**Intellectual property law and practice in China has changed dramatically since the first edition of this influential book published in 2005. Today, judicial and administrative application of law plays a major role, and accordingly this entirely rewritten new edition draws on an abundance of court and administrative decisions clarifying how the law is applied. In a thorough and systematic manner, the authors clearly demonstrate the sophisticated level of legal certainty available for domestic and foreign entities doing business in China, including the adaptation of the legal framework to new technologies, broadened scope of protected subject matter, improved quality of filings, and significant enhancement of enforcement not only with regard to remedies but also to procedural aspects. Providing comprehensive coverage of all aspects of intellectual property protection in China - including analysis of IP-related provisions of China's new Civil Code - the book emphasizes issues of concern to foreign traders and investors such as the following: copyright law and software protection; protection of trademarks, including Chinese character and Roman script trademarks, well-known marks and bad faith applications; technology transfer; enforcement of trade secret and patent protection; criminal liability for infringement; unfair competition and antitrust law; role of the binding Interpretations of the Supreme People's Court; administrative regulations that supplement the laws; cooperation with administrative authorities; protection of geographical indications; protection of trade names; domain name dispute resolution; special patent-related laws protecting such areas as plant varieties, integrated circuit layout designs; and relevant provisions of the distinct laws of Hong Kong and Macao. Full descriptions of the competencies of China's IP-related institutions are included with detailed attention to procedural matters. Brief historical notes in each chapter feature the most significant changes in each amendment of law and regulation. Because in China the laws are supplemented and interpreted by numerous guidelines and circulars issued by ministries or courts, the up-to-date knowledge and awareness provided in this new edition is essential for all companies investing in China or considering such investment, as well as for practitioners counselling their clients on strategies. In addition, officials and policymakers involved in trade or other relations with China will benefit from a comprehensive update of what the current law is and a critical view of what the challenges are.**

**Invention Analysis and Claiming presents a comprehensive approach to analyzing inventions and capturing them in a sophisticated set of patent claims. A central theme is the importance of using the problem-solution paradigm to identify the "inventive concept" before the claim-drafting begins. The book's teachings are grounded in "old school" principles of patent practice that, before now, have been learned only on the job from supervisors and mentors.**

**The guide book by Indian Innovators Association will help researchers and innovators to clearly understand the difference between patent licensing, technology commercialization and innovation marketing. Everything is important but each one is different. Intellectual property is a common thread and the reader is taken through the fundamentals of IPR before explaining each of the three. topics. "Excited about your research and innovation but why is market unresponsive?" Whether you're a patent examiner, patent attorney, commercial patent searcher, patent liaison, IP librarian, law professor, or competitive intelligence analyst, you'll find Patent Searching: Tools and Techniques to be just the guide you have been waiting for, with a range of approaches to patent searching that will be useful to you regardless of your technical expertise or role in the intellectual property community.**

**There are five parts to this book. Part I (Essentials) breaks down the bulky content of the MPEP 9th Edition into a simple and easy to remember format outlining the core U.S. patent law. I emphasize materials that frequently appear in officially published patent bar exams, and also AIA materials based on both MPEP and USPTO's frequently asked AIA questions. Each topic is itemized with bullet points accompanied by notes, examples and comparisons to enhance your learning experience. The MPEP chapters are not designed in a sequence conducive to learning. This book reorders them in a logical sequence starting with chapters 200, 600, 700, 2100, 800, 1200, 1400 and 1800. These are the key MPEP chapters for passing the patent bar exam. The remaining MPEP chapters mainly require memorization. Part II (Techniques) reveals techniques for passing the bar exam. Honing these techniques will save you time and avoid costly mistakes. As a few representative examples, techniques on Process of Elimination and Time Saving Tips on Exam Date will help you manage your exam time more efficiently, and techniques on Finding Key Words in Claim Drafting Questions will help you quickly discover if a dependent claim lacks antecedent basis, or is in the alternative way, or further limits the preceding claim, or is indefinite.Part III includes 30 curated questions from published bar exams focusing on all claims drafting issues. Claims are the most important part of the patent law. A considerable number of claim related questions appear in every patent bar exam, pre-AIA and post-AIA.Part IV includes 50 frequently asked AIA Q&A questions from the latest www.USPTO.gov.Part V includes 50 AIA multiple-choice questions that mimic the difficulties and the styles likely in a bar exam. This 5.5x8.5 travel size book, with over 400 pages and wide margins for writing your own notes, provides an effective learning experience for your patent bar exam. It is a summary of my own learning experience in passing the bar exam in March 2016 on the first attempt.**

