

Pearl Harbor Apprentice Exam

vividly portrays his Mexican and Indian relatives and his confusing, often painful, childhood interactions with the dominant white society. He left childhood behind when he was sent to Vietnam. There he found hatred, terror, and camaraderie in equal measure. On returning from Vietnam, Mendoza faced professional, economic, and personal struggles but found consolation in love, family, and friendship. His moving account of his first wife's courageous, losing battle with. The early morning hours of July 6, 1943, found the USS Helena off the Solomon Islands in what would later be known as the Battle of Kula Gulf. But the ship's participation in the battle came to a swift end when three Japanese torpedoes suddenly struck. One hundred and sixty-eight sailors went down with the ship, many never surviving the initial torpedo hits. As the last of the Helena disappeared below the ocean's surface, the remaining crewmen's struggle for survival had only just begun. Sunk in Kula Gulf tells the epic story of the Helena's survivors. Two destroyers plucked more than seven hundred from the sea in a night rescue operation as the battle continued to rage. A second group of eighty-eight sailors clustered into three lifeboats made it to a nearby island and was rescued the next day. A third group of survivors, spread over a wide area, was missed entirely. Clinging to life rafts or debris, the weary men were pushed away from the area of the sinking by a strong current. After enduring days at sea under the hot tropical sun, they finally found land. It was, however, the Japanese-held island of Vella Lavella, deep behind the front lines. The survivors organized and disappeared into the island's interior jungle. Living a meager existence, the group evaded the Japanese for eight days until the U.S. Navy evacuated the shipwrecked sailors in a daring rescue operation. Using a wide variety of sources, including previously unpublished firsthand accounts, John J. Domagalski brings to life this amazing, little-known story from World War II.

Acclaimed historian and museum curator Richard Rabinowitz tells the story of his immigrant Jewish family through the everyday objects in their lives, from chairs and bottle openers to bottles of perfume. Vivid, absorbing, and powerfully honest, this is a story of one family and one community but also of emotional touchstones that anchor us all.

"An oral and pictorial history featuring the personal stories of 50 Honolulu civilians, including civilian deaths by 'friendly fire.' Stories of WWII life in Honolulu under Martial Law, including the military takeover of civil government, courts, schools, homes, and the control of civilian currency, curfew, blackout, air-raid drills, gas masks, censorship,

evacuations." -- Goodreads.com.

Boys to Men is a fascinating account of life in America from before the great depression through World War II and beyond. A common thread is present, due to the fact that all these stories are vividly depicted by some of the crew, as well as a former Lieutenant on the USS Perkins during the war. Each author brings a different background and flavor to the book. From life aboard the ship during normal operations, to the horrors of battle and her ultimate sinking in 1943, these pages are a tribute to the brave men that served aboard the USS Perkins. Stories include everything from slices of life in America during hard, but simpler times, to the bombing of Pearl Harbor. Inside is a moving first hand account by a Lieutenant of the Perkins, who also served aboard the USS Oklahoma during the Pearl Harbor attack and narrowly escaped with his life. Detailed descriptions of combat at sea, to life after the Navy, paint a complete picture of a generation filled with great difficulties and even greater successes. The Perkins was a vessel instrumental in transporting her crew on vast journeys to and from exotic and not so exotic destinations. Like the ship, these stories cover a great deal of time and territory. Although she slipped into the darkness to rest forever in depths of a silent watery grave, the Perkins first took these men on perhaps the greatest journey of all the journey from boys to men.

The dramatic account of two American warships in the South Pacific, this book follows the USS Astoria (CA-34) and USS Chicago (CA-29) during the late summer of 1942, when both participated in the early days of the critical battle for Guadalcanal. Drawing on a variety of firsthand accounts, some previously unpublished, the book tells the story from the perspective of the men aboard each ship, transporting readers inside the gun turrets, behind the lookout binoculars, and below deck as the battle rages. Individual stories of heroism, sacrifice and survival unfold as both vessels meet their fates in the South Pacific.

Warship Builders is the first scholarly study of the U.S. naval shipbuilding industry from the early 1920s to the end of World War II, when American shipyards produced the world's largest fleet that helped defeat the Axis powers in all corners of the globe. A colossal endeavor that absorbed billions and employed virtual armies of skilled workers, naval construction mobilized the nation's leading industrial enterprises in the shipbuilding, engineering, and steel industries to deliver warships whose technical complexity dwarfed that of any other weapons platform. Based on systematic comparisons with British, Japanese, and German naval construction, Thomas Heinrich pinpoints the distinct features of American shipbuilding methods, technology development, and management practices that enabled U.S. yards to vastly outproduce their foreign counterparts. Throughout the book, comparative analyses reveal differences and similarities in American, British, Japanese, and German naval construction. Heinrich shows that U.S. and German shipyards introduced electric arc welding and prefabrication methods to a far greater extent than their British and Japanese counterparts between the wars, laying the groundwork for their impressive production records in World War II. While the American and Japanese navies relied heavily on government-owned navy yards, the British and German navies had most of their combatants built in corporately-owned yards, contradicting the widespread notion that only U.S. industrial mobilization depended on private enterprise. Lastly, the U.S. government's investments into shipbuilding facilities in both private and government-owned shipyards dwarfed the sums British, Japanese, and German counterparts expended. This enabled American builders to deliver a vast fleet that played a pivotal role in global naval combat.

