She was a poor Southern tobacco farmer who worked the same land as her slave ancestors, yet her cells—taken without her knowledge—became one of the most important tools in medicine: The first “immortal” human cells grown in culture, which are still alive today, though she has been dead for more than sixty years. HeLa cells were vital for developing the polio vaccine; uncovered secrets of cancer, viruses, and the atom bomb’s effects; helped lead to important advances like in vitro fertilization, cloning, and gene mapping; and have been bought and sold by the billions. Yet Henrietta Lacks remains virtually unknown, buried in an unmarked grave. Henrietta’s family did not learn of her “immortality” until more than twenty years after her death, when scientists investigating HeLa began using her husband and children in research without informed consent. And though the cells had launched a multimillion-dollar industry that sells human biological materials, her family never saw any of the profits. As Rebecca Skloot so brilliantly shows, the story of the Lacks family—past and present—is**

**inextricably connected to the dark history of experimentation on African Americans, the birth of bioethics, and the legal battles over whether we control the stuff we are made of. Over the decade it took to uncover this story, Rebecca became enmeshed in the lives of the Lacks family—especially Henrietta’s daughter Deborah. Deborah was consumed with questions: Had scientists cloned her mother? Had they killed her to harvest her cells? And if her mother was so important to medicine, why couldn’t her children afford health insurance? Intimate in feeling, astonishing in scope, and impossible to put down, *The Immortal Life of Henrietta Lacks* captures the beauty and drama of scientific discovery, as well as its human consequences.**

*This volume examines Otto Friedrich Bollnow’s philosophical approach to education, which brought Heidegger’s existentialism together with other theories of what it is to be “human.” This introduction to Bollnow’s work begins with a summary of the theoretical influences that Bollnow synthesized, and goes on to outline his highly original account of experiential “educational reality”—namely, as a reality alternately “harmonious” or “broken,” but fundamentally “guided.” This book will be of value to scholars and students of education and philosophy, especially those interested in bringing larger existential questions into connection with everyday educational engagement.*

*The first day of school is both scary and exciting for Otto. At first, he is very nervous, but then he realizes how much fun school can be. Otto learns all kinds of things - how to share his toys, how to play games, and even how to remember that shoes are for wearing, not for eating. (Silly Otto!) Todd Parr’s bold illustrations and simple text are the perfect fit for children just starting their reading journey. At the end of the story, Todd offers a reassuring message to cure those back-to-school jitters: “The first day of school is fun and exciting. You will meet new friends, learn new things, and then you will be really, really smart! Love, Otto and Todd.”*

*This is a book of powerful short stories. Virtually all of them reveal an emotion filled unforgettable time in the life of a child, teacher,*

or caregiver. The stories were originally presented orally as parts of keynote addresses. These addresses routinely brought standing ovations for the stories contained within always touched, in a very gentle and humane way, the struggles, successes, and sensitivities that exist in us all. Some stories expose the crushing impact of deprivation and poverty; others reveal honor, empathy, and courage. Still others expose the devastating horrors of prejudice and injustice. Finally, as you complete your journey through these pages you will find that while reading you have been holding hands with the power of believing in self, believing in others, and the power of community. You will not walk away from this book untouched. Its warm and rich stories will stay with you for years to come.

Pamela, like her brilliant father, German emigrant Russell Roth, exhibits from childhood a cool composure and a rare intellect.

Although only a teenager, she is increasingly absorbed by the truth of her father's early life in wartime Germany. It is a past Russell never discusses. As Pamela immerses herself in the history of World War II Germany and the Holocaust, her mother, Janet, alarmed at her daughter's obsession, turns for help to Otto Ebenstein. Otto is an old friend and a former teacher of Janet's. He is also a psychiatrist with an outstanding record for tracking down Nazi war criminals. Pamela's youthful passion rekindles Otto's flagging devotion to the cause. When two ex-Nazis are found sexually assaulted and tortured to death, Otto begins to suspect Pamela of strange powers beyond his reckoning. He comes to know Pamela and gains her trust. He studies the girl's secret files and materials on the Nazi period and on her father's career. His investigations lead him to an astonishing discovery. With its chilling suspense, *Death Knell* is a breathtaking novel of retribution whose seed lies in the gas chambers of Auschwitz and whose shattering climax evokes memories of *The Exorcist* and *Audrey Rose*.

