

Online Free Tender Documents For In Kenya

Bids, Tenders and Proposals is a practical guide to winning contracts and funding through competitive bids, proposals and tenders. Written in a clear, accessible style using examples and checklists from real-life winning bids and tenders, this book explains how to create bids that are outstanding in both technical quality and value for money. This fully updated fifth edition extends the scope and content of the book, making it suitable for established contractors as well as anyone who needs to put together a bid for business or funding. This timely new edition covers the 2015 EU regulations for proposals, bids and tenders, including the latest regulatory changes to ensure that the reader has the most current guidelines. It also includes new content on bidding for contract opportunities in international markets and information resources to support bids. Bids, Tenders and Proposals provides fully up-to-date best practice and is essential reading for anyone involved in tendering for new business. Online supporting resources for this book include checklists and sample templates for preparing a successful bid.

Disability and Shopping:Customers, Markets and the State provides an examination of the diverse experiences and perspectives of disabled customers, industry and civil society. It discusses how the interaction between the three stakeholders should be shaped at aiming to decrease inequality and marginalisation. Shopping is a part of everyday modern life and yet businesses struggle to adequately meet the needs of 80 million disabled customers in the European Union single market. While there has been extensive research into how individuals engage in customer roles and experience, and how businesses and policies both shape and respond to these, little is known of the same dynamics and practices regarding people with impairments. This book addresses this need by revealing the perspectives, interactions and experiences of disabled customers and their interaction with policy and business. It will be required reading for all scholars and students of disability studies, sociology, marketing and customer relations.

In defining the state of the art of E-Government, EGOV 2002 was aimed at breaking new ground in the development of innovative solutions in this important field of the emerging Information Society. To promote this aim, the EGOV conference brought together professionals from all over the globe. In order to obtain a rich picture of the state of the art, the subject matter was dealt with in various ways: drawing experiences from case studies, investigating the outcome from projects, and discussing frameworks and guidelines. The large number of contributions and their breadth testify to a particularly vivid discussion, in which many new and fascinating strands are only beginning to emerge. This begs the question where we are heading in the field of E-Government. It is the intention of the introduction provided by the editors to concentrate the wealth of expertise presented into some statements about the future development of E-Government.

Information and communications technologies (ICT) have considerable potential to promote development and economic growth, by helping to foster innovation, improve productivity and expand the knowledge capacity of developing countries, especially for small and medium-sized enterprises. This is the fourth report in the series, published by UNCTAD, which seeks to assess the implications of the growing role of ICTs in economic development. Issues discussed include: the growth of e-commerce and issues for international dialogue; e-business survey results in Latin America; the use of digital and internet technologies in the creative industries, particularly in the music industry; online learning in the higher education sector; government e-commerce applications in e-procurement; legal issues and challenges of data privacy in an information society; and the ICT sector in Tunisia and the development of a national e-strategy.

Procurement of Works

Transparency in EU Procurements

Good Practices and Innovations in Public Governance

Innovation in public procurement is essential for sustainable and inclusive growth in an increasingly globalized economy. To achieve that potential, both the promises and the perils of innovation must be investigated, including the risks and opportunities of joint procurement across borders in the European Union and the United States. This in-depth research investigates innovation in public procurement from three different perspectives. First, leading academics and practitioners assess the purchase of innovation, with a particular focus on urban public contracting in smart cities involving meta-infrastructures, public-private partnership arrangements and smart contracts. A second line of inquiry looks for ways to encourage innovative suppliers. Here, the collected authors draw on emerging lessons from the US and Europe, to explore both the costs and the benefits of spurring innovation through procurement. A third perspective looks to various innovations in the procurement process itself, with a focus on the effects of joint and cross-border procurement in the EU and US landscapes. The chapters review new technologies and platforms, the increasingly automated means of selecting suppliers, and the related efficiencies that "big data" can bring to public procurement. Expanding on research in the editors' prior volume, Integrity and Efficiency in Sustainable Public Contracts: Balancing Corruption Concerns in Public Procurement Internationally (Bruylant 2014), this volume builds on a series of academic conferences and exchanges to address these issues from sophisticated academic, institutional and practical perspectives, and to point the way to future research on the contractual models that are emerging from new procurement technologies.

