chemical reactions in two ways. First, the scrambled elements appear added together on the left of the reaction with coefficients (like the number 2 in the puzzle above) telling you how many of each element the solution contains, and you fill in the result of the VERBAL ReACTiON by rearranging the elements and writing them on the blanks on the right side of the reaction. Secondly, all of the solutions are chemical words. A chemical word is a word that can be made using symbols from the periodic table. For example, the chemical word POSSEsSiON is made using the symbols for phosphorus (P), oxygen (O), sulfur (S),

Chemical word jumbles are an exciting new form of word puzzles. You don't need to know any chemistry! These chemical word jumbles will appeal to all word puzzle lovers, whether or not they also enjoy science. Each word is composed of symbols from the periodic table, instead of letters; but you don't need to be familiar with the periodic table to solve the word jumbles. Here is an example: The words BRaIn PoWEr are composed of the following symbols for chemical elements: B for boron, Ra for radium, In for

indium, Po for polonium, W for tungsten, and Er for erbium. In chemical word jumbles, the words have been scrambled by rearranging the symbols - not the letters. Symbols that have two letters - like He for helium and Nd for neodymium - can't be split or have their letters reordered. This creates a significant distinction between ordinary word jumbles and chemical word jumbles. For example, the symbols Er, V, S, and Es may be combined to form the word SErVEs, but not the word SEVERs because symbols would have to be split to form SEVERs. One neat difference between ordinary word jumbles and chemical word jumbles is that chemical word jumbles allow us to make use of a vocabulary of longer words without effectively increasing the difficulty of the puzzle. For example, the word VErBAI is a 6-letter word, but only a

half and a wordplay half, with anagrams, reversals, containers, and lots of other word games built in. For example, here's a clue: 'Reportedly lost in fog. (4 letters).' Got it? It's 'mist' - a homonym for 'missed' and also a synonym for 'fog'. An introduction enlightens you on all the intricacies of solving cryptic crosswords, and of course the solutions appear at the end with tricks behind the clues explained. It may take a little practice to get the hang of these, but once you do, you'll be hooked for good!
