A real-world action plan for educators to create personalized learning experiences Learning Personalized: The Evolution of the Contemporary Classroom provides teachers, administrators, and educational leaders with a clear and practical guide to personalized learning. Written by respected teachers and leading educational consultants Allison Zmuda, Greg Curtis, and Diane Ullman, this comprehensive resource explores what personalized learning looks like, how it changes the roles and responsibilities of every stakeholder, and why it inspires innovation. The authors explain that, in order to create highly effective personalized learning experiences, a new instructional design is required that is based loosely on the traditional model of apprenticeship: learning by doing. Learning Personalized challenges educators to rethink the fundamental principles of schooling that honors students' natural willingness to play, problem solve, fail, re-imagine, and share. This groundbreaking resource: Explores the elements of personalized learning and offers a framework to achieve it Provides a roadmap for enrolling relevant stakeholders to create a personalized learning vision and reimagine new roles and responsibilities Addresses needs and provides guidance specific to the job descriptions of various types of educators, administrators, and other staff This invaluable educational resource explores a simple framework for personalized learning: co-creation, feedback, sharing, and learning that is as powerful for a teacher to re-examine classroom practice as it is for a curriculum director to reexamine the structure of courses.

A Course in Miracles is the acclaimed spiritual guide that teaches the way to universal love and peace is by undoing guilt through forgiving others. The "miracles" of the title refers to shifts in perception from fear to love, which fosters the healing and sanctification of relationships. Although expressed in terms of traditional Christianity, this life-changing work constitutes nonsectarian, universal spiritual teachings. The three-part approach begins with an explanation of the course's theory and the development of the experience of forgiveness. The second consists of a workbook, comprising 365 lessons — an exercise for each day of the year — intended to influence students' perceptions. The third section presents a manual for teachers, in which the question-and-answer format provides responses for likely inquiries as well as definitions for terms used throughout the course. Written by Dr. Helen Schucman, a clinical and research psychologist, and edited by her colleague at Columbia University, Dr. William Thetford, from 1965 to 1970, A Course in Miracles has been translated into more than 20 languages

and sold millions of copies around the world.

"Family isn't always your relatives. It's the ones who accept you for who you are. The ones who would do anything to see you smile, and who love you no matter what." -Unknown Teachers do so much more than just teach academics. They build a sense of community within their classrooms, creating a home away from home where they make their students feel safe, included, and loved. With its heartfelt message and colorfully whimsical illustrations, "Our Class is a Family" is a book that will help build and strengthen that class community. Kids learn that their classroom is a place where it's safe to be themselves, it's okay to make mistakes, and it's important to be a friend to others. When hearing this story being read aloud by their teacher, students are sure to feel like they are part of a special family. And currently, during such an unprecedented time when many teachers and students are not physically IN the classroom due to COVID-19 school closures, it's more important than it's ever been to give kids the message that their class is a family. Even at a distance, they still stick together.

In a clear and easy-to-follow format, Grand Master Helio Gracie addresses different aspects of the Brazilian jiu-jitsu method that bears his name. Learn how to systematically progress and technically improve mat game, regardless of background or grappling ability.

A year-long study of the writing development of 27 first through third graders in an English/Spanish bilingual program was conducted during the 1980-81 school year. Samples of the children's writing were collected at four intervals, coded for computer tallying, and analyzed in terms of code-switching, spelling, punctuation and segmentation, structural features, stylistic devices, and content. Additionally, the context in which the writing developed was evaluated by classroom observations, teacher interviews, review of familial backgrounds, and a survey of the community language situation. Myths about bilingual language proficiency, biliteracy, bilingual education, teaching writing, and learning to write are all countered by evidence presented in this study. In a discussion of implications, the concept of a whole language approach to writing instruction is supported, in which authentic and functional texts are offered to and produced by children. Examples of the children's writing

with appropriate translations are given along with various tables. Informal follow-up information is presented in three epilogues dealing with changes in the researcher's commitment to the study's original writing theories, the writing of some students a year after the study; and a chronological outline of the demise of the bilingual program used in the study. Appendices list interview questions used for teachers and aides and categories for coding the writing data. This book contains 134 references. (ALL)

