*Pearson Mathematics student book for Year 8 follows the Australian Curriculum for Mathematics. It has been strategically designed to attract maximum student engagement, develop a deep understanding of key concepts and skills, and to encourage inquiry and problem solving. This student book provides you with extensive material, with a collection of maths games, investigations, problem solving tasks, revision activities, practice questions and technology exercises. Additionally, a mini, re-usable whiteboard has been provided in the back of Pearson Mathematics student book for Year 8, to help encourage active participation from your students. All exercises within the student books are split into the Australian Curriculum proficiency strands: fluency, understanding and reasoning. You'll also find open-ended questions that encourage creative maths thinking. Accuracy has been observed by this series, with experienced teachers carefully checking every question within Pearson Mathematics - up to five times!*

*Intermediate Algebra EnVisionMATH MyLab Math With Pearson eText -- Standalone Access Card -- for Calculus and Its Applications Developmental Mathematics Pearson MyLab Math Integrated Course Sequence Access Code MyLab Math with Pearson eText -- Access Card -- For a Pathway to Introductory Statistics (18-Weeks)*

**NOTE: Before purchasing, check with your instructor to ensure you select the correct ISBN. Several versions of the MyLab(TM) and Mastering(TM) platforms exist for each title, and registrations are not transferable. To register for and use MyLab or Mastering, you may also need a Course ID, which your instructor will provide. Used books, rentals, and purchases made outside of Pearson If purchasing or renting from companies other than Pearson, the access codes for the MyLab platform may not be included, may be incorrect, or may be previously redeemed. Check with the seller before completing your purchase. For courses in Introductory Statistics. This is the standalone 18-week access card for MyLab Math. Looking for a new path to Statistics? Prepare for introductory statistics with a one-semester course that offers an alternative to the traditional two-semester developmental algebra sequence. For students whose major requires Statistics, tailoring their developmental sequence with a PreStatistics approach allows them to begin to reason statistically, get familiar with statistical vocabulary, and get comfortable working with data, all while learning the necessary prerequisites to prepare them for their college-level course. Packed with authentic data sets to make math meaningful to students, this program provides both an introduction to descriptive statistics and the requisite algebra topics needed for a statistics course, while demonstrating the close link between the two subjects. The 2nd Edition increases the number of MyLab(TM) Math exercises, revises and refines content throughout, and features a new Workbook by the author with hundreds of affective domain and PreStatistics activities. Personalize learning with MyLab Math By combining trusted author content with digital tools and a flexible platform, MyLab Math personalizes the learning experience and improves results for each student. 0136467865 / 9780136467861 MYLAB MATH WITH PEARSON ETEXT -- ACCESS CARD -- FOR A PATHWAY TO INTRODUCTORY STATISTICS (18-WEEKS), 2/e**

**College Algebra provides a comprehensive exploration of algebraic principles and meets scope and sequence requirements for a typical introductory algebra course. The modular approach and richness of content ensure that the book meets the needs of a variety of courses. College Algebra offers a wealth of examples with detailed, conceptual explanations, building a strong foundation in the material before asking students to apply what they've learned. Coverage and Scope In determining the concepts, skills, and topics to cover, we engaged dozens of highly experienced instructors with a range of student audiences. The resulting scope and sequence proceeds logically while allowing for a significant amount of flexibility in instruction. Chapters 1 and 2 provide both a review and foundation for study of Functions that begins in Chapter 3. The authors recognize that while some institutions may find this material a prerequisite, other institutions have told us that they have a cohort that need the prerequisite skills built into the course. Chapter 1\*: Prerequisites Chapter 2\*: Equations and Inequalities Chapters 3-6\*: The Algebraic Functions Chapter 3\*: Functions Chapter 4\*: Linear Functions Chapter 5\*: Polynomial and Rational Functions Chapter 6\*: Exponential and Logarithm Functions Chapters 7-9\*: Further Study in College Algebra Chapter 7\*: Systems of Equations and Inequalities Chapter 8\*: Analytic Geometry Chapter 9\*: Sequences, Probability and Counting Theory**

**Envision a math program that engages your students as it strengthens their understanding of math. enVisionMATH uses problem based interactive learning and visual learning to deepen conceptual understanding. It incorporates bar diagram visual tools to help students be better problem solvers, and it provides data-driven differentiated instruction to ensure success for every student. The best part, however, is that this success is proven by independent, scientific research. Envision more, enVisionMATH! For courses in Prealgebra and Beginning Algebra (combined courses). Helps students innovatively "Do the Math" Developmental Mathematics, 2nd Edition by Sullivan, Struve, and Mazzella utilizes the authors' hallmark engaging features to introduce students to the logic, precision and rigor of mathematics, while building a foundation for success in future math courses. Known for their unique examples that give students extra step-by-step support, the authors have maintained their successful learning aids, and in this revision focused on translating it to the MyLab(TM) Math course-resulting in a truly dynamic print and digital learning and teaching experience. To this end, the authors have created pre-built assignments for the accompanying MyLab Math course, making it easy for instructors to assign homework that utilizes all of the author-created learning features and leads to the best possible student outcomes. Developmental Mathematics offers market-leading content written by author-educators, tightly integrated with MyLab Math--the #1 choice in digital learning. Bringing the authors' voice and approach into the MyLab course ensures that the learning and teaching experience is consistent across all platforms. Also available with MyLab Math MyLab(tm) is the teaching and learning platform that empowers instructors to reach every student. By combining trusted authors' content with digital tools and a flexible platform, MyLab personalizes the learning experience and improves results for each student. Note: You are purchasing a standalone product. MyLab Math does not come packaged with this content. **For courses in Elementary and Intermediate Algebra Helping Readers Innovatively "Do the Math" The Sullivan Elementary & Intermediate Developmental Math Series, 4th Edition introduces readers to the logic, precision and rigor of mathematics, while building a foundation for future success. Known for their hallmark examples that provide extra step-by-step support, the authors have continued their successful text pedagogy and have focused on the revision to translating it to the MyLab(TM) Math course for a truly dynamic learning and teaching experience. Key revisions to the MyLab Math course include guided "How To" exercises, modeled on the successful Show Case examples and new GeoGebra applet exercises. The Sullivan team has revised their MyLab Math course to ensure that readers are getting the most of the resources they have at their disposal. For example, they offer an enhanced e-text that allows readers to easily and quickly refer back to a specific page for examples. To encourage readers, the author team developed a MyLab Math that helps them develop good study skills, garner an understanding of the connections between topics, and work smarter in the process. Also available with MyLab Math MyLab(TM) Math is an online homework, tutorial, and assessment program designed to work with this text to engage students and improve results. Within its structured environment, students practice what they learn, test their understanding, and pursue a personalized study plan that helps them absorb course material and understand difficult concepts.