This "poetic, poignant" (US Weekly) debut features last great adventures, unlikely heroes, and a "sweet, disarming story of lasting love" (The New York Times Book Review). Eighty-three-year-old Etta has never seen the ocean. So early one morning she takes a rifle, some chocolate, and her best boots and begins walking the 3,232 kilometers from rural Saskatchewan, Canada eastward to the sea. As Etta walks further toward the crashing waves, the lines among memory, illusion, and reality blur. Otto wakes to a note left on the kitchen table. "I will try to remember to come back," Etta writes to her husband. Otto has seen the ocean, having crossed the Atlantic years ago to fight in a far-away war. He understands. But with Etta gone,

the memories come crowding in and Otto struggles to keep them at bay. Meanwhile, their neighbor Russell has spent his whole life trying to keep up with Otto and loving Etta from afar. Russell insists on finding Etta, wherever she's gone. Leaving his own farm will be the first act of defiance in his life. Moving from the hot and dry present of a quiet Canadian farm to a dusty, burnt past of hunger, war, and passion, from trying to remember to trying to forget, Etta and Otto and Russell and James is an astounding literary debut "of deep longing, for reinvention and self-discovery, as well as for the past and for love and for the boundless unknown" (San Francisco Chronicle). "In this haunting debut, set in a starkly beautiful landscape, Hooper delineates the stories of Etta and the men she loved (Otto and Russell) as they intertwine through youth and wartime and into old age. It's a lovely book you'll want to linger over" (People).

A teddy bear tells his life story, beginning with his creation in Germany prior to World War II, and continuing through the war and on to America, where eventually he is miraculously reunited with his original owner.

*In our complex world, how can we learn to think through moral dilemmas in the pursuit of justice? How do the words we associate with morality impact our understanding and application of it? In short, how can we enact equal measures of fairness among family members, friends, and strangers? These are the troubling questions that guide Dr. Otto Toews as he critically engages with the language of morality and uncovers what is lacking in our conversations about fairness. Using a Principled Thinking Model for resolving everyday moral dilemmas, Toews identifies five basic categories that are necessary for moral thinking: duty, rights, motive, desert, and justice. Combining this research with Nel Noddings's seminal work on caring, Toews concludes that while it is vital that we practice thinking through moral dilemmas, the key to attaining universal justice and fairness lies in our sense of fellow feeling, or empathy. Toews argues that without the urgency and energy prompted by a sense of concern for others, thinking through moral dilemmas will remain insufficient in fostering an ethical world. Throughout the book, Toews augments his research by providing hypothetical scenarios involving two teachers, Bill and Mae. They engage in spirited debates over how duty, rights, motive, desert, and justice apply to issues such as education, cyber bullying, mental illness, reconciliation, and more. Again and again, Bill and Mae are caught up by the power of empathy, demonstrating the urgent need to care for others. It is through their dialogues that Toews has designed a brilliant way for us to witness moral thinking in action, giving us the language we need to navigate it, and preparing us for the countless types of conflicts we encounter every day.*

*An NPR Best Book of 2017 "[Teeth is] . . . more than an exploration of a two-tiered system—it is a call for sweeping, radical change." —New York Times Book Review "Show me your teeth," the great naturalist Georges Cuvier is credited with saying, "and I will tell you who you are." In this shattering new work, veteran health journalist Mary Otto looks inside America's mouth, revealing unsettling truths about our unequal society. Teeth takes readers on a disturbing journey into America's silent epidemic of oral disease, exposing the hidden connections between tooth decay and stunted job prospects, low educational achievement, social mobility, and the troubling state of our public health. Otto's subjects include the pioneering dentist who made Shirley Temple and Judy Garland's teeth sparkle on the silver screen and helped create the all-American image of "pearly whites"; Deamonte Driver, the young Maryland boy whose tragic death from an abscessed tooth sparked congressional hearings; and a marketing guru who offers advice to dentists on how to push new and expensive treatments and how to keep Medicaid patients at bay. In one of its most disturbing findings, Teeth reveals that toothaches are not an occasional inconvenience, but rather a chronic reality for millions of people, including disproportionate numbers of the elderly and people of color. Many people, Otto reveals, resort to prayer to counteract the uniquely devastating effects of dental pain. Otto also goes back in time to understand the roots of our predicament in the history of dentistry, showing how it became separated from mainstream medicine, despite a century of growing evidence that oral health and general bodily health are closely related. Muckraking and paradigm-shifting, Teeth exposes for the first time the extent and meaning of our oral health crisis. It joins the small shelf of books that change the way we view society and ourselves—and will spark an urgent conversation about why our teeth matter.*

*THE DEFINITIVE EDITION • Discovered in the attic in which she spent the last years of her life, Anne Frank's remarkable diary has since become a world classic—a powerful reminder of the horrors of war and an eloquent testament to the human spirit. Updated for the 75th Anniversary of the Diary's first publication with a new introduction by Nobel Prize-winner Nadia Murad "The single most compelling personal account of the Holocaust ... remains astonishing and excruciating."—The New York Times Book Review In 1942, with Nazis occupying Holland, a thirteen-year-old Jewish girl and her family fled their home in Amsterdam and went into hiding. For the next two years, until their whereabouts were betrayed to the Gestapo, they and another family lived cloistered in the "Secret Annex" of an old office building. Cut off from the outside world, they faced hunger, boredom, the constant cruelties of living in confined quarters, and the ever-present threat of discovery and death. In her diary Anne Frank recorded vivid impressions of her experiences during this period. By turns thoughtful, moving, and amusing, her account offers a fascinating commentary on human courage and frailty and a compelling self-portrait of a sensitive and spirited young woman whose promise was tragically cut short.*

Otto, a fidgety young car that has trouble paying attention in school, visits a special mechanic who prescribes a medicine to control his hyperactive behavior.

