America's Role in Bible Prophecy

CCDE Study Guide

Fast Track: U. S. History

UNVEILING THE HIDDEN MYSTERY OF AMERICA'S ROLE IN BIBLE PROPHECY *The world is ever-changing. As we witness unrest, political upheaval, pandemics, and general uncertainty, we have to wonder, "What in the world is going on?" What seems like a continual roller coaster ride is disturbing, and people are looking for answers. You can stop looking because the answers can be found in the writings of the ancient prophets. In this new study guide, *The Hour That Changes Everything*, Richard Pearson will take us through the Bible, highlighting God's plan for America's current and future role in the End Times. Something is indeed happening, and Richard Pearson digs deeply into the Bible to help you understand biblical prophecy from a refreshingly new perspective. With each chapter, you do not only learn more about prophecy, but you'll also clearly discover hidden mysteries pointing to the United States' role in it. **IT WILL COME IN ONE HOUR** While the Bible has plenty to say about the End Times, *The Hour That Changes Everything* will uncover the greatest "time sequence" in human history. In that one hour, an incredible cataclysmic change will cover the world pivoting around The USA. But at the same time, even as the hour brings judgment, Richard Pearson details how the God who delivered Shadrach, Meshach, and Abednego from Babylon's fiery furnace, will once again manifest His presence, in our generation, and miraculously open a door for our escape. Richard Pearson founded Richard Pearson Ministries while serving for twenty-one years on the executive board of Oral Roberts University. Retired now as CEO of several Canadian transportation companies, He and his wife, Karen, reside in Canada. Do you want to give your students more practice with research*

With the view that children are capable young scientists, authors encourage science teaching in ways that nurture students' curiosity about how the natural world works including research-based approaches to support all K-5 children constructing scientific explanations via talk and writing. Grounded in NSF-funded research, this book/DVD provides K-5 teachers with a framework for explanation (Claim, Evidence, Reasoning) that they can use to organize everything from planning to instructional strategies and from scaffolds to assessment. Because the framework addresses not only having students learn scientific explanations but also construct them from evidence and evaluate them, it is considered to build upon the new NRC framework for K-12 science education, the national standards, and reform documents in science education, as well as national standards in literacy around argumentation and persuasion, including the Common Core Standards for English Language Arts (Common Core State Standards Initiative, 2010).The chapters guide teachers step by step through presenting the framework for students, identifying opportunities to incorporate scientific explanation into lessons, providing curricular scaffolds (that fade over time) to support all students including ELLs and students with special needs, developing scientific explanation assessment tasks, and using the information from assessment tasks to inform instruction.