Most of us do not remember that we have volunteered to remember our multidimensional heritage and unite with our true SELF in the higher worlds. Remembering this unity would be difficult indeed with the knowledge of only one lifetime. Fortunately, as we each begin to awaken, we remember our "past lives." These "past lives" are actually all occurring at the same "time" in different space-time coordinates. Shature, the main character, is studying on the fifth dimension and acting as the Higher Self to her different, third dimensional lives. Shature does this by entering into a dome, which allows her to interface with the physical world. As she moves through these layers of multidimensional love, she discovers what she was and who she is meant to be.

This open access edited volume is a comparative effort to discern the short-term educational impact of the covid-19 pandemic on students, teachers and systems in Brazil, Chile, Finland, Japan, Mexico, Norway, Portugal, Russia, Singapore, Spain, South Africa, the United Kingdom and the United States. One of the first academic comparative studies of the educational impact of the pandemic, the book explains how the interruption of in person instruction and the variable efficacy of alternative forms of education caused learning loss and disengagement with learning, especially for disadvantaged students. Other direct and indirect impacts of the pandemic diminished the ability of families to support children and youth in their education. For students, as well as for teachers and school staff, these included the economic shocks experienced by families, in some cases leading to food insecurity and in many more causing stress and anxiety and impacting mental health. Opportunity to learn was also diminished by the shocks and trauma experienced by those with a close relative infected by the virus, and by the constraints on learning resulting from students having to learn at home, where the demands of schoolwork had to be negotiated with other family necessities, often sharing limited space. Furthermore, the prolonged stress caused by the uncertainty over the resolution of the pandemic and resulting from the knowledge that anyone could be infected and potentially lose their lives, created a traumatic context for many that undermined the necessary focus and dedication to schoolwork. These individual effects were reinforced by community effects, particularly for students and teachers living in communities where the multifaceted negative impacts resulting from the pandemic were pervasive. This is an open access book.

He also addresses the phenomenon of art critiques as a microcosm for teaching art as a whole and dissects real-life critiques highlighting presuppositions and dynamics that make them confusing and suggesting ways to make them more helpful. Elkins' nonsense approach clears away the assumptions about art instruction that are not borne out by classroom practice. For example, he notes that despite much talk about instilling visual acuity and teaching technique, in practice neither teachers nor students behave as if those were their principal goals. He addresses the absurdity of pretending that sexual issues are absent from life drawing classes and questions the practice of holding up great masters and masterpieces as models for students capable of producing only mediocre art. He also discusses types of art--including art that takes time to complete and art that isn't serious--cannot be learned in studio art classes.

Award-winning author and illustrator Duncan Tonatiuh tells the story of Amalia Hernández, dancer and founder of El Ballet Folklórico de México.

Published in time for the 100th anniversary of Hernández's birth, *Danza!* is the first picture book about the famous dancer and choreographer. It is a celebration of Hernández's life and of the rich history of dance in Mexico. As a child, Amalia always thought she would grow up to be a dancer. She saw a performance of dancers in her town square. She was fascinated by the way the dancers twirled and swayed, and she knew that she would be a dancer, too. She began to study many different types of dance, including ballet and modern, under some of the best teachers in the country. She traveled throughout Mexico studying and learning regional dances. Soon she founded her own dance company, El Ballet Folklórico de México. She integrated her knowledge of ballet and modern dance with folkloric dances. The group began to perform all over the country and soon became an international sensation that still tours today. Duncan Tonatiuh's picture books have been honored with many awards and accolades, including the Pura Belpré Award, the Robert F. Sibert Award, and the New York Times Best Illustrated Book Award. With Tonatiuh's distinctive and inspired artwork and colorful drawings that seem to leap off the page, *Danza!* will enthrall and inspire young readers with the fascinating story of an important dancer and choreographer.
