Professor Foss has been a leading figure in pointing out to Byzantinists the necessity of taking archaeological evidence into account when making any historical reconstruction. These studies have as their purpose, in large part, such an evaluation of the archaeological data, including the evidence of coin finds, weighing it against and combining it with the information gathered from written sources. They demonstrate the vital importance of such material for some of the central issues of Byzantine history, notably the question to what extent did towns and cities, the centres of civilised life in the classical world, perpetuate this into the Byzantine period. As Foss shows, the physical record makes it plain that the structures inherited from Roman times fell into decay, and that the land took on a new medieval aspect of fortresses and villages. The first articles in this volume deal specifically with this transformation in the Byzantine heartlands of Asia Minor, and attribute a key role to the destructive Persian invasions of the 7th century. The following pieces, based extensively on the results of survey work, explore how the patterns of settlement evolved in particular areas, from the Roman up into the Turkish periods.

Lean manufacturing; work cells and group technology; time standards; the concepts behind calculating machine and personnel requirements, balancing assembly lines, and leveling workloads in manufacturing cells; automatic identification and data collection; and ergonomics. Studies in the History of Collections II The Marchese Giovanni Pietro Campana was a Roman banker who formed one of the most important private collections of the first half of the 19th century. The Campana collection was an extraordinary assemblage of antiquities and modern arts and crafts, including maiolica, sculpture and painting from the medieval and Renaissance periods. This study is in two sections. The first is devoted to Campana's biography and to an examination of how he acquired and studied the objects in his collection; the second part is dedicated to the collection itself and its dispersal.

Instant Newton: A collection of Helmut Newton's test Polaroids Polaroids occupy a special place in the hearts of many photo enthusiasts who remember a time when "instant photography" meant one-of-a-kind prints that developed within minutes of clicking the shutter. What was once a crucial tool for photographers to test their shots before shooting on film has now become obsolete in the face of digital photography. Luckily for us, legendary photographer Helmut Newton saved his test

Polaroids, allowing a privileged and rare chance to see the tests from a selection of his greatest shoots over a period of decades, including many from the TASCHEN titles SUMO, A Gun for Hire, and Work. Selected by his widow, June Newton, from over 300 photos featured at the 2011 exhibition "Helmut Newton Polaroids" at the Museum für Fotografie in Berlin, this collection captures the magic of Helmut Newton photo shoots as only Polaroids can. Text in English, French, and German

This authoritative short volume introduces readers to the Roman army, its structure, tactics, duties and development. One of the most successful fighting forces that the world has seen, the Roman army was inherited by the emperor Augustus who re-organized it and established its legions in military bases, many of which survived to the end of the empire. He and subsequent emperors used it as a formidable tool for expansion. Soon, however, the army became fossilized on its frontiers and changed from a mobile fighting force to a primarily defensive body. Written by a leading authority on the Roman army and the frontiers it defended and expanded, this is an invaluable book for students at school and university level, as well as a handy guide for general readers with an interest in military history, the rise and development and fall of the Roman legions, and the ancient world.

Master innovator: Challenging accepted notions of architecture From emergency relief shelters to a cardboard cathedral and exhibition spaces in shipping containers, Pritzker-prize winning architect Shigeru Ban has made his name with his restlessly inventive response to material and situation, as much as with his humanitarian work at the sites of natural and man-made disasters. In the spirit of a three dimensional poetry, Ban uses materials as an incorporated part of his design, selected not for their cutting-edge credentials but rather for their expressive ability, their capacity to convey the buildings' overall concept. In particular, Ban has made regular use of paper tubing in projects as varied as the Japanese Pavilion at Expo 2000 and emergency shelters for Rwanda's Byumba Refugee Camp. This essential introduction, compiled with Ban's own collaboration, presents every one of his projects to date to survey the full reach and importance of, in the words of the Pritzker Prize jury, a committed teacher who is not only a role model for younger generation, but also an inspiration.

Eusebius' Life of Constantine is the most important single record of Constantine, the emperor who turned the Roman Empire from prosecuting the Church to supporting it, with huge and lasting consequences for Europe and Christianity. The only English version previously available is based on a seventeenth-century Greek edition, but two new critical editions produced this century make a new English version necessary. The authors of this edition present the results of the recent scholarly debate, as well as their own researches so as to clarify the significance of Eusebius' work and introduce the student to the text and its interpretation, thus opening up the contentious issues. At face value much of what Eusebius wrote is false. This book shows how, once his partisan interpretations and rhetoric are properly understood, both Eusebius' text and the documents it contains give vital historical insights.

From Nic é phore Ni é pce's 1827 eight-hour-exposure rooftop pictures to the horror of Nick Ut's "napalm girl," the 50 photographs in this collection have defined eras, made history, or touched something so fundamentally human that they have become resonant icons around the world.
