The first year of college can be challenging for many reasons. The classes are harder, the schedule is more demanding, and you will be expected to manage everything on your own, perhaps for the first time in your life. And the papers! You have to write so many papers! But there is help available for the papers, at least. The Freshman Five Boxed Set contains the five Alison Plus Guides to Writing for the five types of papers most college freshmen will have to write: five-paragraph essays, short answer essays, compare and contrast essays, persuasive essays, and narrative essays. Each assignment type has different challenges and goals, but now one collection makes all five writing guides available in one boxed set. Here are each of the five writing guides contained in this boxed set. Book One: A+ Guide to Five-Paragraph Essays Book Two: Short Answer Essays Book Three: Compare and Contrast Essays Book Four: Persuasive Essays Book Five: Narrative Essays Useful as a course book or as a self-study guide, this text is essential reading for all international students studying for a British qualification at university. It provides a clear guide to the areas that need to be considered in order to research and produce a well presented and cohesive piece of academic writing. The steps outlined, and the language used, are accessible, and graded to a level that steadily introduces new writing concepts to students studying for a degree in a second or additional language. In particular it covers planning, conducting research, critical thinking, structuring an essay, use of sources and referencing, and feedback and revision.

Covering both theoretical and practical approaches, Writing the Research Paper guides students studying in English as a second or additional language through the skills necessary for success in university-level writing and research. The book begins with theoretical considerations, such as research, argumentation and critical thinking. It then offers a broad range of practical assistance covering all aspects of the writing process, including topic selection, argument, counter-argument, paragraph structure and cohesion. The book is accompanied by a companion website, writingtheresearchpaper.com. The website hosts many features, including chapter summaries, exercises, quizzes, PowerPoints, additional learning material, and technology assistance. The website also hosts numerous authentic examples of student papers at each of the critical stages of the writing process.

"MsoNormal" Anthem Guide to Critical Thinking Skills: Language and Logic' guides readers in the process of critical thinking and persuasive speaking and writing. The text discusses informal thinking, the formal processes of induction, deduction, and syllogistic reasoning, in a clear format that makes it easy for the "beginning logician" to process. Students learn how to form a proposition, identify issues, gather evidence, and process an argument. To get started, logic games, puzzles, and real life examples ask students to consider how we evaluate, analyze, and decide. What happens if Janie says, 'Mom, can I go to the party? All of my friends are going!' And Mom responds, 'What if all of your friends jumped off the empire State building?' Is 'all of my friends are going' a good reason? Does mom have a point? Language and Logic will help students evaluate these everyday decisions. Then a more formal look at induction and deduction challenges students to practice higher-level thinking skills, such as using analogies for evaluation, and working through syllogisms to process ideas. After a review of the Greek Fallacies, readers can have some literary logic fun by analyzing old standards like 'Love is a Fallacy' and the persuasive love poem 'The Passionate Shepherd'"-- Provided by publisher.

Writing studies has been dominated throughout its history by grand narratives of the discipline, but in this volume Bruce McComiskey begins to explore microhistory as a way to understand, enrich, and complicate how the field relates to its past. Microhistory investigates the dialectical interaction of social history and cultural history, enabling historians to examine uncommon sites, objects, and agents of historical significance overlooked by social history and restricted to local effects by cultural history. This approach to historical scholarship is ideally suited for exploring the complexities of a discipline like composition. Through an introduction and eleven chapters, McComiskey and his contributors—including major figures in the historical research of writing studies, such as Louise Wetherbee Phelps, Kelly Ritter, and Neal Lerner—develop focused narratives of particular significant moments or themes in disciplinary history. They introduce microhistorical methodologies and illustrate their application and value for composition historians, contributing to the complexity and adding momentum to the emerging trend within writing studies toward a richer reading of the field's past and future. Scholars and historians of both composition and rhetoric will appreciate the fresh perspectives on institutional and disciplinary histories and larger issues of rhetorical agency and engagement enacted in writing classrooms that are found in Microhistories of Composition. Other contributors include Cheryl E. Ball, Suzanne Bordelon, Jacob Craig, Matt Davis, Douglas Eyman, Brian Gogan, David Gold, Christine Martorana, Bruce McComiskey, Josh Mehler, Annie S. Mendenhall, Kendra Mitchell, Antony N. Ricks, David Stock, Kathleen Blake Yancey, Bret Zawilski, and James T. Zebroski.