As governments are major buyers of goods and services, foreign companies are keen to be able to participate in procurement opportunities on an equal footing with national firms. This has given rise to the inclusion of procurement disciplines in trade agreements and to internationally-agreedgood regulatory practices in this important policy area. The contributions to this book examine how the dynamic mix of bilateral, regional, plurilateral and international norms on government procurement is reflected in purchasing practices at the national level and whether these are leading toconvergence in policies and approaches. The countries studied span both advanced, high-income economies and emerging economies. Some are members of the WTO procurement agreement, others are not. Most WTO members have decided not to commit to binding international disciplines on procurement in tradeagreements. This book explores whether there has been nonetheless internationalization of good procurement practices, and what current public purchasing processes suggest as regards the value added of signing on to binding rules of the game in this area. The approach taken in in the volume is interdisciplinary. Contributors include economists, political scientists, legal scholars, and practitioners with a solid understanding of both the extant international disciplines and national government procurement policies. Each chapter assesses the currentstate of play as regards legislation and procurement practices; the degree to which industrial policy considerations feature in the relevant regulatory frameworks; the existence and use of domestic dispute resolution and review procedures that allow firms to contest the behavior of procuringsubjects; and the availability of data on procurement processes and outcomes.

This review analyses the public procurement system, processes and tools applied in the State of Mexico, the biggest federal entity in the country in terms of population. It assesses the extent of centralisation of the procurement function, its implications and areas of opportunity to reap the benefits of such strategy.

This publication provides an overview of 144 successful innovations in governance and public administration from 50 countries that received the United Nations Public Service Awards, which is the most prestigious international recognition of excellence in public service. The purpose of this book is to disseminate, through descriptive case studies, information about innovative practices by looking at the problem that led to an innovation, at the solution that was designed and implemented to respond to the specific challenge, at the actors and steps involved in the innovation process, and lessons learned. Learning more about how public institutions from around the world have solved difficult governance challenges can be a powerful and inspirational tool for those engaged in improving public sector performance.

Benchmarking Public Procurement 2016

Enhancing Efficiency and Competition

Technology affects all areas. Business and government processes are changing with the use of the internet, mobile devices, internet of things, blockchain, machine learning, artificial intelligence and many other new technologies. In this book, it is aimed to focus the use of technology, new trends in business life and government covering the studies in all sub-areas of Information Systems, Knowledge Management, eBusiness, eCommerce, eMarketing, mCommerce, eGovernment, ePublic Services, eGovernance etc. The book consists of 7 chapters. Book chapter authors are reputable scientists from different countries of the world. The first chapter is a critical review and a case study in e-Business, with special attention to the digital currencies resource and its possibilities. The second chapter attempts to incorporate the Unified Theory of Acceptance and Use of Technology (UTAUT) model with perceived risk theory (security risk and privacy risk) to explore its impact towards the intention to use m-government services. The third chapter aims to assess the level of gender inclusivity in the municipal e-procurement processes in the City of Johannesburg as a case study. The fourth chapter examines the impediments that derail the intensive uptake of eLearning programmes in a particular higher education institution. The fifth chapter investigated the role of Knowledge Management Systems (KMS) in enhancing the export performance of firms operating within the manufacturing sector in Zimbabwe. In the sixth chapter, a survey was undertaken on 131 small and medium-sized enterprises (SMEs) from Pelagonija region in order to determine the current level of SME digitalization within the region. It is aimed to compare with European Union (EU) average and to make conclusions on the impact of the SME digitalization to region gross domestic product (GDP) growth as well as revenues collection. The last chapter 's purpose was to develop a measuring and modelling framework/instrument of Internet banking service quality (IBSQ) for the South African banking sector.

This book provides a timely analysis of transparency in public procurement law. In its first part, the book critically assesses a number of key matters from a general and comparative perspective, including corruption prevention, competition and commercial issues and access to remedies. The second part illustrates how the relevance of these aspects varies across member states of the EU.

This book aims to offer a comprehensive overview of the issues facing organizations when deciding whether to accept e-commerce as a platform for business. It provides a detailed evaluation of how the implementation of e-commerce may affect all parties within the supply chain: suppliers, retailers and consumers. It also compares various opportunities and threats of accepting e-commerce in order to conclude whether it might offer access to a new digital era, or whether it is an uncertain option yielding potential pitfalls. This book helps to reveal existing and future consequences of e-commerce acceptance, which are crucial for business decisions and operations in the present and going forward. It therefore provides a unique insight into emerging e-commerce platform acceptance and is one of the first to provide a holistic perspective of how each party in the supply chain is affected by e-commerce acceptance. E-commerce is bringing into view more flexible, effective and efficient ways of conducting business activities among suppliers, retailers and consumers. It is not limited to time and space and therefore this digital platform has already established for itself a major role in today 's world economy. Despite promised benefits however, threats emerge which need to be faced when turning to the virtual marketplace - all of which have to be acknowledged before businesses will shift and adapt to the e-commerce platform. This book is intended for postgraduate students, executive MBA students and researchers interested in information management, marketing and operations management.

