Selecting the right
technology is one
of the most critical
decisions in
technology driven

Universal
Tutorials

enterprises, and no selection is complete without a thorough and informed evaluation. This book explores the digital transformation movement from three perspectives: the technological, the personal, and

the organizational. The technical perspective analyses and evaluates new and up and coming technologies such as IoT and Cloud Technology. The personal perspective focuses on the consumer's

Universal
Tutorials

attitude and
experience in the
adoption of
technologies such
as smart homes,
smart watches,
drones and wireless
devices. And the
organizational
perspective focuses
on evaluating how
technology-driven
an organization and

their core activities or products are. This book is an ideal reference for managers who are responsible for digital transformation in their organizations and also serves a good starting point for researchers interested in

Universal
Tutorials

understanding the trend. The book contains case studies that may be used by educators in MBA and Engineering and Technology Management MS programs covering digital transformation related courses.
