There's a new set of 3Rs for our kids-respect, responsibility, and resilience-to better prepare them for life in the real world. Once developed, these skills let kids take charge, and let parents step back, to the benefit of all. Casting hover mothers and helicopter parents aside, Vicki Hoefle encourages a different, counter-intuitive-yet much more effective-approach: for parents to sit on their hands, stay on the sidelines, even if duct tape is required, so that the kids step up. Duct Tape Parenting gives parents a new perspective on what it means to be effective, engaged parents and to enable kids to develop confidence through solving their own problems. This is not a book about the parenting strategy of the day-what the author calls "Post-It Note Parenting"-but rather a relationship-based guide to span all ages and stages of development. Witty, straight-shooting Hoefle addresses frustrated parents everywhere who are ready to raise confident, capable children to go out in the world. Parenting is rewarding, and at the same time loaded with responsibilities and new emotions. Learn how to navigate through parenthood by accepting the challenges of parenting. In this book you will begin to understand how your life will change, but no lesson can be quicker than holding that tiny newborn in your arms and realizing just how much has changed. You may have heard story after story, listened to examples, but many of the other parenting books available look at specific problems and solutions relating to discipline and educating the child. These books overlook a very important aspect of parenting. You are the parent, who should look at parenthood as an opportunity to improve yourself. You are the person(s) responsible for educating your child and being an example for your child. Your children will look to you for their needs, wants, desires, and correct behavior. In this book you will learn:\*

- \* The challenges of parenting\*
- \* The top rewards of raising a child\*
- \* What makes a good parent\*
- \* What doesn't make a good parent

The explanations, tips, and examples throughout this book are your chart to navigate parenthood, so you can be a better you and raise a child you will be proud of. As a parent, your happiness comes from the happiness of your children. A failed lesson in proper behavior due to your actions being observed makes parents and children unhappy. For your success:\*

- \* Gain tips on how to be honest about yourself\*
- \* Learn how to control your emotions in front of your child\*
- \* Explore ways to become a better parent

Act now, so you can start correcting yourself for the betterment of your children. Despite well documented health risks, young women are still drawn to the act of smoking and continue to smoke at an alarming rate. A century ago, women were vocal leaders of campaigns against tobacco across North America. In *Sex, Lies, and Cigarettes*, Sharon Anne Cook explores the history of the paradoxical relationship

between women and the cigarette, in a sensitive and lively description of the many different meanings that smoking has held for women. Focusing on the social context of smoking, Cook explores its allure for elite, middle-class, working, and marginalized women from the late-nineteenth to the early twenty-first centuries. She argues that smoking's attraction is rooted in women's changing identity formation and in strategies for empowerment, an idea enriched through extensive analysis of visual culture. It is in these images (yearbooks, posters, photographic collages, print advertisements, billboards, movies) but also in the act of smoking itself, that women harnessed the power of the visual. Smoking remains a powerful way for women to express themselves and is closely connected to the processes of modernity, sexualization, and commodification of desire. Textual documents (newspapers, magazine features, textbooks, teachers' guides) and oral testimony are also explored to show how dominant discourses of smoking, sexuality, and health have shaped women's experiences and how women have moulded these discourses themselves. The first comprehensive study of women and smoking in Canada, *Sex, Lies, and Cigarettes* creates a rich portrait of the cultural factors that have resulted in over a century of women smokers.

***Children are already learning at birth, and they develop and learn at a rapid pace in their early years. Despite the fact that***

***they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.***

***As I begin to write this Preface, I feel a rush of excitement. I have now finished the book; my gestalt is coming into completion. Throughout the months that I have been writing this, I have, indeed, been intrinsically motivated. Now that it is finished I feel quite competent and self-determining (see Chapter 2). Whether or not those who read the book will perceive me that way is also a concern of mine (an extrinsic one), but it is a wholly separate issue from the intrinsic rewards I have been experiencing. This book presents a theoretical perspective. It reviews an enormous amount of research which establishes unequivocally that intrinsic motivation exists. Also considered herein are various approaches to the conceptualizing of intrinsic motivation. The book concentrates on the approach which has developed out of the work of Robert White (1959), namely, that intrinsically motivated behaviors are ones which a person engages in so that he may feel competent and self-determining in relation to his environment. The book then considers the development of intrinsic motivation, how behaviors are motivated intrinsically, how they relate to and how intrinsic motivation is extrinsically motivated behaviors, affected by extrinsic rewards and controls. It also considers how changes in intrinsic motivation relate to changes in attitudes, how people attribute motivation to each other, how the attribution process is motivated, and how the process of perceiving motivation (and other internal states) in oneself relates to perceiving them in others.***

