The name 'Tony Iommi' sends shivers down the spines of guitarists around the world. As lead guitarist and songwriter of Black Sabbath, Tony Iommi is considered to be one of the most influential musicians of the past four decades and the inventor of heavy metal. From working class, Midlands roots, his unique playing style - a result of a disfiguring hand injury he suffered working in a sheet metal factory - created a dark and gothic sound unlike anything that had been heard before and which captured the mood of its time. Sabbath went on to become a superband, playing to massive audiences around the world and selling millions of records, and Iommi led the life of a rockstar to the fullest - with the scars from all the drug-fuelled nights of excess and wildness to show for it. Iron Man is the exclusive account of the life and adventures of one of rock's greatest heroes. Becoming Jen is a hilariously truthful tale of one woman's journey from being newlywed to newly mommy. Using delicious recipes and awe-inspiring stories, she takes you on a journey through glorious Saturdays lounging in bed, to being woken up in the middle of the night by tiny ninjas. Whether you're about to become a parent, or you just want to laugh and discover some scrumptious recipes, this book will have you snorting water from your nose and wondering what story she'll tell next.

This "utterly spectacular" book weighs the impact modern medical technology has had on

the author's life against the social and environmental costs inevitably incurred by the mining that makes such innovation possible (Rachel Louise Snyder, author of *No Visible Bruises*). What if a lifesaving medical device causes loss of life along its supply chain? That's the question Katherine E. Standefer finds herself asking one night after being suddenly shocked by her implanted cardiac defibrillator. In this gripping, intimate memoir about health, illness, and the invisible reverberating effects of our medical system, Standefer recounts the astonishing true story of the rare diagnosis that upended her rugged life in the mountains of Wyoming and sent her tumbling into a fraught maze of cardiology units, dramatic surgeries, and slow, painful recoveries. As her life increasingly comes to revolve around the internal defibrillator freshly wired into her heart, she becomes consumed with questions about the supply chain that allows such an ostensibly miraculous device to exist. So she sets out to trace its materials back to their roots. From the sterile labs of a medical device manufacturer in southern California to the tantalum and tin mines seized by armed groups in the Democratic Republic of the Congo to a nickel and cobalt mine carved out of endemic Madagascar jungle, *Lightning Flowers* takes us on a global reckoning with the social and environmental costs of a technology that promises to be lifesaving but is, in fact, much more complicated. Deeply personal and sharply reported, *Lightning Flowers* takes a hard look at technological mythos, healthcare, and our cultural relationship to medical technology, raising important questions about our obligations to one another, and the cost of saving one life.

Guardian Angel is that rare memoir that grabs you by the shoulders with an urgency that screams, "PAY ATTENTION!" It leaps off the page with an immediacy and relevance that few books achieve. Beginning with her solitary childhood in London, it took years for Melanie Phillips to understand her parents' emotional frailties and even longer to escape from them. But Phillips inherited her family's strong Jewish values and a passionate commitment to freedom from oppression. It was this moral foundation that ultimately turned her against the warped and tyrannical attitudes of the Left, requiring her to break away not only from her parents—but also from the people she had seen as her wider political family. Through her poignant story of transformation and separation, we gain insight into the political uproar that has engulfed the West. Britain's vote to leave the EU, the rise of far-Right political parties in Europe, and the stunning election of US president Donald Trump all involve a revolt against the elites by millions. It is these disdained masses who have been championed by Melanie Phillips in a career as prescient as it has been provocative. Guardian Angel is not only an affecting personal story, but it provides a vital explanation why the West is at a critical crossroads today. "Melanie Phillips has been one of the brave and necessary voices of our time, unafraid to speak the language of moral responsibility in an age of obfuscation and denial. This searing account of her personal journey is compelling testimony to her courage in speaking truth to power."—Rabbi Lord Jonathan Sacks

Wendy Barnes was introduced to sex trafficking by her first love, the father of her children. And Life Continues is her story: how she became a victim of human trafficking, why she was unable to leave the man who enslaved her for fifteen years, and the obstacles she overcame to heal and rebuild her life after she was rescued.

This is the true story of the world of human trafficking in Canada. It is estimated that between 12 and 27 million people are currently caught in human trafficking globally, and Canadian stats show that thousands are exploited for their labour or sexual services right across our own country.

"When Jon Sveinsson wrote this travelogue in 1894, there is no way he could have known of the fame he would one day acquire as a writer. In fact, it was not until some twenty years later that his children's book "Lost in the Arctic" ... was first published ... and the fame of 'Nonni' ([his] boyhood Icelandic nickname) spread ... his books were eventually translated into some 40 languages ... Jon Sveinsson is the only Jesuit priest ever born in Iceland. He left his homeland as a boy ... to follow [the] call ... Still longing to follow his dream to become a missionary, he ... volunteered to travel to Iceland in order to care for the souls of his fellow countrymen"--Publisher's foreword.

