Hugh Dubrulle explores how Britons envisioned the American Civil War and how these conceptions influenced their discussions about race, politics, society, military affairs, and nationalism.

Contributing new research that expands upon previous scholarship focused on establishing British public opinion toward the war, Dubrulle offers a methodical dissection of the ideological forces that shaped that

Access Free Paper 2 43652h 14 June

opinion, many of which arose from the complex Anglo-American postcolonial relationship. Britain's lingering feeling of ownership over its former colony contributed heavily to its discussions of the American Civil War. Because Britain continued to have a substantial material interest in the United States, its writers maintained a position of superiority and authority in respect to

American affairs.
British commentators tended to see the United States as divided by two distinct civilizations, even before the onset of war: a Yankee bourgeois democracy and a southern oligarchy supported by slavery. They invariably articulated mixed feelings toward both sections, and shortly before the Civil War, the expression of these feelings was magnified by the sudden emergence of inexpensive newspapers, periodicals,

Access Free Paper 2 43652h 14 June

and books. The conflicted nature of British attitudes toward the United States during the antebellum years anticipates the ambivalence with which the British reacted to the American crisis in 1861. Britons used prewar stereotypes of northerners and southerners to help explain the course and significance of the conflict. Seen in this fashion, the war seemed particularly relevant to a number of questions

Access Free Paper 2 43652h 14 June

that occupied British conversations during this period: the characteristics and capacities of people of African descent, the proper role of democracy in society and politics, the future of armed conflict, and the composition of a durable nation. These questions helped shape Britain's stance toward the war and, in turn, the war informed British attitudes on these subjects. Dubrulle draws from numerous primary

Access Free Paper 2 43652h 14 June

sources to explore the rhetoric and beliefs of British public figures during these years, including government papers, manuscripts from press archives, private correspondence, and samplings from a variety of dailies, weeklies, monthlies, and quarterlies. The first book to examine closely the forces that shaped British public opinion about the Civil War, *Ambivalent Nation* contextualizes and expands our

This book constitutes the refereed proceedings of the 11th International Andrei P. Ershov Informatics Conference, PSI 2017, held in Moscow, Russia, in June 2017. The 31 full papers presented in this volume were carefully reviewed and selected from 57 submissions. The papers cover various topics related to the foundations of program and system development and analysis, programming methodology and software engineering and information technologies.

This Festschrift was published in honor of Joshua Guttman on the occasion of his 66.66 birthday. The impact of his work is reflected in the 23 contributions enclosed in this volume. Joshua's most influential and enduring contribution to the field has been the development of the strand space formalism for analyzing cryptographic protocols. It is one of several "symbolic approaches" to security protocol analysis in which the underlying details of cryptographic primitives are abstracted away, allowing a focus on potential flaws in the communication patterns between participants. His attention to the

Access Free Paper 2 43652h 14 June

underlying logic of strand spaces has also allowed him to merge domain-specific reasoning about protocols with general purpose, first-order logical theories. The identification of clear principles in a domain paves the way to automated reasoning, and Joshua has been a leader in the development and distribution of several tools for security analysis.

The City Record

This book constitutes the thoroughly refereed proceedings of the 4th International Conference on Abstract State Machines, B, TLA, VDM and Z, which took place in

Toulouse, France, in June 2014. The 13 full papers presented together with 3 invited talks and 19 short papers were carefully reviewed and selected from 81 submissions. The ABZ conference series is dedicated to the cross-fertilization of six related state-based and machine-based formal methods: Abstract State Machines (ASM), Alloy, B, TLA, VDM and Z. They share a common conceptual foundation and are widely used in both academia and industry for the design and analysis of hardware and software systems. The main goal of this conference series is to contribute to the integration of these formal methods, clarifying their

Access Free Paper 2 43652h 14 June

commonalities and differences to better understand how to combine different approaches for accomplishing the various tasks in modeling, experimental validation and mathematical verification of reliable high-quality hardware/software systems.

In this examination of Union and Confederate foreign relations during the Civil War from both European and American perspectives, Howard Jones demonstrates that the consequences of the conflict between North and South reached far beyond American soil. Jones highlights the mixture of reasons for European interest in the war, which ranged from self-interest to fear that an intervention would cause war with the Union. Most of all, he

explores the horrible nature of a war that attracted outside involvement as much as it repelled it. Written in a narrative style that relates the story as its participants saw it play out around them, Blue and Gray diplomacy depicts the complex set of problems faced by policymakers from Richmond and Washington to London, Paris, and St. Petersburg.