It is a casebook on patent law that involves comparative jurisprudence tailored for India. The book is best described by highlighting the following features: (1) Casebook format - The casebook format suits practitioners and judges. It allows the reader to independently interpret and assess the implication of each caselaw, which forms a vital component of the practice of law. The reader is assisted towards this objective by only containing extracts of the relevant portions of the judgment. Even from an academic perspective, it provides an unfiltered view of the law, better than any unnecessary prose. (2) Comparative approach - For each topic of patent law, the book would provide a single point congregation of the relevant Indian provisions and extracts from relevant caselaw across India, the UK, the EU and the USA. This approach is ideal for India, where jurisprudence on the subject is limited. Courts, practitioners, and the Patent Office often resort to such a comparative approach to learn from the experiences of other jurisdictions. (3) Notes - Author's notes before and after each caselaw or topic fulfil four purposes: (i) set the context for the reader; (ii) critique the caselaw or to bring focus on to issues that arise in practice; (iii) contextualize the discussion to the Indian statute; and (iv) examine the historical perspective, including the legislative history. (4) Focus on law - it is a no-nonsense, no-rhetoric book, focussing on the law, its interpretation and application.

Tremendous confusion has revolved around the theory and application of the doctrine of essential elements in Canadian patent law ever since the Supreme Court of Canada first introduced the doctrine in Free World Trust c. Electro Sant é Inc. in recent years, the Canadian Intellectual Property Office's (CIPO) interpretation and application of the doctrine in its patent application examination guidelines has been the subject of considerable criticism from the Canadian patent profession. However, CIPO's misapplication of the doctrine in recent years' Patent Agent Qualifying Examination has received relatively little attention. This paper examines the application of the doctrine of essential elements in recent years' Canadian Patent Agent Qualifying Examination. The analysis begins with a thorough and comprehensive review of the doctrine of essential elements under Canadian patent law. The analysis reviews the last ten years' Canadian Patent Agent Examination, with a focus on recent years' emphasis on the doctrine of essentiality. Despite the fact that the doctrine itself is still unsettled under Canadian law, the approach taken on recent years' Patent Agent Exams is at best an ambiguous, and at worst an inaccurate application of the doctrine. This paper concludes by demonstrating that the concerns surrounding the doctrine of essentiality may be significant contributing factor to invalidity issues surrounding recent years' Patent Agent Exams.

Creations of mind can vary in its form—from a brilliant thought to a gizmo gadget to a popular fiction—all come under the legal term called Intellectual Property. In the world of upheaval technology, where information on anything and everything is freely available and accessible, guarding these intellectual properties legally becomes a prerequisite. This book comprehensively discusses how to manage and secure the intellectual property and the legal norms associated with it. The book begins with introducing the concepts related to Intellectual Property and the WTO Agreement. The following chapters explain various types of Intellectual Property Rights such as Patents, Copyrights, Trade Marks, Industrial Designs, Integrated Circuits, and Geographical Indications. These chapters also provide in-depth and detailed insight into regulations and procedures for protection of Intellectual Property Rights. The book further explicates the creation of Intellectual Property and spells out the conceptual framework for creativity and innovation. Management of Intellectual Property is as important as its creation, and therefore the concluding chapters describe the activities for management and commercialization of Intellectual Property Rights, and the emerging issues surrounding them. Two separate cases have been added at the end of the book, to provide an analytical insight of the subject to the students. The book is meant for the undergraduate and postgraduate students of management and technology. Besides, the book can be useful for the undergraduate students of law as a ready reference.
