*From Colleen Hoover, the #1 New York Times bestselling author of *It Ends With Us*, a heart-wrenching love story that proves attraction at first sight can be messy. When Tate Collins meets airline pilot Miles Archer, she doesn't think it's love at first sight. They wouldn't even go so far as to consider themselves friends. The only thing Tate and Miles have in common is an undeniable mutual attraction. Once their desires are out in the open, they realize they have the perfect set-up. He doesn't want love, she doesn't have time for love, so that just leaves the sex. Their arrangement could be surprisingly seamless, as long as Tate can stick to the only two rules Miles has for her. Never ask about the past. Don't expect a future. They think they can handle it, but realize almost immediately they can't handle it at all. Hearts get infiltrated. Promises get broken. Rules get shattered. Love gets ugly.*

In a society that is increasingly steeped in video culture, the role of videographer is more and more prominent. Here is a do-it-yourself guide to videography that offers comprehensive information for anyone working in or hoping to enter this fast-growing field. Written by an educator, this revised and updated manual provides detailed information on shooting and editing videos. It begins with basic concepts and progresses through all facets of video equipment and technique.

Discussions deal not only with the mechanics of shooting a video but also with the artistry involved. Special emphasis is placed on pre-production planning and the necessity of considering subject as well as audience. Helpful hints on production, staging and budgeting are also included. Mini-glossaries within the sections define important terms. The final section is devoted to in-depth strategies for shooting specific types of videos, including newscasts; legal, corporate and music videos; and weddings and other events.

Now a major motion picture starring Cole Sprouse and Haley Lu Richardson! Goodreads Choice Winner, Best Young Adult Fiction of 2019 In this #1 New York Times bestselling novel that's perfect for fans of John Green's The Fault in Our Stars, two teens fall in love with just one minor complication—they can't get within a few feet of each other without risking their lives. Can you love someone you can never touch? Stella Grant likes to be in control—even though her totally out of control lungs have sent her in and out of the hospital most of her life. At this point, what Stella needs to control most is keeping herself away from anyone or anything that might pass along an infection and jeopardize the possibility of a lung transplant. Six feet apart. No exceptions. The only thing Will Newman wants to be in control of is getting out of this hospital. He couldn't care less about his treatments, or a fancy new clinical drug trial. Soon, he'll turn eighteen and then he'll be able to unplug all these machines and actually go see the world, not just its hospitals. Will's exactly what Stella needs to stay away from. If he so much as breathes on Stella she could lose her spot on the transplant list. Either one of them could die. The only way to stay alive is to stay apart. But suddenly six feet doesn't feel like safety. It feels like punishment. What if they could steal back just a little bit of the space their broken lungs have stolen from them? Would five feet apart really be so dangerous if it stops their hearts from breaking too?

Jacqueline Woodson's National Book Award and Newbery Honor winner, now available in paperback with 7 all-new poems.

Jacqueline Woodson is the 2018-2019 National Ambassador for Young People's Literature A President Obama "O" Book Club pick Raised in South Carolina and New York, Woodson always felt halfway home in each place. In vivid poems, she shares what it was like to grow up as an African American in the 1960s and 1970s, living with the remnants of Jim Crow and her growing awareness of the Civil Rights movement. Touching and powerful, each poem is both accessible and emotionally charged, each line a glimpse into a child's soul as she searches for her place in the world. Woodson's eloquent poetry also reflects the joy of finding her voice through writing stories, despite the fact that she struggled with reading as a child. Her love of stories inspired her and stayed with her, creating the first sparks of the gifted writer she was to become. Includes 7 new poems, including "Brown Girl Dreaming". Praise for Jacqueline Woodson: A 2016 National Book Award finalist for her adult novel, ANOTHER BROOKLYN "Ms. Woodson writes with a sure understanding of the thoughts of young people, offering a poetic, eloquent narrative that is not simply a story . . . but a mature exploration of grown-up issues and self-discovery."--The New York Times Book Review

Illustrated lettering is one of the most recognisable trends in design, but how do you take your work in this area to new levels and make your projects stand out from the crowd? Illustrator, designer and educator Marty Blake takes you through the craft of creative lettering: what you need to know about working with various media and how to incorporate image and text successfully. Each chapter focuses on one technique, covering its history, the tools and techniques needed to achieve it, along with examples from designers and illustrators from around the world - all with critical reflection on what works, and why. Whether you're lettering by hand or digitally, *Drawn to Type* is perfect for use alongside courses in illustration and typography, and as an inspirational guide for designers looking to give the written word that visual impact.