As the baby boomer generation approaches midlife, many dual-earner couples are struggling with issues of simultaneously caring for children while tending to aging parents. This timely book uncovers the circumstances faced by these workers, known as the “sandwiched generation”, and identifies what they need in order to fulfill their work and family responsibilities. Authors Margaret B. Neal and Leslie B. Hammer suggest the workplace as an arena for change, proposing that it adapt to the situations of today’s workers by providing flexibility and understanding the needs and priorities of families. Based on a four-year national study funded by the Alfred P. Sloan Foundation, *Working Couples Caring for Children and Aging Parents* examines: employer and governmental initiatives affecting work and family life in the United States; supports provided to working caregivers in countries other than the United States; the effects of being “sandwiched” on work-family fit, well-being, and work; and changes in work and family roles and outcomes over time. This book will interest a broad audience, including students, policymakers, family care practitioners, IO psychologists, work-life professionals, gerontologists, sociologists, human resource managers, and occupational health psychologists.

Along with bibliographic information, the expected date of publication and the names of literary agents for individual titles are provided. Starred reviews serve several functions: In the adult section, they mark potential bestsellers, major promotions, book club selections, and just very good books; in the children's section, they denote books of very high quality. The unsigned reviews manage to be discerning and sometimes quite critical.

Child abuse and neglect are intractable problems exacting a terrible toll on children and rending the very fabric of our society. What can be done to reduce the suffering? If there were simple solutions to abuse and neglect they would have been discovered long ago. There are no easy answers, but in this vivid history of child protection in America, John E.B. Myers introduces realistic policies that will reduce maltreatment and strengthen the system that protects our children. Before it is possible to design viable improvements in today's system, it is necessary to understand how it evolved. The sweeping, beautifully written account of child protection in America traces its growth from colonial days to the present--from the rise and gradual disappearance of orphanages, the growth of foster care, the birth of organized child protection in 1874, and the rise of private societies to prevent cruelty, to the twentieth-century transition to government-operated child protection. Myers goes on to describe the principal causes of child maltreatment, including intergenerational transmission of violence, poverty, substance abuse, cultural violence, excessive corporal punishment, sexual deviance, evolution, mental illness, and domestic violence. Once the causes of maltreatment are clear, it is possible to create solutions. Some of the proposals outlined have been in play for more than a century, while others are new. Policies to combat poverty, expand nurse home visiting programs, increase access to day care, strengthen a sense of community, outlaw corporal punishment, rethink our attitude toward alcohol, and lower the toxicity in popular culture are rooted in a deep understanding of the cycle of violence and challenge traditional ways of thinking. Since it will never be possible to prevent all maltreatment, it is critical to strengthen the existing child protection system. Attainable reforms such as dealing with the lingering effects of racism in the child welfare, reworking funding mechanisms, refocusing leadership, creating a less adversarial system, strengthening foster care, and reinventing the juvenile court point to flaws in our system but demonstrate that progress is possible. This provocative book will challenge all those concerned with children's welfare to move toward real solutions that will make life better for America's most vulnerable children.

