

Ocr Gateway Science Past Papers

Manage your own revision with step-by-step support from experienced teachers and examiners Sean O'Byrne and George Rouse. Use specific case studies to improve your knowledge of Computer Science. Apply terms accurately with the help of definitions and key words. -Plan and pace your revision with the revision planner -Use the expert tips to clarify key points -Avoid making typical mistakes with key expert advice -Test yourself with end-of-topic questions and answers and tick off each topic as you complete it -Get exam ready with last minute quick quizzes at www.hoddereducation.co.uk/myrevisionnotes

This text engages every student and stimulates their interest in science. It provides a simple and clear approach to all resources available, with all the help and support you need to teach the new specifications with ease and make the transition as smooth as possible.

The aim of this book is to provide an accessible text for students, covering each of the elements in the OCR GCSE (9-1) Computer Science specification J276. It will be invaluable both as a course text and in revision for students nearing the end of the course. It is divided into eight sections, each broken down into manageable chapters of roughly one lesson. Sections 5 and 6 of the textbook cover algorithms and programming concepts with a theoretical approach to provide students with experience of writing, tracing and debugging pseudocode solutions without the aid of a computer. These sections would complement practical programming experience. Each of the eight sections cover one of the major topics in this course, and each subtopic contains sample examination questions from past papers, which can be set as homework.

OCR Gateway GCSE Science

Higher Level. Revision guide

ClearRevise OCR GCSE Computer Science J277

A revision guide that covers the core content of the OCR Science A (single award) specification, from the Twenty First Century Science Suite.

The Wright Science Pocket Booster is designed to assist those students embarking on their GCSE Science examinations. This book has been written to cover the key facts for the first biology exam paper for the higher tier on OCR Gateway A. Inside the book, in addition to the printed notes, you also have QR codes that will take you directly to a video that supports that topic. This book is written for the separate science GCSE Biology course. It has been written by a secondary science teacher teaching in England using the resources my students have always found to be helpful.

This revision guide includes questions in the appropriate style for the assessment, exam practice, exam tips and dedicated textbooks for both higher and foundation tier. Written for the new Suffolk (OCR B) specification, it matches its staged assessment exactly.

Absolute clarity is the aim with a new generation of revision guide for the 2020s. This guide has been expertly compiled and edited by successful former teachers of Computer Science, highly experienced examiners and a good dollop of scientific research into what makes revision most effective. Past examinations questions are essential to good preparation, improving understanding and confidence. This guide has combined revision with tips and more practice questions than you could shake a stick at. All the essential ingredients for getting a grade you can be really proud of. Each specification topic has been referenced and distilled into the key points to make in an examination for top marks. Questions on all topics assessing knowledge, application and analysis are all specifically and carefully devised throughout this book.