A diary kept by a boy in the 1790s sheds new light on the rise of autobiographical writing in the 19th century and sketches a panoramic view of Europe in the Age of Enlightenment. The French Revolution and the Batavian Revolution in the Netherlands provide the backdrop to this study, which ranges from changing perceptions of time, space and nature to the thought of Jean-Jacques Rousseau and its influence on such far-flung fields as education, landscape gardening and politics. The book describes the high expectations people had of science and medicine, and their disappointment at the failure of these new branches of learning to cure the world of its ills.

**"With the same candor that has characterized his life, Otto Preminger--actor, director, producer, and now writer--exposes himself (in writing) as well as an impressive line-up of show business folk in this engrossing memoir. As one of Hollywood's pre-eminent directors with 36 films and 32 stage productions to his credit, Preminger reveals the funny, outrageous, and often exasperating moments of his career, and his association with the eccentric, the gracious, the wealthy, the egomaniacal--'the stars.'** Beginning his career as an apprentice of Max Reinhardt, Preminger became an instant success as an actor and then as a director. Hollywood called and he went there in 1935. His outspoken manner clashed with the autocratic studio moguls. He was forced to return to New York and find work directing plays on Broadway. He rebounded in 1944 to begin his stormy and remarkably creative period in Hollywood with *Laura*, his first all-out hit, starring Gene

**Tierney, Clifton Webb, and Dana Andrews. Preminger gives an inside glimpse at shooting such films as Daisy Kenyon with Joan Crawford (whom he considers a remarkable, independent, and generous woman); River of No Return, starring Marilyn Monroe; the all-black productions of Carmen Jones and Porgy and Bess, both accused of being racist; The Man With the Golden Arm, with Frank Sinatra and Kim Novak; plus such legendary films as Anatomy of a Murder (James Stewart, Lee Remick, and George C. Scott), Exodus (Paul Newman, Eva Marie Saint), Advise and Consent (Henry Fonda and Charles Laughton), The Cardinal (Tom Tryon, Romy Schneider), Hurry Sundown (Jane Fonda, Michael Caine, Diahann Carroll and Faye Dunaway), and In Harm's Way (John Wayne). Making no bones about naming enemies or exalting his friends, Preminger elaborates on the blacklisting during the fifties and includes his own critique of the critics. Preminger gives us a little more insight into his friend Tallulah Bankhead and her affinity for shocking behavior (with a few choice examples), as well as his opinion of Howard Hughes (a fascinating man, but not all that eccentric). He sets the record straight on a number of his love affairs and marriages, and divulges the story of his relationship with Gypsy Rose Lee and their child, who after Gypsy's death emerged as Erik Preminger. Leaving few stones unturned, this unique "Otto-biography" zooms in on Hollywood through the eyes of one of its most active and highly creative personalities--Preminger!--Jacket.**

Originally published in German in 1909, Otto Rank's *The Myth of the Birth of the Hero* offered psychoanalytical interpretations of mythological stories as a means of understanding the human psyche. Like his mentor Freud, Rank compared the myths of such figures as Oedipus, Moses, and Sargon with common dreams, seeing in both a symbolic fulfillment of repressed desire. Thirteen years later, Rank substantially revised this seminal work, incorporating new discoveries in psychoanalysis, mythology, and ethnology, doubling the size of the book. This expanded second edition has never before been available in English. For the second edition, Rank added anthropological considerations of primitive and civilized peoples to those of mythology; extensive discussions of birth dreams, flood legends, and rescue fantasies; and new mythological examples—among them Dionysus, Kullervo (a precursor of Hamlet), Trakhan, and Tristan—as well as fuller treatments of Sargon and Moses. Eloquently translated by Gregory C. Richter and E. James Lieberman, this volume also includes an introductory essay by Robert A. Segal and Rank's 1914 essay, "The Play in Hamlet."

This study of Andalusian strophic poetry and their "Kharjas" provides an updated survey of the debates on this topic. The texts are studied historically, prosodically, thematically and stylistically and they are related to other literary traditions of the Middle Ages.

***An Introduction to Otto Friedrich Bollnow***

In his previously written articles and books, Chris Edwards has argued that Teaching should be considered a field that is separate from both the field of Education and the content area fields. Teaching is a field which synthesizes content and method into classroom application. All of the other major intellectual fields have a canon of works from which practitioners can learn from and add to, but Teaching does not. The Connections in World History: A Teacher's Literacy-Based Curriculum series changes this by showing how effective a teacher-generated curriculum can be. These books can inspire other teachers to create their own curriculums and inspire a change in the way that the public views teachers and teaching.
