Caldecott Medal Winner "the book is a triumph, the definitive Noah's Ark."—*Publishers Weekly Winner of the Caldecott Medal, an ALA Notable Children's Book, and a New York Times Best Illustrated Book of the Year, Peter Spier's Noah's Ark has been the iconic edition of this tale for over 40 years, in print continuously since its debut in 1977. In Spier's imaginative retelling, readers witness the danger and the grandeur of the terrifying flood but also the lighter moments: Noah's wife jumping on a crate to avoid the rats; Noah shooing all but two bees from a busy hive; and all the animal babies being born in the spring. It's an illustration feat that's both majestic and tender.*

This book on Noah's Ark is a one-of-a-kind compendium of information about animal-care methods, food-preservation techniques, animal-handling techniques, etc. It discusses in great detail how 8 people could have cared for 16,000 animals using pre-scientific technology. Whether or not the reader believes in the Bible or not, he or she can be fully confident that my book conveys substantive information about the workability of Noah's Ark and its inhabitants.

From Noah's Ark to Diller + Scofidio's " Blur " Building, a distinguished art historian maps new ways to think about architecture's origin and development. Trained as an art historian but viewing architecture from the perspective of a " displaced philosopher, " Hubert Damisch in these essays offers a meticulous parsing of language and structure to " think architecture in a different key, " as Anthony Vidler puts it in his introduction. Drawn to architecture because it provides " an open series of structural models, " Damisch examines the origin of architecture and then its structural development from the nineteenth through the twenty-first centuries. He leads the reader from Jean-Fran ç ois Blondel to Eug è ne Viollet-le-Duc to Mies van der Rohe to Diller + Scofidio, with stops along the way at the Temple of Jerusalem, Vitruvius's De Architectura, and the Louvre. In the title essay, Damisch moves easily from Diderot's Encylop é die to Noah's Ark (discussing the provisioning, access, floor plan) to the Pan American Building to Le Corbusier to Ground Zero. Noah's Ark marks the origin of construction, and thus of architecture itself. Diderot's Encylop é die entry on architecture followed his entry on Noah's Ark; architecture could only find its way after the Flood. In these thirteen essays, written over a span of forty years, Damisch takes on other histories and theories of architecture to trace a unique trajectory of architectural structure and thought. The essays are, as Vidler says, " a set of exercises " in thinking about architecture.
