

Paths Of Life American Indians Of The Southwest And Northern Mexico

Modern American Indian life is urban, rural, and everything in-between. Lobo and Peters have compiled an unprecedented collection of innovative scholarship, stunning art, poetry, and prose that documents American Indian experiences of urban life. A pervasive rural/urban dichotomy still shapes the popular and scholarly perceptions of Native Americans, but this is a false expression of a complex and constantly changing reality. When viewed from the Native perspectives, our concepts of urbanity and approaches to American Indian studies are necessarily transformed. Courses in Native American studies, ethnic studies, anthropology, and urban studies must be in step with contemporary Indian realities, and American Indians and the Urban Experience will be an absolutely essential text for instructors. This powerful combination of path-breaking scholarship and visual and literary arts—from poetry and photography to rap and graffiti—will be enjoyed by students, scholars, and a general audience. A Choice Outstanding Academic Book.

In The Crimson Path of Honor, the Civil War is over, and a violent period known as the Indian Wars is erupting. Ignoring the danger, a feisty young woman from Boston rebels against her tyrannical father’s plans to marry her off to a family friend, and she seizes an opportunity to go west to teach. On the way to the Oregon Territory, her stagecoach is attacked, and she is captured by a marauding band of Lakota (Sioux) Indians who call the Rocky Mountains home. Accepting her perilous situation, the young woman courageously confronts the daily hardships inherent in early Native American life. At first treated like an outcast, she eventually adapts to her circumstances and comes to respect the camaraderie of the Indians, even falling in love with her captor. Over time, she begins to challenge her abductor’s traditional views on bloodletting and violence as the path of honor. Torn by her inability to justify her growing feelings for her captor in a culture of violence, she continually wonders why God has abandoned her in such a desolate place. “M.B. Tosi has done it again. This is the historical novel at its best—realistic, filled with tough issues against a background of conflict and unrest.” —Jim Langford, Director Emeritus of University of Notre Dame Press

"A terrific guide for the novice that offers a wealth of valuable information. This book is academic, yet written in an approachable style. Maureen T. Schwarz, author of Blood and Voice: The Life Courses of Navajo Women Ceremonial Practitioners The Columbia Guide to American Indians History and Culture Also Include: The Columbia Guide to American Indians of the Lorella Fowler The Columbia Guide to American Indians of the Southeast Theda Perdue and Michael D. Green A major work on the history and culture of Southwest Indians, The Columbia Guide to American Indians of the Southwest tells a remarkable story of cultural continuity in the face of migration, displacement, violence, and loss. The Native peoples of the American Southwest are a unique group, for while the arrival of Europeans forced many Native Americans to leave their land behind, those who lived in the Southwest held their ground. Many still reside in their ancestral homes, and their oral histories, social practices, and material artifacts provide revelatory insight into the history of the region and the country as a whole. Trudy Griffin-Pierce incorporates her lifelong passion for the people of the Southwest, especially the Navajo, into an absorbing narrative of pre-and postcontact Native experiences. She finds that, even though the policies of the U.S. government were meant to promote assimilation, Native peoples formed their own response to outside pressures, choosing to adapt rather than submit to external change. Griffin-Pierce provides a chronology of instances that have shaped present-day conditions in the region, as well as an extensive glossary of significant people, places, and events. Setting a precedent for ethical scholarship, she describes different methods for researching the Southwest and cites sources for further archaeological and comparative study. Completing the volume is a selection of key primary documents, literary works, films, Internet resources, and contact information for each Native community, enabling a more thorough investigation into specific tribes and nations.

Blending an engaging narrative style with broader theoretical considerations, James Taylor Carson offers the most complete history to date of the Mississippi Choctaws. Tracing the Choctaws from their origins in the Mississippiian cultures of late prehistory to the early nineteenth century, Carson shows how the Choctaws struggled to adapt to life in a New World altered radically by contact while retaining their sense of identity and place. Despite changes in subsistence practices and material culture, the Choctaws made every effort to retain certain core cultural beliefs and sensibilities, a strategy they conceived of as following "the straight bright path." This work also makes a significant theoretical contribution to ethnohistory as Carson confronts common problems in the historical analysis of Native peoples.

A unique portrayal of four members of the American Indian Movement—with fascinating full-color images created by Leonard Peltier! In I Will, Sheron Wyant-Leonard weaves the personal recollections of four members of the American Indian Movement—Leonard Peltier, Dennis Banks, Dorothy Ninham, and her husband Herb Powless—into a unique narrative to expose their trials and tribulations over the course of two decades. When the last gunshots of the Indian Wars of the nineteenth century faded away, a dark and desperate time began for Native American people. Poverty, neglect, and hopelessness hung over the land. But as the seventies dawned, a powerful movement for change by newly urban Indians was born with the words “American Indian Movement.” This story includes a brief look at their childhoods as told by the people who lived it, including their government boarding schools, reservation life, the fight against termination, and the founding of their resistance with building takeovers and government saboteurs, a prison escape, including the largest FBI manhunt in history. They walked the line between courage and fear and changed the direction of Native history forever.