Behavior And Responsibility For A Successful Future You're about to discover how...Parenting, rewards you with a successful child, you can be proud of. Sometimes there are challenges that you must face. It can be vexing and test out the most patient of individuals. You are seeking ways to teach your child how to be well-mannered, disciplined, and responsible in life. The 40 tips within these pages are a pathway to help you face situations with a better outlook and solve the needs you have. You want your child to be respected, a favorite among adults, and have a lot of friends. It all begins with the manners they display, the lessons they take from you, and giving your children a solid base to work with. A misunderstanding many people have is that discipline, manners, and responsibility cannot be taught until later. The cognitive development of your infant, as he or she becomes one year of age, is extremely rapid. From one year to two years old, a lot of information is being observed, processed, and recorded. How you act will be noticed. Your child will pick up the words you speak. They will mimic you, even when they are just beginning to crawl, walk, and run. You can start the important life lessons from one year of age and continue these lessons as your child becomes older. Here Is A Preview Of What You'll Learn... 10 tips for disciplining without negative rewards. 10 tips for teaching your child proper manners in all situations. 10 tips on how to give responsibilities and teach responsibility to your child. 10 tips on developing independence in your child. Much, much more! A part of growing up is being independent of another; especially, of one's parents. Independence is one more lesson that is required to ensure your child can have the success you desire them to have. Here are a few pointers to get you started: Use consistency in all lessons. Provide your child with a routine that ensures the behavior you desire. Observe your child, reflect on your actions, and then respond accordingly. The best positive reward is not material, but physical-love and hugs. As long as you provide unending love and affection to your child, they will grow up to be respectful, happy, successful adults capable of any task they wish to accomplish. Instead of using the phrase "do what I say and not what I do," you can use the phrase "follow my lead" because you will show your child from toddlerhood to adulthood the best ways to be a success-whatever that success might equate to.

***The adolescent period has attracted much attention as an ideal period for investigating interactive models incorporating biological maturation with intra- and interpersonal development. The focus of this volume is on adolescent transitions in three domains: the peer system, the family system, and school and work contexts. Its goal is to highlight specific aspects of innovative research programs and initiatives, and look forward to future directions in the field. Because interest in adolescence has spanned the disciplines, this volume reflects a multidisciplinary perspective--presenting research and methods from life-span development, sociology, anthropology, and education to provide exemplars of the range of approaches used in understanding the processes and transitions of adolescent development. These exemplars encompass the breadth not only of the investigation of adolescence--from survey research on drug use to ethnographic studies of involvement in criminal activities--but also of individual differences in the experience of adolescent transitions--from the transition to college and work in White, middle-class youth to the work experiences of urban, African-American high school students. The chapters collected here offer a rich sample of the diversity of research experience with an emphasis on in-depth investigation of adolescent transitions. *This second edition of "SOS" provides parents with guidance for handling a variety of common behavior problems based on the behavior approach to child rearing and discipline. This approach suggests that good and bad behavior are both learned and can be changed, and proposes specific methods, skills, procedures, and strategies for parents to use in getting improved behavior from their children. The guide is divided into four sections. Section 1 presents some fundamentals of child behavior and effective discipline. Some of the causes of children's misbehavior are examined as well as ways of increasing good behavior and eliminating bad ones. Section 2 provides advice for implementing the "time-out" method. Section 3 gives suggestions on how to: (1) manage bad behavior away from home; (2) use points, tokens, and contracts; (3) use time-out on two children at the same time; (4) use time-out on a toy instead of the child; (5) handle aggressive and dangerous behavior; and (6) help children express feelings. Section 4 suggests some additional resources for helping children. Each chapter includes a review of the most important ideas and instructions presented. The book's two appendices include an index of problem behaviors, quizzes and answers for parents, more resources for professionals, and tear-out sheets for parents and teachers. Approximately 60 references are included. A videotape, not available from ERIC, demonstrates the child-rearing rules, and errors to avoid, as well as other child management methods. A printed "Video Leader's Guide" for the training leaders provides objectives, suggested outlines for workshops, and guidelines for discussing the behavior vignettes in the video. Psychologist Diana Baumrind's revolutionary prototype of parenting, called authoritative parenting, combines the best of various parenting styles. In contrast to previously advocated styles involving high responsiveness and low demandingness (i.e., permissive parenting) or low responsiveness and high demandingness (i.e., authoritarian parenting), authoritative parenting involves high levels of both responsiveness and demandingness. The result is an appropriate mix of warm nurturance and firm discipline. Decades of research have supported the prototype, and we now know that authoritative parenting fosters high achievement, emotional adjustment, self-reliance, and social confidence in children and adolescents. In this book, leading scholars update our thinking about authoritative parenting and address three unresolved issues: mechanisms of the style's effectiveness, variations of effectiveness across cultures, and untangling how parents influence children from how children influence them. By integrating perspectives from developmental and clinical psychology, the book will inform prevention and intervention efforts to help parents maximise their children's potential.

Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and

practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.
