International Practices to Promote Budget Literacy

OCR GCSE Computer Science (9-1) J277

GCSE Mathematics for OCR Foundation Student Book

Exam board: OCR Level: GCSE Subject: Business First teaching: September 2017 First exams: Summer 2019 Target success in OCR GCSE (9-1) Business with this proven formula for effective, structured revision; key content coverage is combined with exam-style tasks and practical tips to create a revision guide that students can rely on to review, strengthen and test their knowledge. With My Revision Notes every student can: - Plan and manage a successful revision programme using the topic-by-topic planner - Consolidate their knowledge by working through clear and focused coverage of the OCR GCSE Business specification - Test understanding and identify areas for improvement with regular 'Check your understanding' activities and answers, plus end-of-topic 'I can' checklists - Improve exam technique through practice questions, expert tips and examples of typical mistakes to avoid - Revise, remember and accurately use key business terms with definitions alongside the text for quick and easy reference

he aim of this book is to provide a comprehensive and accessible text for students, covering Papers 1 and 2 in the latest OCR GCSE J277 Computer Science specification. It will be invaluable as a course text for students throughout the course. It is divided into eight sections, each broken down into manageable chapters of roughly one lesson. Sections 6 and 7 of the textbook cover algorithms and programming fundamentals with a theoretical approach to provide students with experience of writing, tracing and debugging pseudocode solutions without the aid of a computer. These sections would complement practical programming experience. Each of the eight sections cover one of the major topics in this course, and each subtopic contains sample examination questions from past papers, which can be set as homework.

An OCR endorsed textbook Build strong knowledge and skills with this market-leading Student Book from OCR's Publishing Partner for GCSE Business, fully updated by subject experts for the 2017 specification, it provides comprehensive content coverage, engaging case studies and assessment activities. - Develops understanding of business concepts and theories through clear explanations, illustrated by diagrams and cartoons that help all learners access the content - Cements and extends subject knowledge with case studies that encourage students to think commercially about contemporary issues and contexts - Enables students to apply their learning and strengthen their investigative, analytical and evaluation skills as they progress through a range of activities - Prepares students for assessment with a variety of practice questions and handy tips for successfully answering different question types - Supports revision by summarising the learning outcomes, key terms and facts for each unit

The aim of this book is to provide an accessible text for students, covering each of the elements in the OCR GCSE (9-1) Computer Science specification J276. It will be invaluable both as a course text and in revision for students nearing the end of the course. It is divided into eight sections, each broken down into manageable chapters of roughly one lesson. Sections 5 and 6 of the textbook cover algorithms and programming concepts with a theoretical approach to provide students with experience of writing, tracing and debugging pseudocode solutions without the aid of a computer. These sections would complement practical programming experience. Each of the eight sections cover one of the major topics in this course, and each subtopic contains sample examination questions from past papers, which can be set as homework.

Budget literacy is defined as 'the ability to read, decipher, and understand public budgets to enable and enhance meaningful citizen participation in the budget process'. It is comprised of two main parts - (i) a technical understanding of public budgets, including familiarity with government spending, tax rates and public debt and; (ii) the ability to engage in the budget process, comprising of practical knowledge on day-to-day issues, as well as an elementary understanding of the economic, social and political implications of budget policies, the stakeholders involved and when and how to provide inputs during the annual budget cycle. Given that no international standards or guidelines have been established for budget literacy education to date, this book seeks to address this gap by taking stock of illustrative initiatives promoting budget literacy for youth in selected countries. The underlying problem is that when supply-side actors in the budget process -- governments -- simplify and disseminate budget information for demand-side actors -- citizens -- this information will then be used by citizens to provide feedback on the budget. However, since citizens are often insufficiently informed about public budgets to constructively participate in budget processes one way to empower them and to remedy the problem of "budget illiteracy" is to provide budget-literacy education in schools to youth, helping them evolve into civic-minded adults with the essential knowledge needed for analyzing their government's fiscal policy objectives and measures, and the confidence and sense of social responsibility to participate in the oversight of public resources. This book elaborates on approaches, learning outcomes, pedagogical strategies and assessment approaches for budget literacy education, and presents lessons that are relevant for the development, improvement, or scaling up of budget literacy initiatives.
