One of Mashable's “17

books every activist should read in 2019”
Twenty years after Columbine, a leading gun control activist offers a radical argument for the gun control movement

File Type PDF Nra Concealed Carry Guide

our country desperately needs Ninety-six people die from guns in America every single day. Twelve thousand Americans are murdered each year. The United States has more

File Type PDF Nra Concealed Carry Guide

mass shootings, gun suicides, and nonfatal gun injuries than any other industrialized country in the world. Gun-safety advocates have tried to solve

File Type PDF Nra Concealed Carry Guide

these problems with incremental changes such as background checks and banning assault style military weapons. They have fallen short. In order to significantly

File Type PDF Nra Concealed Carry Guide

and permanently reduce gun deaths the United States needs a bold new approach: a drastic reduction of the 390 million guns already in circulation and a new

File Type PDF Nra Concealed Carry Guide

movement dedicated to a future with fewer guns. In *Guns Down*, Igor Volsky tells the story of how he took on the NRA just by using his Twitter account,

File Type PDF Nra Concealed Carry Guide

describes how he found common ground with gun enthusiasts after spending two days shooting guns in the desert, and lays out a blueprint for how

File Type PDF Nra Concealed Carry Guide

citizens can push their governments to reduce the number of guns in circulation and make firearms significantly harder to get. An aggressive licensing and

File Type PDF Nra Concealed Carry Guide

registration initiative, federal and state buybacks of millions of guns, and tighter regulation of the gun industry, the gun lobby, and gun sellers will

File Type PDF Nra Concealed Carry Guide

build safer communities for all. Volsky outlines a New Second Amendment Compact developed with policy experts from across the political spectrum, including bold
