Drawing is a way of constructing ideas and observations as much as it is a means of expressing them. When we are not ready or able to put our thoughts into words, we can sometimes put them down in arrangements of lines and marks. Artists, designers, architects, and others draw to generate, explore, and test perceptions and mental models. In *Drawing Thought*, artist-educator Andrea Kantowitz invites readers to use drawing to extend and reflect on their own thought processes. She interweaves illuminating hand-drawn images with text, integrating recent findings in cognitive psychology and neuroscience with accounts of her own artistic and teaching practices. It takes advantage of the ways in which human cognition is embodied and situated in relationship to the environments in which we find ourselves. We become more aware of the interplay between our external surroundings and the inner workings of our minds as we draw. We can trace moments of perception and understanding in a sketchbook that might otherwise be lost, and go back to