“A searing and emotionally gripping account of a young black girl growing up to become a strong black woman during the most difficult time of racial segregation.”—Professor Charles Ogletree, Harvard Law School “Provides important context for an important moment in America’s history.”—Associated Press When fourteen-year-old Carlotta Walls walked up the stairs of Little Rock Central High School on September 25, 1957, she and eight other black students only wanted to make it to class. But the journey of the “Little Rock Nine,” as they came to be known, would lead the nation on an even longer and much more turbulent path, one that would challenge prevailing attitudes, break down barriers, and forever change the landscape of America. For Carlotta and the eight other children, simply getting through the door of this admired academic institution involved angry mobs, racist elected officials, and intervention by President Dwight D. Eisenhower, who was forced to send in the 101st Airborne to escort the Nine into the building. But entry was simply the first of many trials. Breaking her silence at last and sharing her story for the first time, Carlotta Walls has written an engrossing memoir that is a testament not only to the power of a single person to make a difference but also to the sacrifices made by families and communities that found themselves a part of history.

An eye-opening exploration of blood, the lifegiving substance with the power of taboo, the value of diamonds and the promise of breakthrough science Blood carries life, yet the sight of it makes people faint. It is a waste product and a commodity pricier than oil. It can save lives and transmit deadly infections. Each one of us has roughly nine pints of it, yet many don’t even know their own blood type. And for all its ubiquitousness, the few tablespoons of blood discharged by 800 million women are still regarded as taboo: menstruation is perhaps the single most demonized biological event. Rose George, author of *The Big Necessity*, is renowned for her intrepid work on topics that are invisible but vitally important. In *Nine Pints*, she takes us from ancient practices of bloodletting to the breakthrough of the "liquid biopsy," which promises to diagnose cancer and other diseases with a simple blood test. She introduces Janet Vaughan, who set up the world’s first system of mass blood donation during the Blitz, and Arunachalam Muruganatham,

known as “Menstrual Man” for his work on sanitary pads for developing countries. She probes the lucrative business of plasma transfusions, in which the US is known as the “OPEC of plasma.” And she looks to the future, as researchers seek to bring synthetic blood to a hospital near you. Spanning science and politics, stories and global epidemics, *Nine Pints* reveals our life's blood in an entirely new light. *Nine Pints* was named one of Bill Gates recommended summer reading titles for 2019.

Sex, money, drugs and danger: they are all in a night's work for millions of prostitutes around the world. But who are they? What are their lives like? And how do they really feel about what they do? Their answers are here, the unvarnished truth of life in the modern sex trade told by those who work in it. Author Julian Davies interviewed streetwalkers, call girls, brothel workers, dominatrix and even male escorts to uncover their twilight world: the tricks of the trade; the violent punters and bizarre requests; the run-ins with the cops; the risks, the family breakdowns and the absurd situations. Controversial, shocking and explicit, but also often funny and poignant, *Hookers* is the most candid account ever of life inside the underground sex industry.

The founder of *The World Needs More Love Letters*, who has dedicated her life to showing total strangers that they are not alone in the world, reveals how she rediscovered her faith through her attempt to bring love into the world.

My Journey Through Time is a spiritual memoir that sheds light on the workings of karma- the law of cause and effect that creates one's present circumstances and relationships-as we see it unfold through Dena's vivid memories of her previous births. We travel back in time as Dena learns of a life in early

20th century Russia, ranging from the overthrow of the Czar through Nazi Germany; then it's back further to a life in early 19th century America in the Deep South, and before that to a time in Africa in the early 18th century. Her lives in the East-in Persia, Japan, and India-go back to the 15th-17th centuries. With each past life, we can see the way in which it has impacted her present life, how it has stemmed from the end of the previous birth, and how it will influence her next life. Dena Merriam is the founder of an interfaith organization, the Global Peace Initiative of Women. A long-time disciplined meditator, Dena's access to her past lives brings a clearer awareness and purpose to her present life, and also overcomes any fear of death. The memories are triggered when Dena meets a new person or visits a new place in her current life. The memories bring remembrances of past suffering, but also recollections of spiritual teachers and wise guidance. She has not used and does not advocate past-life regressions or hypnosis as a way to prompt memories to return. Dena has decided to share her story, despite being a very private person, in hopes that it can provide comfort and awaken the inner knowing of your own ongoing journey through time.