The average life expectancy of a male born on the Pine Ridge reservation in South Dakota today is 40 years oldóthe lowest life expectancy of all peoples not only in the U.S. but also in the entire Western Hemisphere. Written by and for nurses, this is the first text to focus exclusively on American Indian health and nursing. It addresses the profound disparities in policy, health care law, and health outcomes that affect American Indians, and describes how these disparities, bound into the cultural, environmental, historical, and geopolitical fabric of American Indian society, are responsible for the marked lack of wellbeing of American Indians. American Indian nurse authors, natives of nine unique American Indian cultures, address the four domains of healthóphysical, mental, spiritual, and emotional—within each region to underscore the many stunning disparities of opportunity for health and wellbeing within the American Indian culture as opposed to those of "Anglo" culture. In an era of cultural competency, these expert nurse authors bring awareness about what is perhaps the least understood minority population in the U.S. The text covers the history of American Indians with a focus on the drastic changes that occurred following European contact. Included are relevant journal articles, historical reports, interviews with tribal health officials, and case studies. While the Red-Winged Blackbird Sings examines the ways in which the Akimel O'odham ("River People") and their ancestors, the Huhugano, adapted to economic, political, and environmental constraints imposed by federal Indian policy, the Indian Bureau, and an encroaching settler population in Arizona's Gila River Valley. Fundamental to O'odham resilience was their connection to their sense of peoplehood and their hidngad ("lifeway"), which culminated in the restoration of their water rights and a revitalization of their Indigenous culture. Author Jennifer Bess examines the Akimel O'odham's worldview, which links their origins with a responsibility to farm the Gila River Valley and to honor their history of adaptation and obligations as "world-builders"–co-creators of an evermore life-sustaining environment and participants in flexible networks of economic exchange. Bess considers this worldview in context of the Huhugan–Akimel O'odham agricultural economy over more than a thousand years. Drawing directly on Akimel O'odham traditional ecological knowledge, innovations, and interpretive strategies in archives and interviews, Bess shows how the Akimel O'odham engaged in agricultural economy for the sake of their lifeways, collective identity, and actualization of their sacred stories. Where the Red-Winged Blackbirds Sing highlights the values of adaptation, innovation, and co-creation fundamental to Akimel O'odham Lifeways and chronicles the contributions the Akimel O'odham have made to American history and to the history of agriculture. The book will be of interest to scholars of Indigenous, American Southwestern, and agricultural history.

Self-Determination

From the year of Arizona's statehood to its centennial in 2012, narratives of the state and its natural landscape have revealed—and reconfigured—the state's image. Through official state and federal publications, newspapers, novels, poetry, autobiographies, and magazines, Kim Engel-Pearson examines narratives of Arizona that reflect both a century of Euro-American dominance and a diverse and multilayered cultural landscape. Examining the written record at twenty-five-year intervals, Writing Arizona, 1912–2012 shows us how the state was created through the writings of both its inhabitants and its visitors, from pioneer reminiscences of settling the desert to modern stories of homelessness, and from early-twentieth-century Native American "as-told-to" autobiographies to those written in Natives' own words in the 1970s and 1980s. Weaving together these written accounts, Engel-Pearson demonstrates how government leaders' and boosters' promotion of tourism—often at the expense of minority groups and the environment—was swiftly complicated by concerns about ethics, representation, and conservation. Word by word, story by story, Engel-Pearson depicts an Arizona whose narratives reflect celebrations of diversity and calls for conservation—yet, at the same time, a state whose constitution declares only English words "official." She reveals Arizona to be constructed, understood, and inhabited through narratives, a state of words as changeable as it is timeless.

Published to accompany an exhibition at The Metropolitan Museum of Art, this handsome catalogue brings together well over one hundred Native North American works of art from the collection of Charles and Valerie Diker. Representing many different peoples and traditions and a wide variety of materials and functions, these superb objects reflect the great cultural and artistic diversity of the Native peoples of the western hemisphere. Included in the exhibition are quilted and beaded works of the Plains Indians, pottery and basketry vessels of the Southwest and California, and wood sculpture of the Pacific Northwest, among many other forms and traditions. Often viewed in ethnographic terms, these works are presented here for their aesthetic rather than their anthropological value. As W. Richard West, director of the National Museum of the American Indian, Smithsonian Institution, points out in his introduction to this book, "these objects created by American Indians constitute a body of remarkable art by any aesthetic measure." Each chapter, contributed by an expert in the field, serves to introduce the reader to aspects of American Indian art. Janet Catherine Berlo, Professor of Art History and Susan B. Anthony Professor of Gender and Women's Studies at the University of Rochester, discusses the so-called ledger drawings, images of Plains Indian life that record historic and mythic events of the late nineteenth and the early twentieth century. T. J. Brassler, renowned Plains Indian ethnologist and author of many books and articles on aspects of Native American art and culture, describes the bead and quillwork of the peoples of the Great Plains and the Eastern Woodlands. Bruce Bernstein, Assistant Director of Cultural Resources at the National Museum of the American Indian, Washington, D.C., reviews elements of the multifaceted art of the Southwest. Allen Wardwell, specialist in the art of the Pacific Northwest and curator of many exhibitions, served as general editor of this project and also contributed the chapter on American Indian sculpture in both the Northwest and the Northeast. Color photographs taken especially for this book demonstrate the high quality of these exciting and evocative pieces. [This book was originally published in 1999 and has gone out of print.