Partial Differential Equations presents a balanced and comprehensive introduction to the concepts and techniques required to solve problems containing unknown functions of multiple variables. While focusing on the three most classical partial differential equations (PDEs)—the wave, heat, and Laplace equations—this detailed text also presents a broad practical perspective that merges mathematical concepts with real-world application in diverse areas including molecular structure, photon and electron interactions, radiation of electromagnetic waves, vibrations of a solid, and many more. Rigorous pedagogical tools aid in student comprehension; advanced topics are introduced frequently, with minimal technical jargon, and a wealth of exercises reinforce vital skills and invite additional self-study. Topics are presented in a logical progression, with major concepts such as wave propagation, heat and diffusion, electrostatics, and quantum mechanics placed in contexts familiar to students of various fields in science and engineering. By understanding the properties and applications of PDEs, students will be equipped to better analyze and interpret central processes of the natural world.

Five Feet Apart

Slightly Dangerous

Considered by many the greatest war novel of all time, All Quiet on the Western Front is Erich Maria Remarque's masterpiece of the German experience during World War I. I am young, I am twenty years old; yet I know nothing of life but despair, death, fear, and fatuous superficiality cast over an abyss of sorrow. . . . This is the testament of Paul Bäumer, who enlists with his classmates in the German army during World War I. They become soldiers with youthful enthusiasm. But the world of duty, culture, and progress they had been taught breaks in pieces under the first bombardment in the trenches. Through years of vivid horror, Paul holds fast to a single vow: to fight against the principle of hate that meaninglessly pits young men of the same generation but different uniforms against one another . . . if only he can come out of the war alive. "The world has a great writer in Erich Maria Remarque. He is a craftsman of unquestionably first rank, a man who can bend language to his will. Whether he writes of men or of inanimate nature, his touch is sensitive, firm, and

sure.”—*The New York Times Book Review*

Geospace features highly dynamic populations of charged particles with a wide range of energies from thermal to ultra-relativistic. Influenced by magnetic and electric fields in the terrestrial magnetosphere driven by solar wind forcing; changes in the numbers and energies of these particles lead to a variety of space weather phenomena, some of which are detrimental to space infrastructure. This book presents an overview of the latest discoveries and current scientific understanding of the coupling of electromagnetic waves and charged particles during magnetic storms, and explains the observed dynamics of these particle populations. The book furthermore includes investigations relevant to understanding and forecasting this space environment and the adverse impacts of space weather. High-energy electrons and ions in the Van Allen radiation belts and the ring current are of particular interest and importance with regard to the operation of space-based technological infrastructure upon which 21st century civilisation increasingly relies. This book presents the latest research on the sources, transport, acceleration and loss of these energetic particle populations, as well as their coupling during geospace magnetic storms.

In The Exquisite Book of Paper Flower Transformations, artist Livia Cetti ups the ante with a host of grander and more intricate flowers and projects—more blooms, more petals, stronger stems, and bigger, bolder arrangements! Cetti will teach you how to play with size, shape, color, and texture to create 25 vibrant single stems in a variety of natural shapes—globes, spikes, bells, saucers, rectangles, cones, and arcs—including hydrangeas, coral charm peonies, honeysuckles, and paperwhites. Then, you'll use these elemental shapes to build the 15 bright, abundant arrangements, including bold wreaths, bountiful bouquets, fantastical gilded wall art, and blooming garlands. Introducing new, neverbefore-seen techniques for dyeing paper and creating moldable leaves and petals, this gorgeous guide is perfect for crafters of all skill levels interested in making realistic and unique home decor, gifts, accessories, and entertaining essentials.

In the explosive finale to the epic romantic saga, Bella has one final choice to make. Should she stay mortal and strengthen her connection to the werewolves, or leave it all behind to become a vampire? When you loved the one who was killing you, it left you no options. How could you run, how could you fight, when doing so would hurt that beloved one? If your life was all you had to give, how could you not give it? If it was someone you truly loved? To be irrevocably in love with a vampire is both fantasy and nightmare woven into a dangerously heightened reality for Bella Swan. Pulled in one direction by her intense passion for Edward Cullen, and in another by her profound connection to werewolf Jacob Black, a tumultuous year of temptation, loss, and strife have led her to the ultimate turning point. Her imminent choice to either join the dark but seductive world of immortals or to pursue a fully human life has become the thread from which the fates of two tribes hang. This astonishing, breathlessly anticipated conclusion to the Twilight Saga illuminates the secrets and mysteries of this spellbinding romantic epic. It's here! #1 bestselling author Stephenie Meyer makes a triumphant return to the world of Twilight with the highly anticipated companion, *Midnight Sun*: the iconic love story of Bella and Edward told from the vampire's point of view. "People do not want to just read Meyer's books; they want to climb inside them and live there." -- Time "A literary phenomenon." -- The New York Times