A much-praised memoir of living and surviving mental illness as well as "a stereotype-shattering look at a tenacious woman whose brain is her best friend and her worst enemy" (Time). Elyn R. Saks is an esteemed professor, lawyer, and psychiatrist and is the Orrin B. Evans Professor of Law, Psychology, Psychiatry, and the Behavioral Sciences at the University of Southern California Law School, yet she has suffered from schizophrenia for most of her life, and still has ongoing major episodes of the illness. The Center Cannot Hold is the eloquent, moving story of Elyn's life, from the first time that she heard voices speaking to her as a young teenager, to attempted suicides in college, through learning to live on her own as an adult in an often terrifying world. Saks discusses frankly the paranoia, the inability to tell imaginary fears from real ones, the voices in her head telling her to kill

herself (and to harm others), as well as the incredibly difficult obstacles she overcame to become a highly respected professional. This beautifully written memoir is destined to become a classic in its genre.

Somewhere between hunting for gold in Latin America as a geologist and getting married to a new husband, thirty-three-year-old Susan Purvis loses her way. Susan comes to believe that a puppy and working on ski patrol at the last great ski town in Colorado will improve her life. When she learns about avalanches that bury people without warning, she challenges herself: "What if I teach a dog to save lives?" This quest propels her to train the

best possible search dog, vowing to never leave anyone behind. With no clue how to care for a houseplant, let alone a dog, she chooses a five-week-old Labrador retriever, Tasha. With the face of a baby bear and the temperament of an NFL linebacker, Tasha constantly tests Susan's determination to transform her into a rescue dog. Susan and Tasha jockey for alpha position as they pursue certification in avalanche, water, and wilderness recovery. Susan eventually learns to truly communicate with Tasha by seeing the world through her dog's nose. As the first female team in a male-dominated search-and-rescue community, they face resistance at every turn. They won't get paid even a bag of kibble for their efforts, yet they launch dozens of missions to rescue the missing or recover the remains of victims of nature and crime. Training with Tasha in the field to find, recover, and rescue the lost became Susan's passion. But it was also her circumstance—she was in many ways as lost as anyone she ever pulled out of an avalanche or found huddled in the woods. "Lostness" doesn't only apply to losing the trail. People can get lost in a relationship, a business, or a life. Susan was convinced that only happened to other people, until Tasha and a life in the mountains taught her otherwise.

*We've always dreamed of perfect places: Eden, heaven, Utopia. Imagine gambling without loss, love without heartbreak, sex without exposure, experience without risk. Welcome to the fascinating world of online virtual reality, the land of invented places and populations that is entered and inhabited every week by nearly fifty million people worldwide. Each participant creates a virtual body, works at virtual jobs, and makes virtual friends and family. In *Second Lives*, Tim Guest, an internationally acclaimed young journalist, takes us on a revelatory journey through the electronic looking glass as he investigates one of the most bizarre phenomena of the twenty-first century. From *Second Life* to *EverQuest* and beyond, here are the computer-generated environments and characters that can easily become more engrossing and fulfilling than earthly existence. With the click of a mouse you can select eye color, face shape, height--you can even give yourself wings. Your character, or avatar, can build houses, make and*

*sell works of art, earn money, get married and divorced. In this fascinating and groundbreaking book, Guest meets people who found meaningful love and friendship despite never having met in person, catches up with the companies that have used virtual worlds to make big money, investigates the U.S. military's massive online global model that trains soldiers to fight anyone anywhere, and travels all the way to gaming-crazed Korea to get a taste for just how big this phenomenon really is. At first glance, these new computer-generated places seem free from trouble and sorrow. But Guest examines the dark side of this technology too, including the online criminals who plague imaginary worlds, from cyber mafiosos and prostitutes to real hackers and terrorists. It seems that one cannot escape greed, corruption, and human weakness—even inside a computer screen. Are these virtual worlds a way to enhance life or to escape it? Guest explores this question personally as he lets himself be transported into myriad parallel universes. By turns provocative, inspiring, and disturbing, *Second Lives* is a crucial book for this millennium. After all, real life is so twentieth century. Advance praise for *Second Lives* “Tim Guest is a young writer with the literary goods. My *Life in Orange*, his hit memoir of growing up in a commune, looked at his past; his riveting new book, *Second Lives*, looks at our future: the world of virtual reality and the spellbound people who inhabit it. The book is some kind of revelation—by turns compelling, chilling, and illuminating. My book is about an eight-year journey of getting a diagnosis of Parkinson’s disease. I have ten to eleven years of experience working as a physical therapist assistant. I have experience in water, hospital, and nursing home while battling this condition. I have had to plead my own disability case and, after being awarded my back pay, found the treatment of choice, which is stem cell. I am the first person in West Tennessee to have this treatment. The stem cell treatment stops the progression of the disease and the symptoms. While waiting to get the stem cell treatment, I used my experience as a physical therapist assistant to help control my symptoms such as line dancing, playing cards, and swimming that stopped the tremor. My hope is that my journey and experiences will help other people who are dealing with

