

Paper On Time

The Paper Time Machine is a book that will change the way you think about the past. It contains 130 historical black-and-white photographs, reconstructed in colour and introduced by Wolfgang Wild – creator and curator of the Retronaut website. The site has become a global phenomenon, collecting images that collapse the distance between the past and present and tear a hole in our map of time. The Paper Time Machine goes even further. Early photographic technology lacked a crucial ingredient – colour. As early as the invention of the medium, skilled artisans applied colour to photographs by hand, attempting to convey the vibrancy and immediacy of life in vivid detail. In most cases this was crude and unconvincing. Until now. The time-bending images in The Paper Time Machine have been painstakingly restored and rendered in full and accurate colour by Jordan Lloyd of Dynamichrome, a company that has taken the craft of colour reconstruction to a new level. Each element of every photograph has been researched and colour-checked for historical authenticity. Behold American child labourers from the early twentieth century, alongside the construction of the Statue of Liberty. Marvel at crisp photographs from the Crimean War in 1855, balanced with never-before-seen pictures from the Walt Disney archive. As the layers of colour build up, the effect is disorientingly real and the decades and centuries fall away. It is as though we are standing at the original photographer's elbow. This is a landmark photographic book – a collection of historical 'remixes' that exist alongside the original photographs but draw out qualities, textures and details that have hitherto remained hidden. Let The Paper Time Machine transport you. It is as close to time travel as we are ever likely to get. This is a revised and expanded edition of a seminal work in the logic and philosophy of time, originally published in 1968. Arthur N. Prior (1914-1969) was the founding father of temporal logic, and his book offers an excellent introduction to the fundamental questions in the field. Several important papers have been added to the original selection, as well as a comprehensive bibliography of Prior's work and an illuminating interview with his widow, Mary Prior. In addition, the Polish logic which made Prior's writings difficult for many readers has been replaced by standard logical notation. This new edition will secure the classic status of the book.

Time and the Literary

Papers on Time and Tense

"Old Time Wall Papers" by Kate Sanborn. Published by Good Press. Good Press publishes a wide range of titles that encompasses every genre. From well-known classics & literary fiction and non-fiction to forgotten—or yet undiscovered gems—of world literature, we issue the books that need to be read. Each Good Press edition has been meticulously edited and formatted to boost readability for all e-readers and devices. Our goal is to produce eBooks that are user-friendly and accessible to everyone in a high-quality

digital format.

Time and the literary: the immediacy of information technology has supposedly annihilated both. Email, cell phones, satellite broadcasting seem to have ended the long-standing tradition of encoding our experience of time through writing. Paul de Man's seminal essay "Literary History and Literary Modernity" and newly commissioned essays on everything from the human genome to grammatical tenses argue, however that the literary constantly reconstructs our understanding of time. From eleventh-century France or a science-fiction future, Time and the Literary shows how these two concepts have been and will continue to influence each other.
