From Testing to Assessment: English as an International Language provides a critical review of conventional and alternative approaches to the assessment of English literacy skills in various parts of the world. It presents empirical studies conducted in three major settings: in countries such as Japan and Brazil where English functions as the language of international commerce; in multilingual countries such as Nigeria and Zimbabwe where English is the national language of education and government; and in such countries as Canada, the United Kingdom and the United States where English is the dominant language. The book opens with a discussion of language assessment in relation to debates about the nature of literacy; it concludes with a discussion of policy implications, which is grounded in literacy theory as well as in practical constraints such as available human and material resources.

Based on part of the material from the author's best-selling book 'A Complete O-level Mathematics', this book provides the most effective examination revision guide for the modern 'O' level, GCSE.

This is an autobiography based on my true story. It is about real events, real people and real life. It is the story of a middle aged man who worked hard and had a successful career in Sales and Marketing after graduating from polytechnic with a Bsc Hons degree in Applied Biology 2:2. Whose mum was killed in a tragic road accident while rushing home from work on a busy Saturday night she ran into the path of an on coming car and was killed outright. My dad and me had to race down to the hospital to recognize her. It took many weeks to get over this event and it almost drove dad to drink. It was clear I had to be strong for him and my brother.

Feminism and 'The Schooling Scandal' brings together feminist contributions from two generations of educational researchers, evaluating and celebrating the field of gender and education. The focus throughout is on the years of compulsory schooling, examining key concepts in gender and education identified and developed by international thinkers in educational feminism. Topics covered include: social class, ethnicity and sexuality in relation to experiences in school; theories and methodologies for understanding gender; pedagogy and practice in education; and the direction of educational policy and the 'problem of boys'. Providing a comprehensive overview of contemporary research and theory emerging from 'second wave' feminism and assessing their impact on pupils and teachers in today's schools and classrooms, this book forms essential reading for anyone studying gender and education.

The accounts of people who attended school in the 1950s and 1960s reveal indiscipline, injustice and indifference. Bullying was endemic - by pupils and teachers. This book makes a case that primary and secondary schools in England and Wales, have improved. It challenges the public perceptions and pessimistic views so often proclaimed by the media.