Developed from a first-year graduate course in algebraic topology, this text is an informal introduction to some of the main ideas of contemporary homotopy and cohomology theory. The materials are structured around four core areas: de Rham theory, the Čech-de Rham complex, spectral sequences, and characteristic classes. By using the de Rham theory of differential forms as a prototype of cohomology, the machineries of algebraic topology are made easier to assimilate. With its stress on concreteness, motivation, and readability, this book is equally suitable for self-study and as a one-

semester course in topology.

Winner of the 1921 Pulitzer Prize, The Age of Innocence is an elegant, masterful portrait of desire and betrayal in old New York—now with a new introduction from acclaimed author Colm Tóibín for the novel's centennial. With vivid power, Wharton evokes a time of gaslit streets, formal dances held in the ballrooms of stately brownstones, and society people "who dreaded scandal more than disease." This is Newland Archer's world as he prepares to marry the docile May Welland. Then, suddenly, the mysterious, intensely nonconformist Countess Ellen Olenska returns to New York after a long absence, turning Archer's world upside down. This classic Wharton tale of thwarted love is an exuberantly comic and profoundly moving look at the passions of the human heart, as well as a literary achievement of the highest order.

Instagram sensation Clark Little shares his most remarkable photographs from inside the breaking wave, with a foreword by world surfing champion Kelly Slater. Surfer and photographer Clark Little creates deceptively peaceful pictures of waves by placing himself under the deadly lip as it is about to hit the sand. Clark's view is a rare and dangerous perspective of waves from the inside out. Thanks to his uncanny ability to get the perfect shot--and live to share it--Little has garnered a devout audience, been the subject of award-winning documentaries, and become one of the world's most recognizable wave photographers. Clark Little: The Art of Waves compiles over 150 of his images, including crystalline breaking waves, the diverse marine life of Hawaii, and mind-blowing aerial photography. This collection features his most beloved pictures, as well as work that has never been published in book form, with Little's stories and insights throughout. Journalist Jamie Brisick contributes essays on how Clark gets the shot, how waves are created, swimming with sharks, and more. With a foreword by eleven-time world surfing champion Kelly Slater and an afterword by the author on his photographic practice and technique, Clark Little: The Art of Waves offers a rare view of the wave for us to enjoy from the safety of land.

A Most Anticipated Novel by Pop Sugar * Book Riot * Betches * Bustle * and more! "Utterly spellbinding....Witchcraft meets thriller."--Pop Sugar Two sisters go missing on a remote Scottish island. Twenty years later, one is found--but she's still the same age as when she disappeared. The secrets of witches have reached across the centuries in this chilling Gothic thriller from the author of the acclaimed *The Nesting*. When single mother Liv is commissioned to paint a mural in a 100-year-old lighthouse on a remote Scottish island, it's an opportunity to start over with her three daughters--Luna, Sapphire, and Clover. When two of her daughters go missing, she's frantic. She learns that the cave beneath the lighthouse was once a prison for women accused of witchcraft. The locals warn her about wildlings, supernatural beings who mimic human children, created by witches for revenge. Liv is told wildlings are dangerous and must be killed. Twenty-two years later, Luna has been searching for her missing sisters and mother. When she receives a call about her youngest sister, Clover, she's initially ecstatic. Clover is the sister she remembers--except she's still seven years old, the age she was when she vanished. Luna is worried Clover is a wildling. Luna has few memories of her time on the island, but she'll have to return to find the truth of what happened to her family. But she doesn't realize just how much the truth will change her. **NOW A NETFLIX ORIGINAL SERIES In their most daring misadventure, the Baudelaire orphans are adopted by very, very rich people, whose penthouse apartment is located mysteriously close to the place where all their misfortune began. Even though their new home in the city is fancy, and the children are clever and charming, I'm sorry to say that still, the unlucky orphans will encounter more disaster and woe.