Part 41, focuses on Navy fuel purchase contracts for Saudi Arabian oil and businesses' use of institutional advertising for tax

exemptions during and after the war.

“SILVER STAR “For gallantry in action on 19 December 1944 in * * *. When medical personnel was not available to render aid to a unit suffering heavy casualties near * * * Chaplain Kimball, displaying great personal bravery, volunteered to pass through fierce enemy machine gun fire in an effort to render treatment and to evacuate the wounded. While on his courageous mission, he was ambushed by infiltrating Germans and received severe wounds which resulted in his death. Chaplain Kimball’s conspicuous valor and unflinching devotion to the welfare of his men reflected credit on himself and the military service.”—Citation The Reverend Kimball’s diary tells of the varied and challenging duties of his post. Indeed he was a man of many talents, distinguished for his strong spiritual leadership and for his alternate role as the unofficial librarian of his regiment, the 1128th

Engineer Combat Group of the U.S. Army. He died ministering to his flock in the Ardennes forest in 1944. The Craft of Wargaming is designed to support supervisors, planners, and analysts who use wargames to support their organizations’ missions. The authors focus on providing analysts and planners with a clear methodology that allows them to initiate, design, develop, conduct, and analyze wargames. Built around the analytic wargaming construct, organizations or individuals can easily adapt this methodology to construct educational and experiential wargames. The book breaks the wargame creation process into five distinct phases: Initiate, Design, Develop, Conduct, and Analyze. For each phase, the authors identify key tasks a wargaming team must address to have a reasonable chance at designing, developing, conducting, and analyzing a successful wargame. While these five stages are critical to the process of constructing any wargame, it should be understood that the craft of wargaming is learned through active participation, not by reading or watching. This craft must be practiced as part of the learning process, and the included practical exercises provide an opportunity to experience the construction of an analytical wargame. The authors also discuss critical supervisory tasks that are essential to manage the wargaming team’s efforts. While the creators are focused on the design and development of the game itself, supervisors must set conditions for the wargame to be a success (best practices) and beware of the pitfalls that may set the wargame up to fail (worst practices). The book demonstrates using the

analytical wargaming framework to create relevant and useful planning wargames. It also reinforces using the analytical wargaming framework for seminar wargames that, without rigor, are useless. The book demonstrates the benefits of using the analytical wargaming process to design educational and experiential games.

The authors employ the techniques of oral history to penetrate the nether world of the drug user, giving us an engrossing portrait of life in the drug subculture during the "classic" era of strict narcotic control. Praise for the hardcover edition: "A momentous book which I feel is destined to become a classic in the category of scholarly narcotic books." —Claude Brown, author of the bestseller, *Manchild in the Promised Land*. "The drug literature is filled with the stereotyped opinions of non-addicted, middle-class pundits who have had little direct contact with addicts. These stories are reality. Narcotic addicts of the inner cities are both tough and gentle, deceptive when necessary and yet often generous--above all, shrewd judges of character. While judging them, the clinician is also being judged." —Vincent P. Dole, M.D., The Rockefeller Institute. "What was it like to be a narcotic addict during the Anslinger era? No book will probably ever appear that gives a better picture than this one. . . . a singularly readable and informative work on a subject ordinarily buried in clichés and stereotypes." —Donald W. Goodwin, *Journal of the American Medical Association* ". . . an important contribution to the growing body of literature that attempts to more clearly define the nature of drug addiction. . . . [This book] will appeal to a diverse audience. Academicians, politicians, and the general reader will find this approach to drug addiction extremely beneficial, insightful, and instructive. . . . Without qualification anyone wishing to acquire a better understanding of drug addicts and addiction will benefit from reading this book." —John C. McWilliams, *Pennsylvania Magazine of History and Biography* "This study has much to say to a general audience, as well as those involved in drug control." —Publishers Weekly "The authors' comments are perceptive and the interviews make interesting reading." —John Duffy, *Journal of American History* "This book adds a vital and often compelling human dimension to the story of drug use and law enforcement. The material will be of great value to other specialists, such as those interested in the history of organized crime and of outsiders in general." —H. Wayne Morgan, *Journal of Southern History* "This book represents a significant and valuable addition to the contemporary substance abuse literature. . . . this book presents findings from a novel and remarkably imaginative research approach in a cogent and exceptionally informative manner." —William M. Harvey, *Journal of Psychoactive Drugs* "This is a good and important book filled with new information containing provocative elements usually brought forth through the touching details of personal experience. . . . There isn't a recollection which isn't of intrinsic value and many point to issues hardly ever broached in more conventional studies." —Alan Block, *Journal of Social History*
