Health workers who provide services to persons with severe mental illness are frequently under enormous stress; burnout is common. Alleviating such stress is the objective of Interactive Staff Training. The book provides rehabilitation and mental health professionals with a strategy to help them and their colleagues work as a well-integrated team. This strategy has been implemented in teams serving more than 10,000 persons with psychiatric disabilities. The text combines a careful description of the central theory behind the strategy with plenty of clinical anecdotes that illustrate its practical, everyday benefits.

More than ever before, children are apparently being recognised as social actors and citizens. Yet public policy often involves increased control and surveillance of children. This book explores the contradiction. It shows how different ways of thinking about children produce different childhoods, different public provisions for children (including schools) and different ways of working with children. It argues that how we understand children and make public provision for them involves political and ethical choices. Through case studies and the analysis of

policy and practice drawn from a number of countries, the authors describe an approach to public provision for children which they term 'children's services'. They then propose an alternative approach named 'children's spaces', and go on to consider an alternative theory, practice and profession of work with children: pedagogy and the pedagogue. This ground breaking book will be essential reading for tutors and students on higher education or in-service courses in early childhood, education, play, social work and social policy, as well as practitioners and policy makers in these areas.
