. It commits to assertive managerial rather than timorous legal solutions to anti-bribery and other laws. It explains how processes can be tested - using automated fraud detection software - to expose current cases of fraud and corruption or to provide assurance that controls are functioning optimally. It tackles the usually ignored problems of stratospheric, political, academic and media corruption, which often motivate commercial bribery. It exposes the dangers of employee to employee corruption; skulduggery by blue collar workers and lots more. Over the last 25 years, Mike Comer, occasionally writing with Tim Stephens, has been responsible for some of the most readable and influential books on fraud. Bribery and Corruption is another tour de force, complete, authoritative and yet a great pleasure to read.

Annual Report

Eric Hobsbawm

The Arms Trade Treaty: A Commentary

Vital Statistics on American Politics 2015-2016

Cases and Comments

The War Report

There is no other print source, online source, or Web search engine that provides the wide range and depth of insight found in Vital Statistics on American Politics. This new 2015-2016 edition is updated with the most recent information available. The editors consult hundreds of sources to calculate and locate the data, facts, and figures that offer a vivid and multifaceted portrait of the broad spectrum of United States politics and policies. Students, professional researchers, and interested citizens will find chapters devoted to key subject areas such as elections and political parties, public opinion and voting, the media, the three branches of U.S. government, foreign, military, social and economic policy, and much more. For depth of information and ease of use, this updated edition is the best resource of its kind available and should be a key component of all academic and large public library collections.

As the economies of East Asia grow ever stronger, their need for energy resources increases, which in turn compels closer relations with the countries of the Middle East. This book examines the developing relations between the countries of East Asia, especially China and Japan, with the countries of the Middle East. It looks at various key bilateral relationships, including with Iran and Syria, discusses the impact on the United States' hegemony in both regions, considers whether the new relations represent a contribution to, or a threat to, peace and stability, and assesses the implications of the changes for patterns of regional and global international relations systems.

"The Idea of a Human Rights Museum" is the first book to examine the formation of the Canadian Museum for Human Rights and to situate the museum within the context of the international proliferation of such institutions. Sixteen essays consider the wider political, cultural and architectural contexts within which the museum physically and conceptually evolved drawing comparisons between the CMHR and institutions elsewhere in the world that emphasize human rights and social justice. This collection brings together authors from diverse fields—law, cultural studies, museum studies, sociology, history, political science, and literature—to critically assess the potentials and pitfalls of human rights education through "ideas" museums. Accessible, engaging, and informative, the collection's essays will encourage museum-goers to think more deeply about the content of human rights exhibits. The Idea of a Human Rights Museum is the first title in the University of Manitoba Press's Human Rights and Social Justice Series. This series publishes work that explores the quest for social justice and the basic rights and freedoms to which all human beings are entitled, including civil, political, economic, social, collective, and cultural rights.

Academic Life and Labour in the New University

This book is concerned with both the national security concerns of Asian maritime nations and the security of the Asian maritime commons. These are defined as the Pacific and Indian Oceans and associated seas, bays, and gulfs, with their included sea lines of communication (SLOCs). The most useful geographical designation for maritime Asia is the "Indo-Pacific." Bernard Cole provides both a survey of the maritime strategies of the primary nations of the Indo-Pacific region and an evaluation of the domestic and international politics that drive those strategies. The United States, Canada, Russia, Japan, North Korea, South Korea, China, the Philippines, Brunei, Indonesia, Vietnam, Singapore, Malaysia, Myanmar, India, Pakistan, Iran, the smaller Indian Ocean and Persian Gulf states are all surveyed and analyzed. The United States, Japan, China, and India not surprisingly draw the most attention, given their large modern navies and distant strategic reach. The author concludes that the United States remains the dominant maritime power in this huge region, stretching from Canada to the Persian Gulf, despite its lack of a traditionally strong merchant marine. U.S. maritime power remains paramount, due primarily to its dominant navy.

The Chinese naval modernization program deservedly receives a good deal of public attention, but Cole argues that on a day-to-day basis the Japanese Maritime Self-Defense Force, as its navy is named, is the most powerful maritime force in Far Eastern waters, while the modernizing Indian Navy potentially dominates the Indian Ocean. In fact, a focus of this work is the exemplary description of all the region's navies, with the author noting the naval arms race that is underway, particularly in the area of submarine acquisition. Cole is careful to couch this phenomenon in the regional concerns about Chinese naval expansion and the desire to ensure a continued, massive U.S. naval presence. The current naval developments in the region evince elements of a naval arms race, but lack the coherent maritime strategies to make naval developments dangerous to regional peace and security. Most telling will be whether United States power and focus remain on the region, while adjusting to continued Chinese maritime power in a way acceptable to both nations. No other current or recent work provides such a complete description of the Indo-Pacific region's navies and maritime strategies, while analyzing the current and future impact of those forces.

