**Training in the Motor
Vehicle Repair and
Sales Sector in Italy**

An international team of researchers studied the following aspects of training in Italy's motor vehicle repair and sales sector:

- structure and characteristics;
- institutional and social context;
- relationship to Italy's overall labor

Read Free Peugeot 308 Service And Repair

market; changing structural, economic, and organizational conditions; and training and recruitment and relationship to Italy's education system. Social and labor/employment statistics were analyzed, and case studies of an independent auto

Read Free Peugeot 308 Service And Repair

repair shop and four automobile distributors were conducted. Included in each case study were a profile of the company and analysis of its human resource development/training concepts and policies, and provisions for continuing vocational training. A distinct lack of initial

Read Free Peugeot 308 Service And Repair

vocational training required to produce workers capable of keeping pace with the rapid changes in the sector was noted.

This deficiency was partly compensated for by courses provided by manufacturers and, to a lesser degree, related associations.

The training currently

Read Free Peugeot 308 Service And Repair

offered by the companies studied was rated average to better than average. Employee training was being provided almost exclusively by manufacturers. A trend away from training only in traditional technical areas toward training in areas deemed useful for overall