A Practical Guide to Successful Bid Management

Niger faces daunting development challenges, aggravated by terrorist incursions, low uranium export prices, and climate change. Nonetheless, GDP growth picked up to 6.5 percent last year- and should average above 7 percent over the next five years thanks to reforms, substantial donor support, several large-scale projects, and a one-time boost from the projected commencement of crude oil exports in 2022.

This book is a practical guide for students or those already running or thinking of running a small practice on how to set up and run a small architectural practice and how to run multiple small projects efficiently. It is split into three distinct sections: Part 1 begins with the practicalities of setting up a small architectural business; Part 2 goes into detail on how to run your small practice, including valuable advice on business planning and cash flow; and Part 3 follows with guidance on running multiple small projects. Structured around the RIBA Plan of Work, this section has plenty of examples of the kinds of projects - both domestic and non-domestic - that the small practice might take on, and finishing with 10 illustrated case studies of domestic and commercial projects from £50,000-£750,000.

The second number of the series Citizens & Markets is now available in electronic version. This publication consists of a description and analysis of the efforts to create new instruments for the citizens, in civil society organizations, the academy or the private sector, to participate and fulfill public control as well as rebuild trust in institutions and public procedures. A New Generation of Public Control contains contributions from specialists of diverse institutions such as Coventry University, Global Integrity, Transparency International, Hacettepe University, etc. This publication addresses concepts and cases that contribute to the discussion on multi actor initiatives and new governance models, for example, Open Government as a Strategic Tool for Public Procurement, Agreements for watershed service in Ecuador, Colombia and Mexico, etc.

This report summarises the results of the joint project of the Greek Ministry of Administrative Reform and e-Government and the OECD on measuring and reducing administrative burdens in 13 key sectors of the Greek economy.

The Winning Bid is an easy-to-read practical guide which will teach the reader how to think like a professional bid manager. It gives essential advice on, amongst other things: PQQs and bid readiness, GIVE analysis, competitor analysis, grantwriting and funding bids best practice, freedom of Information as a research and continual improvement tool, a view from the buyer's side - featuring feedback from buyers on their experiences of being on the receiving end of bids, measuring bid performance over time, virtual team management, sharing bid best practice with other Bid Managers through APMP membership and accreditation, LinkedIn groups, the new Cabinet Office feedback channel. It will appeal to anyone engaged in bidding activity, from the bid novice to professional bid managers.

This publication addresses some of the research gaps in the area of smallholder participation in public food procurement. It identifies good practices, reviews the global body of available literature and draws lessons learned. The findings of this paper have informed the Guidance Note on Public Food Procurement and can assist policy makers in the design and implementation of public food procurement.

Public procurement is vulnerable on many levels. Therefore, to increase protection and improve efficiency, governments across the globe are looking to introduce electronic-based infrastructures. Digital Governance and E-Government Principles Applied to Public Procurement is an essential reference publication for the latest research on the implementation and impact of public reforms through e-Procurement. Featuring coverage on a broad range of topics and perspectives, such as anti-corruption, acquisitions costs, and governance structures, this book is ideally designed for academicians, practitioners, professionals, and researchers seeking current research on the regulation of the public sector through digital approaches.

The Government of Canada, which spends about \$20 billion yearly on goods and services, wants to do more business these days with small and medium-sized Canadian firms. Can even independent professionals get in on this lucrative market? Absolutely! Find out where to look for federal government contracts— through the MERX online tendering system, materiel managers, staff with Public Works and Government Services Canada as well as regional federal economic development agencies, subcontracting opportunities, temp agencies and other sources. Discover how the new Office of Small and Medium Enterprises can help you do business with the feds. Learn how to get on departmental source lists, register with government-wide supplier databases such as Professional Services Online and SELECT, avail of free government seminars, prepare winning proposals, market yourself before and after being awarded standing offers, obtain government security clearance, do business with other governments in Canada and beyond, and more. Getting Work with the Federal Government also includes contact information for the 125 standing offer / supply arrangement holders under the much-utilized new Temporary Help Services On-Line System that fulfils many federal contract demands in the National Capital Region.

Digital Governance and E-Government Principles Applied to Public Procurement

Bulgaria's EU Funds Absorption

Issue 1, 49696 March 24 2006

A New Generation of Public Control

E-commerce Platform Acceptance

This paper focuses on EU structural and cohesion funds assistance to Bulgaria during the 2007–13 program period. Initial weaknesses resulted in a low absorption rate, which was mitigated by increasing advance payments; applying electronic application and reporting procedures; simplifying and unifying tender processes; and strengthening the role of international financial institutions and banks in project preparation, evaluation and monitoring. The possible impact on growth and potential output is briefly discussed, while the risks of improper absorption are acknowledged. Valuable lessons have been learned, but it is recommended that additional steps be taken for the next program period 2014–20.