This timely book provides a cutting-edge assessment of how the dynamic ocean regions at the highest latitudes on Earth are being managed in an era of unprecedented environmental change. The Arctic and Southern Oceans are experiencing transformative env

The new edition of the book Study Guide for CTET Paper 2 - English 4th edition (Class 6 - 8 Social Studies/ Social Science teachers), has been updated with the CTET Solved Papers of July 2013 to Sep 2018. • The languages covered in the book are English (1st language) and Hindi (2nd language). • The book provides separate sections for Child Development & Pedagogy, English Language, Hindi Language and Social Studies/ Social Science. • Each section has been divided into chapters. For each chapter an exhaustive theory has been provided which covers the complete syllabus as prescribed by the CBSE/ NCERT/ NCF 2005. • This is followed by 2 sets of exercise. • The exercise 1 contains a set of MCQs from the PREVIOUS YEAR Question Papers of CTET and various STET's. • The exercise 2, "TEST YOURSELF" provides carefully selected MCQs for practice. • The book is a must for all the candidates appearing in the Paper 2, Social Studies stream of the CTET and State TETs like UPTET, Rajasthan TET, Haryana TET, Bihar TET, Uttarakhand TET, Punjab TET, Tamil Nadu TET etc.

This book investigates counterterrorism responses from a strategic-culturalist perspective, focusing on France and Italy in the post-9/11 era. Terrorism occupies a predominant space within contemporary political debate across all European countries. Recent attacks in Europe have raised many questions about the status of counterterrorism structures within European countries, revealing a wide range of practical as well as discursive security implications. This work provides an original contribution to the understanding of counterterrorism by asking how values, norms, and a shared sense of identity matter in policy dynamics. It explores and assesses which cultural elements are relevant for the fight against terrorism and investigates the impact which these elements can have on practical approaches to terrorism. Despite the current attention to terrorist attacks in Europe, the cases of France and Italy in counterterrorism affairs are particularly overlooked by the existing literature; this book analyses, questions, and examines the strategy of these two countries through the instruments offered by the culturalist approaches to strategy. This book will be of much interest to students of terrorism studies, discourse analysis, European politics, security studies, and international relations in general.

The theme for the November 2017 conference was Striving for 100% Success Rate. Papers focus on the tools and techniques needed for maximizing the success rate in every aspect of the electronic device failure analysis process.

The IMF's principal statistical publication, International Financial Statistics (IFS) Online, is the standard source of international statistics on all aspects of international and domestic finance. For most countries, IFS Online reports data on balance of payments, international investment position, international liquidity, monetary and financial statistics, exchange rates, interest rates, prices, production, government accounts, national accounts, and population. Updated monthly.

In the aftermath of the turmoil that shook North Africa in late 2010 and early 2011, commentators and analysts have sought explanations to the factors that triggered the uprisings and to understand why a region, seemingly characterized by relative stability for decades, would suddenly erupt in convulsions. Had an underlying dynamism in the region overwhelmed what were ostensibly stable authoritarian regimes? What were the connections to events and dynamics beyond the region, such as countries in the Middle East, international commodity markets, and environmental factors, amongst others? Why had allies abetted authoritarianism for so long, and what were the implications for such alliances? North African Politics: Change and continuity brings together experts to explore these questions, providing in-depth analyses of important developments in the region, which build upon and complement the 2008 companion volume, North Africa: Politics, Region and the Limits of Transformation. This 21-chapter volume is a key contribution that responds to the need in the Anglo-American sphere for sustained, critical studies on North Africa and examines political, economic, security, social and military aspects of the region. Focused studies on individual countries allow detailed discussion of regional factors. The book also examines extrinsic, trans-regional dynamics, such as North Africa's influential interdependencies with the Levant and the Gulf, Europe, Sahelian and sub-Saharan Africa, and North America. Its innovative approach provides new perspectives on North Africa, extending its research scope to include Egypt and exploring China's evolving role in the region. Providing an important contribution in the assessment of the ever-shifting political and social tectonics within and beyond North Africa, North African Politics is an essential resource for students, scholars and policy makers in Middle Eastern and North African Studies, and beyond.

In July 2011, South Sudan was granted independence and became the world's newest country. Yet just two-and-a-half years after this momentous decision, the country was in the grips of renewed civil war and political strife. Hilde F. Johnson served as Special Representative of the Secretary-General and Head of the United Nations Mission in the Republic of South Sudan from July 2011 until July 2014 and, as such, she was witness to the many challenges which the country faced as it struggled to adjust to its new autonomous state. In this book, she provides an unparalleled insider's account of South Sudan's descent from the ecstatic celebrations of July 2011 to the outbreak of the disastrous conflict in December 2013 and the early, bloody phase of the fighting. Johnson's frequent personal and private contacts at the highest levels of government, accompanied by her deep knowledge of the country and its history, make this a unique eyewitness account of the turbulent first three years of the world's newest – and yet most fragile – country.