Parkinson's disease and similar conditions and to get the awareness out to the community. For the first time ever, a survivor tells the shocking inside story of her time trapped in Jeffrey Epstein and Ghislaine Maxwell's sex trafficking ring. Sarah Ransome moved to New York at the age of 22 with hopes for a better life, an education, and a career in fashion. Her dreams were destroyed almost overnight when she met Jeffrey Epstein and was invited to an island paradise disguising her personal hell. "By sharing my testimony...I hope to see both minds and laws changed. More than anything, I want to encourage a culture in which women, even if they haven't led the perfect lives, even if they're not proud of every one of their choices, still feel the right to stand in their truth." This story is her day in court.

Brain on Fire meets High Achiever in this "page-turner memoir chronicling a woman's accidental descent into prescription benzodiazepine dependence—and the life-threatening impacts of long-term use—that chills to the bone" (Nylon). As Melissa Bond raises her infant daughter and a special-needs one-year-old son, she suffers from unbearable insomnia, sleeping an hour or less each night. She loses her job as a journalist (a casualty of the 2008 recession), and her relationship with her husband grows distant. Her doctor casually prescribes benzodiazepines—a family of drugs that includes Xanax, Valium, Klonopin, Ativan—and increases her dosage on a regular basis. Following her doctor's orders, Melissa takes the pills night after night; her body begins to shut down and she collapses while holding her infant daughter. Only then does Melissa learn that her doctor—like many doctors—has over-prescribed the medication and quitting cold turkey could lead to psychosis or fatal seizures. Benzodiazepine addiction is not well studied, and few experts know how to help Melissa as she begins the months-long process of tapering off the pills without suffering debilitating, potentially deadly consequences. Each page thrums with the heartbeat of Melissa's struggle—how many hours has she slept? How many weeks old are her babies? How many milligrams has she taken? Her propulsive writing crescendos to a fever pitch as she fights for her health and her ability to care for her children. Lyrical and immersive, Blood Orange Night shines a light on the prescription benzodiazepine epidemic as it reaches a crisis point in this country.

For the better part of a decade, Edward Ugel spent his time closing deals with lottery winners, making a lucrative and legitimate—if sometimes not-so-nice—living by taking advantage of their weaknesses . . . weaknesses that, as a gambler himself, he knew all too well. In Money for Nothing, he explores the captivating world of lottery winners and shows us how lotteries and gambling have become deeply inscribed in every aspect of American life, shaping our image of success and good fortune. An astonishingly brave memoir of prostitution and its lingering influence on a woman's psyche and life. "The best work by anyone on prostitution ever, Rachel Moran's Paid For fuses the memoirist's lived poignancy with the philosopher's conceptual sophistication. The result is riveting, compelling, incontestable. Impossible to put down. This book provides all anyone needs to know about the reality of prostitution in moving, insightful prose that engages and disposes of every argument ever raised in its favor."

—Catharine A. MacKinnon, law professor, University of Michigan and Harvard University Born into a troubled family, Rachel Moran left home at the age of fourteen. Being homeless, she was driven into prostitution to survive. With intelligence and empathy, she describes the exploitation she and others endured on the streets and in the brothels. Moran also speaks to the psychological damage inherent to prostitution and the inevitable estrangement from one's body. At twenty-two, Moran escaped the sex trade. She has since become a writer and an abolitionist activist.

Two-time All-Star and thirteen-year NBA veteran Caron Butler has an impressive basketball record. He was Big East Co-Player of the Year at UConn, the 10th overall pick of the 2002 NBA Draft and a key player for the Dallas Mavericks in their championship-winning season in 2011. But before Butler had a chance to prove himself on the court, he spent his time trying to prove himself on the streets, as a gang member and drug dealer in his hometown of Racine, Wisconsin. He saw friends gunned down in the bloody street wars near his home, was arrested nearly 15 times and wound up behind bars and in solitary confinement before his 15th birthday. Tuff Juice shares Caron Butler's extraordinary journey from his delinquent youth in the streets of Racine to his role as an accomplished pro basketball player, dedicated husband and father, active philanthropist and burgeoning businessman. Along the way, the book explores the incredible impact his single mother's unconditional love and his college coach's unwavering support had on him, and what drives him to be so successful in basketball and in life. Like *The Blind Side*, it's a gripping narrative filled with hubris, dangerous obstacles and heartwarming moments that transcend sports and speak to perseverance, hope and the triumph of the human spirit.
