to persuade others to meet various requests, suggestions, and commands. For each technique, the authors explore the idea behind it, what empirical research says about it, and

what the psychological mechanism behind its effectiveness is, aka, why it works. The techniques included span across multiple areas in people's everyday lives, ranging from

File Type PDF Past Into Present

business negotiations, managements, marketing, and close relationships, to people's behavior in public as well as in their private sphere. Covering research from the 1970s to the

This book looks closely at herbal product development and commercialisation. In spite of an ever-growing demand, there is a dearth of safe and effective herbal products that meet consumers ' expectations.

Every day we are asked to fulfil others ' requests, and we make

techniques according to a common characteristic: for instance, early chapters describe "sequential" techniques, and techniques involving egotistic mechanisms, such as using the name of one ' s interlocutor.

Later chapters present techniques based on gestures and facial movements, and others based on the use of specific words, re-examining on the way whether "please" really is a magic word. In every case,

immensely effective because the data are in a form that evokes natural perceptual processing of the data into impressions of the presence and spatial disposition of apparent materials, objects, and

Although there are as many answers to the question of how organizations can gain competitive advantage in today's global economy as there are books and experts, one lesson seems very clear: traditional answers and resources are no longer sufficient.

# File Type PDF Past Into Present Effective Techniques For First Person Historical Interpretation

This seminal book offers not only an answer regarding how to gain competitive advantage through people, but also a brand new, untapped human resource--psychological capital, or simply PsyCap. Generated from both the positive-psychology

# File Type PDF Past Into Present Effective Techniques For First Person Historical Interpretation

movement and the authors' pioneering work on positive organizational behavior, PsyCap is a rigorous concept: to be included in PsyCap, a given positive construct must be based on theory, research, and valid measurement, must be open

to development, and must have measurable performance impact. The positive constructs that have been determined to best meet these PsyCap criteria--efficacy (confidence), hope, optimism, and resiliency--are covered in separate chapters in Psychological

demonstrating the performance impact of PsyCap. They go on to provide the PsyCap Questionnaire (PCQ) as a measurement tool, and the PsyCap Intervention (PCI) as a development aid. Psychological Capital and Beyond provides theory,