This report assesses the enabling conditions for maximising the benefits of foreign direct investment (FDI) on SME productivity and innovation in Portugal. It looks at the quality of investment that Portugal attracts and the capacity of Portuguese SMEs to benefit from any knowledge and technology spillovers resulting from these investments.

This book assesses progress in the implementation of regulatory policy in Bahrain, Egypt, Jordan, Lebanon, Mauritania, Morocco, the Palestinian Authority and Tunisia.

These Standard Prequalification Documents serve as a guide for those wanting to prequalify to bid on large contracts for projects financed by the World Bank. Qualifying as a bidder is separate from the bid evaluation process. Before invitations to bid on large or especially complex works projects are issued, a process of prequalification is required to select competent bidders. This document helps bidders through the prequalification process. To simplify presentation by applicants for prequalification, standard forms have been prepared for the submission of relevant information. Guidance notes and examples are provided for the implementing agency making the evaluation.

Annexes give information about prequalification that are likely to be of interest to potential bidders on World Bank projects. NOTE: This replaces Standard Prequalification Document: Procurement of Works (September 1999), Stock no. 14601 (ISBN 0-8213-4601-6).

Implementation of the Small Business Act for Europe

National Trade Estimate ... Report on Foreign Trade Barriers

Sales Management

Issues in Business Ethics and Corporate Social Responsibility explores these foundational themes across a wide range of topics, including artificial intelligence, workplace surveillance, supply chain management, big data, the finance industry, and many more. Coupled with a broad introduction by Dr. David Weitzner, a professor of management at York University, this book provides students with the essential information they need to assess business practices through the lens of ethical decision-making and corporate social responsibility.

This report marks the third edition in this series, following assessments in 2012 and 2016. It provides a comprehensive overview of the state of play in the implementation of the ten SBA principles, and monitors progress made since 2016. It also identifies remaining challenges affecting SMEs in the Eastern Partnership (EaP) countries and provides recommendations to address them based on EU and international good practice examples.

Electronic procurement has become one of the main e-government initiatives for many countries as they look to improve procurement through a more open, competitive, and transparent environment. E-procurement continues to prove itself as a viable alternative to manual processes, bringing cost savings and efficiencies. The Asian Development Bank has been a promoter of electronic government procurement (e-GP) as a key component for procurement reforms through active involvement in the Multilateral Development Bank Working Group on e-GP. This handbook aims to inform readers about e-GP, provide a reference for related concepts, and examine how e-GP implementations have taken shape in different jurisdictions worldwide.

Online Business Sourcebook is the only evaluative guide to electronic business database products and services. The arrangement of products and services within the Sourcebook is by thematic chapter, to make it easy to review all products on a specific topic: Online hosts and aggregators; The Internet; Company directories; Company financials; Investment analysis; Shareholder analysis; Credit; Mergers and acquisitions;

Business and financial news; Business opportunities; Grants, advice and source of finance; Legislation and regulations; Prices; Market data; Industries; Economics and finance; International trade; Business management literature; Trademarks, trade names and brands; Recent highlights. Within most chapters, products are arranged by geographic coverage. Incorporated are three indexes: names; country/regions and subjects.

Assessing the Implementation of the Small Business Act for Europe

Public procurement accounts for around one-fifth of global gross domestic product (GDP). Given its size the public procurement market can improve public sector performance, promote national competitiveness, drive domestic economic growth, and boost economic development. Launched at the request of the G20 Anti-Corruption Working Group,

Benchmarking Public Procurement presents actionable indicators to help countries identify and monitor policies and regulations that impact how private sector companies do business with the government in 77 economies. The Benchmarking Public Procurement 2016 report is organized under two parts: the public procurement life cycle and the complaint and reporting mechanisms indicators. Data was gathered using standardized questionnaires distributed to expert contributors in each economy. The project builds on the Doing Business methodology and aims to promote evidence-based decision making by governments and shed light over areas where few empirical data have been presented so far.

This international textbook focuses on the strategic and operational aspects of sales management. With new material on coaching and motivating sales teams, sales skills and leadership are developed in this unique product. Sales Management teaches students how to gradually draw up a comprehensive sales plan: a process of analysing, learning, asking, brainstorming, writing, removing and reformulating. This comprehensive text provides core reading for students of sales and sales management globally.
