Expanding and Networking Microcomputers Most Comprehensive Guide for Apple II and I. B. M. Personal Computers Springer CompTIA A+ Exam Cram (Exams 220-602, 220-603, 220-604) Pearson Education Packaged with the exciting "examGEAR"(TM) CD-ROM, this superbly written and illustrated book/lab manual is the perfect preparatory tool for developing the knowledge, ability, and skills currently demanded by the computer industry. Most computer technician employers now require the industry standard A+ Certification, and this valuable system includes dynamic interactive online updates for each chapter. It also provides for any changes encountered in the A+ exams over the life of this exam version--making your investment in this book never out-of-date or incomplete. Topics include basic PC hardware; advanced system boards; standard I/O systems; mass storage systems; data communications; printers; portable systems; preventive maintenance; and basic system troubleshooting. For computer technicians and others preparing to take the industry-standard A+ certification exam.

This work covers computers and the principles in designing digital controllers. Details on computer networking, topology, communication protocol, and a brief description of DCS are provided. New topics, such as programmable logic control (PLCs), smart sensors and fieldbus, identification and design of nonlinear controllers are also covered. The text also presents fundamentals of fuzzy logic control, design of such controllers, and use of fuzzy logic in improving the performance of conventional PID controllers. Computers communicate globally via satellite or fiber optic links, wide area networks share resources thousands of miles away, and the average home can have the capacity of access information at the push of a button - the digital information age has arrived! Several technologies have made

Computer Control of Processes

This book features a broad range of hardware and software products for real-time applications and software development. Included are application notes and datasheets for Intel OEM boards and platforms. Datasheets include specifications and features of the products as well as architectural and operational descriptions. For more than 40 years, Computerworld has been the leading source of technology news and information for IT influencers worldwide. Computerworld's award-winning Web site (Computerworld.com), twice-monthly publication, focused conference series and custom research form the hub of the world's largest global IT media network.

Data Acquisition and Process Control Using Personal Computers

Energy efficiency is a major cost issue for commerce and industry. This text examines building energy management systems which are used to monitor temperature inside and outside buildings and control the boilers and coolers.

&> In This Book You'll Learn How To: Recognize the different types and forms of computer memory Identify different computer cables and connectors Troubleshoot IRQ conflicts and other computer resource problems Identify and troubleshoot common computer motherboard components Install core PC components, such as motherboards, processors, and memory Install and maintain multiple computer peripherals Identify network architectures and topologies Troubleshoot operating system problems Describe the core functions of Windows NT/2000/XP/Windows 9x operating systems Discover effective DOS commands excellent for troubleshooting Use the DOS operating system or command lines when your GUI is unavailable Recover from system startup failures Use and troubleshoot Windows Networking Effectively prepare yourself for exam day CD Features Practice Exams! Ready to test your skills? Want to find out if you're ready for test day? Use the practice tests supplied on this CD to help prepare you for the big Test yourself, and then check your answers. Coupled with the in-depth material in the book, this is the ultimate one-two A+ study preparation package! Charles J. Brooks is currently co-owner and vice president of Educational Technologies Group Inc., as well as co-owner of eITPrep LLP, an

online training company. He is in charge of research and product development at both organizations. A former electronics instructor and technical writer with the National Education Corporation, Charles taught and wrote on post-secondary EET curriculum, including introductory electronics, transistor theory, linear integrated circuits, basic digital theory, industrial electronics, microprocessors, and computer peripherals. Charles has authored several books, including the first five editions of A+ Certification Training Guide, The Complete Introductory Computer Course, and IBM PC Peripheral Troubleshooting and Repair. He also writes about networking, residential technology integration, and convergence.
